† present volume

It is my pleasant duty to acknowledge the able assistance given by the following members of my staff :

Sri. J. R. RAMANATHAN, *Deputy Superintendent*
of Census Operations

Sri. D. RANGANATHAN, *Tabulation Officer*

Sri. T. BALAKRISHNA KURUP, *Lower Division Clerk*

Sri. V. VENKATA RAO, *Do*

Sri. V. SESHASAYEE, *Comptist*

PREFACE

In this Volume, I present Social and Cultural Tables (C Series). I have also added a preliminary note explaining the concepts on which these tables are based. This volume is a companion volume to the three volumes already published, Part II-A containing "A" series and Part II-B and Part III containing "B" series tables.

The manner in which the data were collected and the nature of machinery employed for that purpose have been indicated in brief in the volume on "A" series. The information covered by this volume relate to the social and cultural characteristics of the population like language, religion, marital status and education.

The following Tables are exhibited :

- C-I Family composition of Sample Households (Based on 20% sample)
- C-II Age and Marital Status
- C-III Part A Age, Sex and Education in all areas
- C-III Part B Age, Sex and Education in urban areas only
- C-III Part C Age, Sex and Education in rural areas only
- C-IV Single year age returns
- C-V Mother-tongue
- C-VI Bilingualism
- C-VII Religion
- C-VIII - Part A Scheduled Castes
- C-VIII - Part B Scheduled Tribes

Of these, C-I is based on the Census Population Record prepared on the back of the Household Schedule. The other social and cultural characteristics covered by the Tables are (1) Age and Marital Status (2) Literacy and educational levels (3) Mother-tongue (4) Bilingualism and (5) Religion. In addition to these, two tables have been presented on Scheduled Castes and Scheduled Tribes explaining the cultural characteristics. These tables have been prepared on the basis of the data collected through the individual slip. Special tables on Scientific and Technical personnel have been prepared and presented as Appendix to Table C III. These tables are based on the information furnished by them in a special card distributed at the time of census enumeration.

At the beginning of every table, the concepts used and the principle on which the tables are based have been explained. The conclusions to be drawn from these tables will be found in the chapters devoted to Social and Cultural aspects in the general Report of 1961 Census. In the preliminary note, the history of questions has been traced and the concepts explained. An extract of the Enumeration Manual explaining the questions and the manner in which information has been collected has also been added. The comparability with the data collected during the previous Censuses has been maintained.

P. K. NAMBIAR
Superintendent of Census Operations

SECTION I — C SERIES TABLES

Preliminary Note

C Series Tables presented in Part I of this volume relate to the social and cultural data collected during 1961 Census. Except Table C-1 they deal with the social and cultural characteristics of the population, viz. age and marital status, literacy and educational levels, mother-tongue, bi-lingualism, religion and special characteristics of Scheduled Castes and Scheduled Tribes. They have been compiled from the data obtained from the following questions in the individual slip:

Serial No.	Question No.	Description
1	2	Age last birth day
2	3	Marital status
3	5 (b)	Religion
4	5 (c)	Scheduled Castes or Scheduled Tribes
5	6	Literacy and Education
6	7 (a)	Mother-tongue
7	7 (b)	Any other languages

The instructions issued for collecting the particulars in 1961 Census will be found in Annexure I. It is good to have an idea of the scope and content of the concepts used and how they have changed from Census to Census. Questions asked on age, literacy, education, marital status, religion, caste and language for the period 1872-1961 will be found in Annexure II. It will help the reader in understanding the discussion which follows.

Age:

It has been reckoned in completed years. The collection of correct age has always been a problem. Many people, especially the illiterates do not know their correct age. Their memory was, however, stimulated by referring to a calendar of outstanding occurrences for each district. The other cause of inaccuracy in age returns is the tendency of every person to approximate their age to round figures ending with 0 and 5. Preference for multiples of 10 and 5 can be seen even in the age returns of advanced countries. This tendency is more marked in countries like India. In spite of these, the returns represent a close approximation of the true distribution of ages and help us in drawing general conclusions on the age structure.

Data relating to age has been collected from the beginning of Census history from 1872. Till 1921, age was defined as the number of completed years on the last birth day prior to the date of enquiry. A departure was made in 1931 when age according to the nearest birth day was recorded. The object of this change was to make the age return more accurate. According to Mr. Yeatts, the then Superintendent of Census Operations, Madras, it is doubtful whether this modified definition brought in more accurate information because the majority of the illiterate people were totally ignorant of the month and dates of births and in most cases even the year of birth was often a guess. As such, from subsequent Census, 1941 onwards, the old definition of age as the number of completed years on the date of enumeration was adopted.

The manner of enquiry into the age has also undergone modification from Census to Census. In 1871 and 1881 it was left to the discretion of the enumerator to fix the age of the people who did not know it. Instructions given to the enumerators in 1881 read as follows: "If any person is unable to state his or her age precisely, do not leave the column blank, but fill it up with as much accuracy as you can from your own observation, if the person is before you and after a proper enquiry from other inmates of the house". In 1891 it was suggested to the enumerator that if a person cannot state the age correctly, he should refer the person to some wellknown events of local importance such as famine, cyclone, Maha Makam and Pushkara festival, with a view to link the year of birth with such events. This method was followed till the year 1931. The event to be referred to was left to the choice of the enumerator. In 1941, a calendar of outstanding occurrences, chronologically arranged, was supplied to the enumerator. In 1951 and 1961 the calendar was brought up to date. Apart from this, it is likely that the accuracy of the age return has improved because of the spread of literacy.

Marital Status:

Marital status is another information which like sex and age has been collected from the beginning of Census history. The classification of marital status adopted in 1961 Census follow the recommendation of the United Nations which are based on International Census practices. Four classifications, viz. Never Married, Married, Widowed and Divorced or Separated have been adopted. A person is treated as Never Married only if he or she has not at any time entered into the state of matrimony. A person who is married once and has lost his wife or obtained a divorce will be shown either as Widowed or against Divorced category in our classification. A person is treated as Married if he is recognised by custom or society to be so and has been married in accordance with religious rites or by registration or according to any custom or form of marriage recognised by his community or is in stable de-facto union. A person is recorded as Widowed if he or she has lost his or her spouse by death and has not remarried. A divorced person is defined as one who after the marital ties have been severed by law or custom either social or religious or by mutual consent and has not married again. A person who has been separated from his wife and is living apart without any intention of living together again has been regarded as separated. This last category includes de-facto separations without any legal incidents as well as divorces and judicial separations obtained from courts of law.

The data relating to marital status were not collected during the first Census of 1871. In 1881 three classifications—Married, Never Married and Widowed were adopted. Divorced and separated were classified with widowed persons. This classification was retained till 1941. In some countries, the question on marital status is put only to persons above the legal age of marriage. The marital status of all persons below that age was presumed to be unmarried. This practice may not be realistic in India where child marriages were common until a few years ago and is not uncommon today. As such, this question was put to persons of all ages. The threefold

classification of early Censuses was modified to four-fold classification of Married, Unmarried, Widowed and Divorced in 1951 Census. The only change adopted during 1961 was the change of classification of unmarried into never married.

Literacy and Education :

Literacy is defined as the ability to read with understanding and to write a short statement in mother-tongue or in any other language. The test for literacy is satisfied if a person can write a simple letter in his mother-tongue or in any other language. A person who knows only to read or a person who can write only figures and sign his name are treated as illiterates.

The concept of literacy and education has undergone several changes from the beginning of Census history. In the three Censuses of 1871, 1881 and 1891, people were classified into three categories - (i) literate (ii) illiterate and (iii) people under instruction or people attending school, college or under private tuition. The Census questionnaire contained two questions, one dealing with people under instruction or learning and the other people not under instruction. The people not under instruction were classified as literate and illiterate and people under instruction, though counted as literates in estimating total literacy figures were shown separately. During the third Census in 1891, the language best known to the person or the language in which the person was literate was also recorded. Further the ability to read and write English in addition to his vernacular was also recorded. Besides English, only one Indian language was entered in the schedule as best known to the literates. In 1901 the category of "under instruction" was deleted. Again in 1901 the Tables prepared showed the literates in different Indian languages separately. The following changes were made in 1901 : (i) literacy in English was ascertained and (ii) the definition of literacy was modified as ability to read and write a letter to a friend. Young children who could read and write a few words with difficulty were classified as illiterates. A person who was able to read and write a letter in English was treated as literate in English. Census questionnaires of 1911, 1921 and 1931 followed the same pattern. Census of 1941 marked another important stage in the evolution of the concept. The question on specific educational attainment or highest examination passed was included. The question on literacy was actually sub-divided into three small questions which read as follows :

1. Can you both read and write ?
2. If so, what script do you write ?
3. Can you only read ?

An additional question was thus introduced to find out partial literate, i.e. people who can read only. The particulars collected in 1941 were not however, tabulated because of the World War II. The question on literacy in English was eliminated in 1951. The concept of partial literate person who could read only was given up in 1961. The population has been classified into literate and illiterate and in the case of literates, the highest examination passed has also been entered. The procedure adopted in 1961 follows the Census practice in a number of countries and is based on the recommendation of the United Nations.

Mother Tongue and Bilingualism :

Data on mother tongue are useful for analysing the ethnic composition of the population. Mother tongue is perhaps a more sensitive index of the ethnic origin than the birth place

because linguistic differences tend to persist until complete cultural assimilation has taken place. Important ethnic groups not only among the foreign born, but also among the native born can be distinguished by language differentials. These data are significant in a country like ours where linguistic minorities and official language have given rise to controversies.

Census questionnaire in 1961 contains two questions on language. Question 7a relates to the mother tongue which has been defined as the language spoken by a person since early childhood. Question 7b deals with other languages known to the individual. Two such languages were recorded against Question 7b. The language so recorded should be one which a person speaks and understands best and can use with facility in communicating with others.

Information on mother tongue was first collected in 1881. Mother tongue was defined as the language ordinarily spoken in the household. If the father and mother spoke different languages, both were returned. In 1891 the question was termed as 'parent tongue' though the definition remained the same. In 1901 the term parent tongue was replaced by a phrase "language ordinarily spoken in the household". This was continued in 1911 and 1921. A departure was made in the collection of particulars on language in 1931. The Census questionnaire of 1931 contained two questions, one on mother tongue and the other on other languages in common use. The second question 'other languages' was restricted to Indian languages. They were repeated in 1941 with a slight modification. The second question was made more explicit as 'other Indian languages in common use'. In 1951 the question on bilingualism was restricted to Indian languages other than mother tongue. Till 1931 no attempt was made to collect any information on bilingualism. The instruction given to the enumerators in 1941 read as follows : "It is not enough that a person should merely know the language and speak it occasionally. Second language can be entered only if it is habitually used by the person concerned". No information about foreign languages were collected except on English. The scope of the enquiry was slightly improved in the Census of 1951 on the restriction on habitual usage was eliminated and the language other than mother tongue which a person commonly speaks was elicited. But it was restricted to one Indian language. But in 1961 the additional language need not be the language ordinarily used in the household and need not necessarily be an Indian language. It was sufficient if a person knew to communicate with others in other languages besides his mother tongue. Thus the question and concepts adopted in 1961 represent a definite improvement on the previous Censuses, in that a maximum of two languages was recorded. At the tabulation stage, only the first language so recorded was taken into consideration.

Religion and Castes :

Religion and caste are two cultural aspects of the population on which data have been collected throughout the Indian Census. Such data are useful for social and political studies. In 1961 Census, two questions were put. One dealt with religious affiliation of the individual enumerated and the other exclusively with Scheduled Castes and Scheduled Tribes. What are the Scheduled Castes and Scheduled Tribes and what is their importance will be discussed in greater detail in the companion volume in Part V which is exclusively devoted to the special Tables on them. All that we need say at this stage is that

a list of Scheduled Castes and Scheduled Tribes as notified by the President was given to the enumerators. Members of these groups were put specific questions and the particular caste or tribe to which they belonged entered in the individual slip.

In 1872 Hindus and Muslims were classified separately and others put under the group 'other religions'. In 1881, information on the caste or class was also collected. Particulars of all religious groups were shown separately and in the case of Hindus, data on caste and in the case of other religions and groups, data on sex were collected. In 1891, more attention was paid to details. Data on religion and the sect of religion as well as the caste particulars of the Hindus and Jains were collected. In the case of tribes living in forest and hills whose religious affiliation could not be ascertained definitely, they were classified as "aboriginals". The racial origin of those other than Hindus, Jains and tribes was also ascertained. Muslims were classified as Pathans, Moghuls, Mappilas, Christians and Eurasians, native Christians and Buddhists as Burmese and Indians. Some modification was made in 1901. The Census questionnaire contained two questions only on the subject. The first dealt with the religious affiliation and the second with the caste of Hindus and Jains and tribe or race in the case of others. The sub-sect or sub-divisions were entered for Christians and for others, the main name of the religion was entered. The caste of Hindus and Jains was also recorded. The special classification of aboriginals was given up and the name of tribe or caste as returned by the individual was entered. Particulars of race in the case of those other than Hindus, Jains and tribes were also collected. The same pattern was followed in 1911 and 1921. A slight modification was made in the Census of 1931. Unlike in the previous Census, sects or sub-divisions of all religions were entered and other questions on caste, tribe and race remained unchanged. In 1941 the question on subjects of religions was eliminated and the names of religion only asked. The question on race, tribe and caste was retained. Important changes in concept were introduced in 1951 Census. The question on caste or race of the people was given up as a matter of national policy, but separate information was collected on certain special communities or groups like Anglo-Indians, backward classes, Scheduled Castes and Scheduled Tribes. Information on religion was also collected.

In 1941 and earlier Censuses, primary sorting and tabulation was based on religion. In 1951 economic classification of livelihood classes became the basis of tabulation. A further

step was taken in 1961, in that Census enquiry should not concern itself with particulars of castes, sects of religions and castes, but detailed particulars on Scheduled Castes and Scheduled Tribes were, however, collected. The instructions were so enlarged as to include persons belonging to religious classes like Brahma Samaj, Arya Samaj and atheists. Every Scheduled Caste and Tribe has been listed and full particulars tabulated which will be presented in a separate volume.

Family Structure of the Population :

A unique feature of 1961 Census is the collection of economic data on the basis of household schedule. For this purpose, a household schedule has been filled in along with the individual slip during Census enumeration. Two aspects of family structure covered during the present Census are -- the size of the families, whether medium sized, small sized or large sized and the composition of the households, viz. the proportion of the heads of households, spouses of heads of households, related males and females and the proportion of unrelated members to the total population of the household. Household is a basic unit for many surveys intended for gathering information on the living pattern of the population.

Information was collected on each household on the chief economic activities of the household,—cultivation and household industry. On the back of the household schedule, a Census Population Record was prepared giving information on the individuals composing the household like name, sex, relationship to the head of the household, age and marital status. Actually it is an abstract of information contained in the individual slip. It is a modified form of National Register of Citizens prepared during 1951 Census. But unlike the National Register of Citizens, the Census Population Record was filled in by enumerators themselves during actual enumeration. From this Census Population Record, two Tables dealing with the size and composition of the households have been prepared—B XVII and C I. C I will be presented in this volume. Household has been defined as a group of persons living together in the same house not necessarily bound by ties of relationship and taking their meals from a common mess. While in 1951 data were tabulated on the basis of sample households, 1 in 10,000, in 1961, a larger sample of 20% was adopted. The scope of the household schedule and Census Population Record will be discussed in greater detail in Part III. How the Census Population Record has been prepared will be found in Annexure III.

ANNEXURE I

EXTRACT OF INSTRUCTIONS ISSUED

Age Last Birth Day:

The number of completed years of age, i.e., the age on the last birthday before 1st March 1961, should be recorded. The common tendency is to provide the age at the next birthday and this should be avoided. Many persons may find it difficult to furnish their correct age. You should stimulate their memory by referring to historical incidents or religious events which have happened in the State, district or taluk.

To assist you, a list of outstanding occurrences arranged chronologically will be given to you. If you draw their attention to the event mentioned in the list, they may be able to indicate which event happened at the time of their birth or during their early childhood and this may be useful in fixing their age at the present moment. For infants below one year, write 'O'. The answer should be recorded within the rectangle.

Marital Status:

Eliciting information requires great tact on your part. Marital status of every person, whether the individual be an adult or an infant, has to be recorded. The following questions may help you to get correct information:—

- (a) Are you married?
- (b) Is your wife living?
- (c) Are you widowed or separated?

The answers are to be recorded in the form of abbreviations given below. Care should be taken to see that the susceptibilities or feelings of the individual are not wounded by such questions. You may, therefore, make such confidential enquiries as you consider necessary in the neighbourhood before putting these questions to the persons concerned. If you feel it is bound to wound or hurt him, it is better if you do not put these questions, but get the information from other persons who may know the actual circumstances. For instance, if an individual says that he is married, you should ascertain whether the wife is living with him before asking the question whether he is widowed or separated. In the case of infants, ascertain the information from the head of the household or other elders present during the enumeration and record the answer. A person should be treated as "Never Married" only if he has not at any time entered into the state of matrimony. A person who is married once and has lost his wife or obtained a divorce and is staying single at the time of enumeration should not be recorded as a married person. A person should be regarded as married if he is recognised by custom or society to be a married person or has been married in accordance with any religious rites or by registration or according to any custom or form of marriage recognised by his community or is in stable de facto union and has not been widowed or divorced. Even if the marriage is disputed in the locality, a person who says he is married or is in stable de facto union should be recorded as married. A person should be regarded as widowed if he or she has lost his or her spouse by death but has not remarried.

(b) A person is said to be divorced who after marital ties have been severed by law or custom, either social or religious

or by mutual consent, has never been remarried again. A person who has been separated from wife or husband and is living apart with no intention of living together again should be regarded as separated. In the case of prostitutes return her marital status as declared by her. The following abbreviations should be used while recording the answers to this question —

- NM = Never Married
- M = Married
- W = Widowed
- S = Divorced or separated

Religion:

This will have to be recorded under the various abbreviations as shown below:—

- H = Hindu
- M = Muslims
- C = Christians
- J = Jains
- S = Sikhs
- B = Buddhist

These are some of the major religions professed by the majority of persons living in the State. There may, however, be persons who belong to religious classes like Bramma Samaj, Arya Samaj, etc., or there may be others who consider themselves as atheists. In such cases the answers given by them should be recorded in full.

Scheduled Caste or Tribe:

(a) The terms S.C. or S.T. refer to Scheduled Castes and Scheduled Tribes respectively and this question need be answered only for the members of such castes and tribes. Scheduled Castes are found only among the Hindus and Sikhs whereas the scheduled tribes need not profess the Hindu or Sikh religion.

(b) First you must put the question, "Are you a member of the Scheduled Caste or Scheduled Tribe?". If the answer is in the affirmative you can ask him to which caste or tribe he belongs. He will then give you the name of the Scheduled Caste or Scheduled Tribe to which he belongs. At this stage you should verify whether the name of the caste or tribe mentioned by him is found in the list of Scheduled Caste or Scheduled Tribe furnished to you along with the synonyms obtaining in various districts of the State. If it is found to be so included, write the name of the caste or tribe given by him. Generally names like 'Harijan' or 'Depressed classes' should not be used in answering this question. You should explain to the members of the Scheduled Caste or Tribe that this enumeration is being done, for the benefit of the caste or the tribe and as such they should co-operate with you by specifying the name, particular sect to which they belong, instead of returning themselves as Harijans. There are certain generic or synonymous names for the Scheduled Castes or Scheduled Tribes

which are current in various parts of the State. These synonymous names of castes or tribes are shown in the list of Scheduled Castes and Scheduled Tribes supplied to you. If the person enumerated refers to his caste or tribe by a synonym to a main caste or tribe, the relevant main caste or tribe as furnished in the list should be entered along with the synonyms, within brackets. However an enumerator should remember that it is necessary to have the correct details of the Scheduled Castes or Tribes living in the country and as such special attention should be devoted to answering this question. Where the person enumerated is not a member of the Scheduled Caste or Scheduled Tribe mark 'X' against this column.

Literacy and Education

(a) The question is divided into two parts. A person is considered to be literate if he is able to read and write. The test for literacy is satisfied if the person can read and write a simple letter. If necessary you may test his ability by asking him to write a few lines of the examples furnished in this manual.

(b) Persons who are literates might have passed some examinations. In such cases the highest examination passed has to be entered against this question. The following answers should be recorded against this question under the following circumstances :—

'O' for one who can neither read nor write,

'L' for one who can write and read,

and the highest examination passed in the case of persons who have passed some written examination or examinations, e.g., V Form, S.S.L.C., B.A., etc.

Mother Tongue

Mother-tongue is the language spoken by the person since early childhood. Record the answer given by him, even if the language mentioned by him is a dialect of any of the main

languages spoken in the State. In the case of infants or deaf mutes ascertain the language spoken by the mother of the infant or deaf mute and record it against this question. The following abbreviations may be used to record answers against this questions :—

T for Tamil
A for Telugu
K for Kannada
M for Malayalam
U for Urdu
E for English

For the other languages record the language in full. In the case of dialects of all language the dialects may be written in full.

Any other Language(s)

In addition to the mother-tongue, a person may know some other language or languages, Indian or foreign. This question has been framed with a view to collect the data regarding the language other than mother-tongue which a person speaks and understands best and can use with facility in communicating with others. Not more than two such languages should be recorded against this question. These languages should not include dialects of the same language. The following questions may be put in eliciting an answer :—

(i) Do you know any other language? If so, what are the languages?

(b) Supposing he answers that he knows more than one language, then put this question: "Which one do you know best"? Record the answers in the order of the languages he knows best.

(c) In case of persons who do not know any other language other than their mother-tongue, mark 'X' against this question. The same abbreviations to be used against. Q. 7(a) will be used here also.

ANNEXURE II

QUESTIONS ON AGE: 1871 — 1961

1871	1881	1891	1901	1911	1921	1931	1941	1951	1961
(3) Age	(5) Age last birth day	(7) Age	(7) Age last birth day	(7) Age completed last birth day	(7) Age	(7) Age in years to nearest birth day)	(6) Age	(4) Age	(2) Age (Age last birth day)

QUESTIONS ON LITERACY AND EDUCATION: 1871 — 1961

1871	1881	1891	1901	1911	1921	1931	1941	1951	1961
(6) Youths upto 20 attending school, college or under private tuition	(11) Education (1) under instruction (2) Not under instruction but able to read and write	(12) Learning, Literate or illiterate (b) Language known by literates	(14) Literate or illiterate (15) Know or does not know English	(14) Literate or illiterate (15) Whether literate in English	16. Whether literate (i.e. able to write and read a letter) or illiterate & 17. Knows or does not know English	(1) Literate or illiterate (2) Know or does not know English	(20) Can you both read and write? If so, what script do you write? Can you only read? (21) How far have you read? Give any examination passed (22) Are you literate in English?	(12) Literacy and Education. Education	Literacy and Education

QUESTIONS ON MARITAL STATUS 1871-1961

1871	1881	1891	1901	1911	1921	1931	1941	1951	1961
	(3) Condition (i.e.) whether married, unmarried, widow or widower	(8) Married or Unmarried widowed	(6) Married or Unmarried widowed	(6) Married or Unmarried widowed	(6) Married or Unmarried widowed	(5) Married, Unmarried or widowed (enter divorced persons as widowed)	(5) Married Unmarried or widowed or divorced	(3) Civil Condition	(3) Marital status

QUESTIONS ON RELIGION AND CASTE: 1871-1961

1871	1881	1891	1901	1911	1921	1931	1941	1951	1961
4. Religion 5. Caste or class	6. Religion 7. Caste if Hindu, Sect if of other Religion	2. Religion 3. Sect of religion 4. Caste of Hindus and Jains Tribe or race of others.	4. Religion 8. Caste of Hindus and Jains, Tribe or race of others	4. Reli- gion (and sect of Christians) 8. Caste of Hindus and Jains, tribe or race of those of other reli- gions	4. Reli- gion 8. Caste Tribe or Race	4. Reli- gion and sect. 8. Race, Tribe or Caste	4. Reli- gion 3. Race, Tribe or Caste	(2) Part B Reli- gion (write H. for Hindu, M. for Muslim, C. for Christian S. for Sikh I. for Jain For others write the answer as actually returned). Part (C) special groups	(5) (b) Religion (5) (c) S. C. / S. I.

QUESTIONS ON LANGUAGE: 1871-1961

ANNEXURE III.

CENSUS POPULATION RECORD

The form for the preparation of Census Population Record is printed on the reverse of the household schedule. The Census Population Record is intended to record particulars of the names of the members of the household, their sex break-up, relationship to the head of the household, age, marital status and the description of work in the case of workers. It is an improved form of the National Register of Citizens prepared in 1951. It is an important document and has to be filled in with care and caution. The particulars should be filled in with reference to the details recorded in the individual enumeration slip relating to each household. For the sake of convenience, you may fill up the Census Population Record immediately after the individual slips for all members of household are prepared. The total of the members of a household will be worked out and entered in the appropriate columns according to sex break-up. You can verify the particulars by taking into account the number of new slips and cancelled slips relating to each household and checking it up with the total number of persons you have entered in the Census Population Record.

Revision of Census Population Record during revisional round.

I have already indicated in section II that during your revisional round from 1st to 5th March 1961, certain individual slips may have to be cancelled or new slips prepared in the case of visitors who might not have been enumerated elsewhere and new born babies. It, therefore follows, that the Census Population Record should also be brought up to date after the revisional round to every household, with reference to the sunrise of 1st March 1961. As in the case of the individual enumeration slip, entries under "relationship to head" will

have to be changed with reference to the corrections made in these slips if a person who was acknowledged as the head of the household has died. The marital status of the wife or husband of a head of a household will have to be changed suitably and corrections should be attested under your initials in the Census forms and schedules.

How to prepare Census Population Record.

The following instructions may be borne in mind while filling up the Census Population Record :—

Name.—Write the name against Q. 1(a) of individual slip.

Sex.—Write the particulars recorded against Q. 13 of the individual slip.

Relationship to head.—Write the particulars recorded against Q. 1(b) of the individual slip.

Age.—Write the figure recorded against Q. 2 of the individual slip.

Marital Status.—The answer recorded against Q. 3 of the individual slip should be entered here.

Description of the work.—In the case of a worker write here a brief description of the work done by a worker with reference to the answers recorded against Questions 8 to 11 of the individual slip. For this purpose, the principal item of work rounded off will be taken into account.

Total persons—Males and females.—The individual totals according to sex break-up will have to be entered against this column.

C—SERIES TABLES

Under C Series, 11 Tables will be presented. They deal with different social and cultural characteristics of the population in Madras State. The following are the Tables thus presented in this volume.

(i) C I	Family composition of sample households (Based on 20% Sample)
(ii) C II	Age and marital status
(iii) C III	Part A - Age, sex and education (both urban and rural population)
(iv)	Part B - Age, sex and education of urban population
(v)	Part C - Age, sex and education of rural population
(vi) C IV	Single year age returns
(vii) C V	Mother tongue
(viii) C VI	Bilingualism

(ix) C VII	Religion
(x) C VIII	Part A - Scheduled Castes - Literacy levels of workers and non-workers
(xi)	Part B - Scheduled Tribes - Literacy levels of workers and non-workers

In 1951 Table C-II gave the age group of livelihood classes. and a similar Table has not been presented in 1961.

The classification of livelihood classes has been superseded by a more scientific classification into industrial categories of workers. Since these categories have been classified on the basis of their age groups and presented in Economic Tables. BI, BII, BVI and BVII, no separate Table has been prepared giving age groups of various categories of workers. The other change introduced in 1961 is that the age tables are based on a full count except the Table on the size of composition of the households. Age Tables for 1961 Census were prepared on a 10% sample basis. We will now explain in brief the salient features of the tables included in this volume.

TABLE C-1

Family Composition of Sample Households

TABLE C-1

Fly Leaf

This deals with the Family composition of sample households and has been prepared on a 20% sample. This gives the total population of sample households, number of heads of households, number of spouses of the heads of households, married relations and other persons. Data on the Family

composition of the households are given for rural and urban areas separately. Such data were presented for the first-time in 1951. The table presented in 1961, however, is based on a larger sample than the table in 1951 when the table was based on a sample of 1 in every 1000 households.

TABLE C-II

Age and Marital Status

TABLE C-II

Fly Leaf

This deals with the marital status of the various age groups and gives separate figures for rural and urban areas of each district. The population is classified in each age group under four categories--never married, married, widowed and divorced or separated. A fifth category with marital status not specified will be found in the Table. Marital status has been divided into 15 age groups :- 5 year age groups from 10-69, 0-9 and 70+. Age not stated will be found in the last column. It will help us in discussing the pattern of marriage age in the population and its variation from 1951. It represents a definite improvement on the corresponding table of 1951. Firstly this has been prepared on a complete count while in 1951 the Table was prepared on 10% sample. More detailed age groups have also been adopted for tabulation. In 1941 due to war this Table was not prepared. In 1931 and earlier

years, religion was the basis of tabulation and the age and marital status of various religious groups were shown separately. In 1951 tabulation was made on the basis of livelihood classes and in 1961 the tabulation has been done on the basis of industrial categories, though the figures for each livelihood class or industrial category are not published. In the 1961 census the Economic Table B II gives the distribution of towns in each industrial category and the non-workers according to the four broad age-groups:- 0-14, 15-34, 35-59 60 and over. This table is published in Part II B. Another improvement effected in 1961 is that the Table presents separate figures for divorced and separated people. In 1951 Census divorced and separated were clubbed with the widowed people in the Table but separate figures were given in an appendix,

C - III PARTS A, B & C
Age, Sex and Education.

TABLE C-III

Fly Leaf

This deals with the educational standards of the population classified by sex and age groups. This has three parts - Part - A giving the educational standards and age groups of the total population, Part - B dealing with educational standards of urban population and Part - C of the rural population. 10 age groups have been adopted for all the three Tables 5 year age groups upto 34, 35—44, 45—59 and 60+. In Part - B, dealing with the urban population, educational standards adopted for classification are different from C III - Part A dealing with the total population and C III-Part C dealing with the rural population. In C III-Part A and C people have been classified as literates and illiterates which in turn have been sub-divided into:

Literates without educational standards,
Primary or Junior basic &
Matriculation and above.

But in Table C III - Part B, a more detailed classification of educational standards have been adopted. The literates have been classified by the following 7 educational standards:-

1. Literates without educational standards
2. Primary or Junior basic
3. Matriculation or higher secondary
4. Technical diploma not equal to degree
5. Non-technical diploma not equal to degree
6. University degree or post-graduate degree other than the technical degree
7. Technical degree or diploma equal to degree or post-graduate degree

The last category dealing with the technical degrees and

diplomas equal to degree have been further divided into 7 subdivisions, viz: engineering, medicine, agriculture, veterinary and dairying, technology, teaching and others. The Table thus gives useful information about the educational levels of the urban population which will help us in assessing the progress of higher and technical education. As the percentage of such persons will be small in the rural sector, such a detailed classification has not been attempted.

These Tables represent a definite improvement over the corresponding Tables of earlier Censuses. Firstly the literates in the various age groups have been cross tabulated according to various educational standards for the first time in Census history. Actually particulars of educational standards were collected from 1941 onwards. Again this Table is based on a full count while in 1951 it was prepared on the basis of 10% sample. In 1931 and earlier Censuses, people were classified only as literates and illiterates and further classification of literates was not attempted. Literacy in English was an item of information collected upto 1931, but discontinued there-after. In the first three Censuses, people were actually classified into three categories literates, illiterates and people under instruction. This classification was replaced by a two-fold classification of literates and illiterates from 1901 onwards. In 1941 data were collected about the partial literates, i. e., people who can only read. This practice was modified in the subsequent Censuses and only people who knew both to read and write were considered as literates. The partial literates of 1941 were treated as illiterates in 1951 and 1961.

APPENDIX TO TABLE C-III - AGE, SEX AND EDUCATION

DATA ON SCIENTIFIC AND TECHNICAL PERSONNEL

At the instance of the Council of Scientific and Industrial Research, particulars on the scientific and technical personnel were collected in connection with 1961 Census. The following

is the card used for this and contained questions on qualifications, branch of specialisation, employment status.

CENSUS OF INDIA 1961: SCIENTIFIC & TECHNICAL PERSONNEL

Only a person with a recognised Degree or Diploma in Science, Engineering, Technology or Medicine should fill in this card.

READ CAREFULLY BEFORE FILLING IN. TICK (✓)
WITHIN BRACKETS PROVIDED WHERE APPLICABLE.

CENSUS LOCATION CODE

1. NAME..... 2. DATE OF BIRTH.....

3. DESIGNATION & OFFICE ADDRESS.....
(if employed)

4. PERMANENT ADDRESS.....

8. ACADEMIC QUALIFICATIONS (ANSWER FULLY)

5. (a) Male/ ()
(b) Female ()
6. (a) Never ()
(b) Married/ ()
Married/ ()
7. On Feb. 1, 1961 ()
were you:
(a) Employed? ()
if so, monthly ()
total income ()
Rs..... ()
(b) Full time ()
student? ()
(c) Unemployed? ()
if so, how long? ()
.....Yrs.....mths. ()
(d) Retired? ()

Degree/Diploma	Subjects taken	Division	Year of passing

If employed fill in Qs 9-12

9. Nature of employment: ()
- a. Teaching in School ()
 " in College ()
- b. Technical, in Industry ()
 " outside Industry ()
- d. Non-technical ()
10. Any Research Assignment? ()
Yes () /No ()
11. Where employed? ()
- a. Public Sector ()
b. Private Sector ()
c. Self employment ()
12. How employed? ()
- a. Permanent ()
b. Temporary ()
c. On Contract ()
d. Research Scholar etc. ()
e. Otherwise ()

Date

Signature

It was given to the persons possessing the following qualification.

- (i) **Science:** Any one holding B.A., or B.Sc., M.A., or M.Sc., or higher degrees like Ph.D., etc. in science subjects like Physics, Mathematics, Chemistry, Agriculture, Geology, Geography, Zoology, Botany etc.
- (ii) **Engineering:** Any one holding a recognised degree or diploma in Engineering.
- (iii) **Technology:** Any one holding a degree or diploma in technical subjects like Chemical Technology, Leather Technology, Glass and Ceramic Technology etc.

(iv) **Medicine:** Persons holding degree or diploma or Post Graduate degree in medicine and/or Surgery and other allied subjects (both Indian and Allopathic).

Under-graduates and persons holding certificates other than diplomas were not required to fill in this card.

Special instructions were issued to the Enumerators as to how these cards should be distributed and how they should be collected after filling in. Question No. 6 of the Census individual slip dealing with educational qualification, indicated the presence of any scientific or technical personnel in the household. The Enumerator gave a card to each such person during his first visit to the households between 10th and 28th February 1961. If the scientific and technical personnel could not be contacted, the card was given to any other member of the

household. Along with the card, an appeal to the person concerned explaining the dearth of data about scientific and technical personnel and the necessity to collect these particulars now in the context of our Five Years Plans, was also issued.

These cards were collected by the Enumerators during their revisional round between 1st and 5th March 1961. In practice, a number of persons had not filled in the cards by that time and in such cases, they were requested to fill in the particulars and to send them by post. They were not, however, required to pay the postage as the card was devised in the form of a 'Business Reply Card'.

Altogether about 3,20,000 cards were distributed among the Charge Officers for the enumeration of scientific and technical personnel. More cards were distributed in the urban areas than in the rural areas. The actual number of filled in cards received by us was only 25,709. The enumeration of scientific and technical personnel was voluntary. As such the coverage was inadequate. These cards were tabulated at Delhi and eight tables were prepared dealing with various characteristics of the enumerated technical personnel, as described below :

- Table 1.** Classification of qualified persons by branch and sub-branch of science and technology.
- Table 2.** Type of activity and marital status of the persons in each branch of science and technology.
- Table 3.** Year of graduation or of obtaining Post-Graduate degree.
- Table 4.** Engineering and technical personnel qualified in Physical sciences.
- Table 5.** Nature and sector of employment of qualified persons.
- Table 6.** Monthly incomes of employed persons.
- Table 7.** Tenure and sector of employment of employed persons.
- Table 8.** Age and period of unemployment of unemployed persons.

Table No. 1 presents the total number of qualified persons in each branch and sub-branch of science and technology. They have been classified into 58 categories based on the main branch of study. Under each of the main branches of study,

the sub-branches of specialisation with the number of people qualified in each of them, have also been indicated.

Table No. 2 classifies the technically qualified people as employed, unemployed and retired. Persons in each of these categories have been further classified according to their marital status. Persons qualified in each branch of study are shown separately.

Table No. 3 deals with the year of graduation. In the case of Graduates in Physical Sciences, years of obtaining Post-Graduate degrees have also been given. The years of graduation have been classified as before 1920, 1920 to 29, 1930 to 39, 1940 to 44, 1945 to 49 etc. A residuary column of 'year not stated' has also been given.

Table No. 4 deals with the double graduates. Graduates in Engineering and Technology, who also hold degrees in selected branches of Physical Sciences like Physics, Mathematics, Chemistry, Zoology etc., are detailed according to their branch of study.

Table No. 5 deals with the nature and sector of employment of persons qualified in each branch of science and technology. The employed persons have been classified according to the sector of employment i.e. public sector, private sector or self-employment. Persons in each of these sectors, have been further classified according to their nature of employment, that is, whether engaged in teaching, whether employed in industry or outside industry. Whether the employment is with research assignment or without research assignment has also been indicated.

Table No. 6 presents the monthly incomes of employed persons. Here again, the employed persons in public and private sectors and self-employed persons are shown separately. The technicians in each of the sectors of employment have been classified according to their monthly incomes.

Table No. 7 deals with the tenure and sector of employment. The employed persons have been classified according to their tenure of employment, as permanent, temporary, on contract, research scholar etc. Figures for the three sectors of employment are furnished separately.

Table No. 8 deals only with the unemployed persons. It cross-classifies the age of the unemployed persons with the periods of unemployment. Here again, figures are given separately for persons qualified in the various branches of science and technology.

TABLE C-IV
Single Year Age Returns

TABLE C-IV

Fly Leaf

This deals with the single year age return. It recalls Union Tables C V of 1951 Census. The tabulation by single year age return was done in 1951 for the first time, but it was on a sample basis of 10%. The Table presented in this volume

is based on a full-count. No single year age return was tabulated before 1951. This table is important for demographic analysis, projection of demographic trends, compilation of life tables and mortality rates.

TABLE C-V

Mother-tongue

TABLE C-V

Fly Leaf

This presents the number of speakers of each language with sex breakup. It gives the strength of various linguistic groups in each district separately for rural and urban areas. The languages returned are shown in alphabetical order. In the earlier Censuses, the data on language or mother-tongue were presented on territorial basis. Till 1941 the following broad classifications were adopted :

1. Languages of Madras Presidency
2. Other Indian languages
3. Non-Indian Asiatic languages
4. Non-Asiatic languages

In some Censuses, European languages were shown separately. In 1951 this scheme was replaced by a three-fold classification :

1. Languages of the Indian Sub-continent
2. Languages of other Asian countries
3. Languages of continents other than Asia

When an enumerator could not make out the language spoken by any Tribe, it was grouped under the classification 'Tribal languages'. A more scientific attempt has been made to classify the languages in 1961 Census.

TABLE C-V

Fly Leaf

Note 1.

(i) The following mother-tongues arranged in alphabetical order in Col. 1 of the table given below as per Table C-V have been classified in the Linguistic Survey of India. The Linguistic Survey of India Classification No. is mentioned against each mother-tongue in Col. 3.

(ii) If in Col. 3 no Classification No. is given against any mother-tongue of Col. 1 then it would mean that the name refers to either old or middle Indo-Aryan language or a language group or branch or family name from the Linguistic Survey of India.

(iii) Wherever a tongue is mentioned in Col. 3 it is to be understood that the mother-tongue is either a dialect or

another name or form of the tongue mentioned against it in Col. 1 which in its turn has been classified by the Linguistic Survey of India in the appropriate place for that tongue.

(iv) If in Col. 1, there is a tongue which bears no classification number in the Linguistic Survey of India then in Col. 2 the name of the classified language or group will be given of which the mother-tongue of col. 1 is either a dialect or another name or form. In such a case the number of classified language of Col. 2 has been given in Col. 3.

(v) In Col. 2 standardized spellings according to Linguistic Survey of India has been given against each mother-tongue of Col. 1.

Alphabetical order of mother-tongues classified by the Linguistic Survey of India	Classified name in the Linguistic Survey of India	Classification No. in the Linguistic Survey of India

TABLE C-V

Fly Leaf

Note: 3.

Mother-tongues outside the Indian Sub-continent which have been printed in italics in the Table have been arranged

by the Linguist according to (a) mother-tongues of other Asian countries and (b) mother-tongues of each of the other continents in the following manner :

1	2
Other Asian countries :	<i>Afghani/Kabuli/Pakhto/Pashto/Pathani, Annamese/Annamite, Arabic/Arbi, Balinese, Burmese, Cambodian, Ceylonese/Simelu/Singhalese, Chinese/Chini, Hanoi, Hebrew/Jewish, Indonesian/Irani/Iranian, Iraqui, Japanese, Javanese/Java, Mahl/Maldivian, Malai/Malay/Malaya/Malayan, Persian, Siamese/Thai, Turkish/Turkistani, Vietnamese.</i>
Africa.	<i>African, Congolese, Ethiopian, Ghanese, Sudanese, Uganda.</i>
Oceania	<i>Hawaii</i>
Europe	<i>Austrian, Basque, Belgian, Celtic, Czech/Czechoslovakian, Danish, Dutch, English, European, Flemish, French, Gaelic German, Greek, Hungarian, Irish, Italian, Latin, Maltese, Norwegian, Polish, Portuguese, Roumanian, Russian, Scottish, Slovene, Spanish, Swedish, Swiss, Welsh, Yugoslavian.</i>

TABLE C-V

Fly Leaf

Note: 4.

The following mother-tongues which appear in the table have been found unclassifiable by the Linguist for want of any dependable information on them so far:—

Bithalanean, Kuruvikkaran, Roman, Satrali Sigitvia, Sikkari, Vaipaki.

TABLE C-V

Fly Leaf

Note: 5.

Column 2 shows variant spellings or forms of mother-

tongue returns which are rationalized to the names given against them in Column 1.

Column—1.	Column—2.
Rationalized forms of names of mother-tongues as listed in Table C-V.	Variant forms of the names of mother-tongues recorded during enumeration and for transcription
Badaga	Badagu, Badugu
Balabandhu	Balband
Bondili	Bondali, Bondli
Chettibhasha-Kannada	Chetti Bhashai
Coorgi/Kodagu	Coorg
Devanagari	Devanageri, Devanagiri
Dogri	Dogiri, Dogra, Tokkaru
Garhwali	Guruwali, Guruvali
Gorkhali	Gurugali, Goorka
Gujarati	Gujarathi
Gurmukhi	Gurutukhi, Dunmugi
Hindustani	Hindusthani
Irula/Iruliga	Irular Mozhi
Kachchhi	Cutch
Kannada	Kannadam
Kashmiri	Kashmir
Khattri-Saurashtra	Kathiri
Konkani	Kongani, Kongini
Korava	Kura Bhashai, Kura Bhashai, Kurava, Kuravar Mozhi.
Korchi	Kourch
Kota	Kotta
Kshatri	Kshatriya, Kshtriya, Boushada Kshatriya

Column—1.	Column—2.
Rationalized forms of names of mother-tongues as listed in Table C-V.	Variant forms of the names of mother-tongues recorded during enumeration and for transcription.
Kuruba/Kurumba	Kurubar, Kurumar, Korambar
Lushai/Mizo	Lusha
Mahajani-Rajasthani	Majani
Maithili	Maithli, Maithyli
Montadenchetty	Mountain
Nagari/Marathi	Magiri
Naiki-Kuruba/Kurumba	Naicka
Nawait	Navath
Oriya	Odiya
Ottanmoli	Ottan's Language
Pahari-unspecified	Padi, Pakadi
Pania	Paniya
Prakrit	Pragrutham
Rajasthani	Rajastani
Santali	Sandal
Saurashtra	Saurashtra, Sourashtra, Sowashtra
Sikhi	Sikh
Tibetan	Tibetan
Udaiyarmoli	Udaiyarmozi, Udaiyarmozhi
Urali	Oorazhi
Urdu	Urudu
Vadaga	Vadagu, Vadugu, Vaduva
Valluvamoli	Valluva Mozhi
Yerukala/Yerukula	Yerukla, Yarukula, Yerkula.

C. V Table (Appendix)

Abstract of Classified and Unclassified languages.

		Mother Tongues of the Indian Sub-continent.										Mother-tongues out side Indian Sub-continent			
Total number of mother-tongues.	No. of Tongues	Classified by Linguistic Survey of India.		Unclassified by (bearing*)		Unclassified by Linguistic Survey of India but tentatively Classified by Linguist (bearing* and †)		Unclassified by Linguistic Survey of India but reclassified by Linguist (bearing †)		No. of Tongues		No. of Tongues			
		M	F	M	F	M	F	M	F	M	F	M	F

TABLE C- VI

Bilingualism

TABLE C-VI

Fly Leaf

This furnishes the details of bilingualism or the subsidiary languages known to each of the linguistic groups. Though details of two languages other than the mother-tongue were collected in the individual slip, the table has been prepared classifying the first subsidiary language returned. It gives the strength of each linguistic group, the number of people who know any subsidiary language and the name of the subsidiary language known. This corresponds to the Union Table D-1 (Part II) of 1951 Census. The improvement effected over that Table is that the sex break-up of the people speaking subsidiary

languages has been furnished now. The data on bilingualism were first presented in 1951 though they were collected from 1931 onwards. In 1931 and 1941 the question on bilingualism was limited in scope because only such of those languages which were in common use were noted and such languages were limited to other Indian languages. In 1951, though the restriction of common usage was abandoned, the enquiry was limited to other Indian languages, but in this Census, the scope of the questionnaire has been widened and the subsidiary languages presented include non-Indian languages also.

TABLE C-VI BILINGUALISM

State and District	Total Speakers		Mother-tongue and total persons returned as speaking a language subsidiary to the mother-tongue		Subsidiary language

- Note :**
- [i] Mother-tongues printed in italics belong to countries outside the Indian Sub-continent.
 - [ii] Names occurring after hyphen (—) have been introduced by the Linguist to indicate groupings.
 - [iii] Asterisk (*) means that the mother-tongue is unclassified in Linguistic Survey of India.
 - [iv] Dagger (+) denotes that the mother-tongue though classified in Linguistic Survey of India is either tentatively reclassified or considered unclassifiable by the Linguist.
 - [v] Asterisk and dagger (* +) denotes that the mother-tongue is unclassified by Grierson but is tentatively classified by the Linguist.

TABLE C - VII

Religion

TABLE C-VII

Fly Leaf

This presents the principal religions by locality and sex break-up. This corresponds to Table D-II of the 1951 Census in all details. Prior to 1951, the population was classified according to religion down to the village level and other characteristics like marital status and education were also classified on the basis of religion. Thus religion was the unit of tabulation till 1931. In 1951 livelihood classes and in 1961 the industrial categories of workers have been adopted as units of tabulation. Prior to 1931, other ethnographical details, the sect

of religion, the race and caste particulars were collected during enumeration and Tables on religion presented the sect and caste particulars under each religion. Later, the questions on sect of religion, race and caste were dropped. From 1951 onwards only the main religion is presented in the Tables. Like in 1951 the present Table provides two residuary columns for indefinite beliefs and religion not stated. There is another improvement over 1951, in that the figures have been presented for rural and urban areas of each district separately.

TABLE C-VIII Parts A & B
Scheduled Castes and Scheduled Tribes

TABLE C-VIII

Fly Leaf

This Table has two parts—Part A dealing with Scheduled Castes and Part B dealing with Scheduled Tribes. These Tables give the distribution according to the industrial categories of workers and non-workers. These tables, however, present only the total population of all Scheduled Castes in Part A and that of the Scheduled Tribes in Part B. Special Tables on each Scheduled Caste and Tribe will be presented in Part V of our publications and will give detailed particulars on each caste or

tribe. Thus this Table only presents an abstract of the data presented in Part V. Though in earlier Censuses, Tables were presented for important communities and other special groups, in this Census, only Scheduled Castes and Scheduled Tribes have been classified and all other groups excluded. In this Table, various categories of workers and non-workers have been classified either as literates or illiterates without adopting the detailed educational standards used in Table C-III.
