## ARRANGEMENT OF THE CATALOGUE

All publications of an Institution are catalogued alphabetically under the name of that Institution. The names of Institutions are arranged together with those of independent publications, alphabetically under their towns. Towns are arranged alphabetically under the countries to which they belong, and the order in which these countries is arranged is shown in the table of contents at the beginning of the catalogue (p. n)

A dash after the volume number and date means that the location is current in the Connemara Public Library. Numbers wanting are shown within brackets.

Two alphabetically arranged indexes are added at the end of the catalogue to help reference, the first being of Names of Publications and the second of Names of Institutions and Towns. The numbers in these indexes refer to the item numbers and not to the pages.

The method adopted in compiling this catalogue is much the same as that of the "Catalogue of the Scientific Serial Publications in the Principal Libraries of Calcutta" compiled for the Asiatic Society of Bengal by Mr Stanley Kemp to whom acknowledgment is due for providing so good a model.
