BY

J. R. HENDERSON, C.I.E., M.B., C.M. (EDIN.) Formerly Superintendent, Madras Government Museum.

MADRAS:

PRINTED BY THE SUPERINTENDENT, GOVERNMENT PRESS.

THIS account of the coins of Haidar Alī and Tīpū Sultān is largely based on the collection of the Madras Government Museum, which, so far at least as the copper issues are concerned, is probably one of the most complete in existence. I have, however, also taken other sources into account, such as the works of previous writers, the large collections of the British Museum, London, and the Mysore Government Museum at Bangalore, as well as private collections. I regret that the notes which I took on the occasion of my visits to the two institutions just referred to are not as complete as I could have wished, and I have not been able to revisit these collections in recent years. The letter M following the number of a coin indicates that it is represented in the collection of the Madras Museum.

In cataloguing the somewhat complicated issues of Tīpū Sultān, I am convinced that, if confusion is to be avoided, the only safe course is to arrange the coins according to mints. In leaving the size of the coins to be inferred from the plates, and making comparatively little reference to their weight, I have perhaps laid myself open to adverse criticism; but as most of the coins were roughly struck there are frequent variations in their size, and to some extent also in their weight. I have tried to indicate the chief variations in weight, without giving unnecessary details in regard to individual specimens.

In an attempt to indicate the relative scarcity or abundance of the different coins, I have perhaps ventured on an innovation in works of this kind. I have, however, attempted to do so on account of exceptional opportunities for forming such an opinion; during a period of over quarter of a century many thousands of these coins, collected from all parts of Southern India, have passed through my hands.

All the coins entered in the catalogue without the name of an authority have been seen by myself, while some of those which are followed by the name of the writer who first recorded the coin, have not come under my personal examination. A good many are recorded for the first time, but it has not been thought necessary to particularize these.

In drawing up the short historical notes which accompany the catalogue, I have been struck by the fact that no adequate account of the lives of Haidar Alī and Tīpū Sultān has yet appeared. There must be unworked sources of information still available in Mysore, and I would express the hope that worthy biographies of these two remarkable men, written by one or more of their own countrymen, may yet appear.

In conclusion, while acknowledging my indebtedness to the various writers who have preceded me, I would specially mention the help I have received from the writings of Major R. P. Jackson and the Rev. Dr. G. P. Taylor, two of the latest authorities on the subject. Major Jackson's ist, based on his own collection, is the largest hitherto published, while the late Dr. Taylor, who applied his great knowledge of Indian Muhammadan coins to those of Tīpū Sultān, has furnished details in regard to the inscriptions and other matters on which I have freely drawn.

My thanks are due to Mr. G. F. Hill, Keeper of the Department of Coins and Medals, British Museum, and to Mr. J. Allan of the same Department, for assistance kindly rendered in connexion with the preparation of the plates, which have been printed at the University Press, Oxford.

Madras, March, 1919.

J. R. HENDERSON.

THE COINS OF HAIDAR ALI AND TIPU SULTAN.

INTRODUCTION.

Many features of interest are presented by the coins of the two Muhammadan sovereigns who controlled the destinies of Mysore for the brief period of thirty-eight years,-Haidar Alī, the illiterate warrior, able in troublous and therefore propitious times to establish a kingdom by his forceful personality and military genius, and Tīpū Sultan, the son, who was unable to retain that kingdom. They are memorials of two remarkable men with whom Britain was frequently at war, issued at a time when the question of European supremacy in India was still in process of determination. But in addition to their historical associations and the light which they throw on the policy and even on the personal characteristics of the two rulers. there are other features which render the coins specially attractive to collectors. Many of them are still met with in considerable numbers, not only in the bazaars of nearly every Mysore village, but also over a considerable part of Southern India, while others again are of extreme rarity. The well-executed figure of an elephant, introduced by Haidar on some of the copper coins issued towards the close of his reign, and continued by Tipū on all those struck in the same metal, forms a distinctive feature; many of the gold and silver pieces afford indisputable testimony to the decorative value of the Arabic script, and it may be doubted if any coin more attractive in this respect than Tīpū's double-rupee has ever been struck in India. For all these reasons it is not surprising that an extensive literature has sprung up on the subject, and no series of coins issued in South India and few in other parts of the country have been more often described or referred to.

The Mysore table-land during the first half of the eighteenth century consisted of several petty States ruled by more or less independent Poligars or Nāyaks, in addition to the larger and more important State of Mysore, then as now under the control of a Hindu Rājā. To the north the chief powers were the Marāthās, a powerful Hindu confederation occupying what is now the southern part of the Bombay Presidency, with their capital at Poona, and the important Muhammadan State of Hyderabad, ruled by the Nizams who controlled the greater part of Southern India and had practically set themselves free from Mughal sovereignty. The chief ruler in the south was the Nawāb of Arcot, who while nominally owing allegiance to the Nizām held sway over a considerable part of Southern India, including the district around Madras. Several Muhammadan chiefs, in what are now known as the Ceded Districts, viz., the Nawabs of Cuddapah, Kurnool, etc., and Morāri Rāo, the Marāthā ruler of Gooty, were also at this time feudatories of the Nizām's. Towards the middle of the eighteenth century, Mysore was subjected to constant invasions by the Marāthās, or by the Hyderabad forces, and sometimes by the two in conjunction.

Haidar Alī was born near Kolār in 1722, the son of a petty official of the Mysore State. After serving temporarily with the Nawāb of Arcot he took military service under Nanja Rāj, a minister of Mysore, who practically ruled the State although there

was still a nominal Rājā; he gradually rose in favour and after achieving some distinction in campaigns during 1749 and 1751 was appointed military governor of Dindigul in 1755, the first important stage in his career. Promoted to the chief command against the Marāthās in 1759, who before long withdrew from Mysore territory. Haidar rose still further in authority and was enabled to supplant Nanja Rāj who had been virtual ruler for twenty years. Further trouble with the Marathas arose two years later, but this was successfully overcome and he took possession of several small States, including Chitaldrug, which adjoined Mysore, a period of annexation which in 1763 culminated in the capture of the important State of Bednur, and this Haidar always regarded as having laid the foundation of his rise to greater power. The town of Bednur, or Nagar as he termed it, became his capital and here for the first time he assumed the sovereign right of striking coins. He now succeeded in making terms with the Nizām, but was unable to appease the Marāthās, who only concluded peace when all the places previously taken from them had been restored and a large indemnity paid. In 1766 Malabar was taken by conquest and the Rājās of Cochin and Palghat capitulated. In the same year Chikka Krishna Rājā, the nominal ruler of Mysore, died, and although his son succeeded him, Haidar assumed entire control of the State.

In 1767 the Marāthās again invaded Mysore, and in the same year the British in alliance with the Nizam's forces took the field in what is known as the First Mysore War. During this campaign, in which Haidar showed great military ability, he was able in April 1769 to dictate terms to the British, practically at the very gates of Madras. Further trouble arose with the Marathas in 1772, with disastrous results, and once more he was forced to conclude a treaty restoring territory and to pay a large monetary compensation. About this time the nominal Rājā of Mysore was strangled, and as his brother who succeeded him died soon after without an heir, a child was selected by Haidar as a representative, at any rate in name, of the ruling family. In 1773 Coorg was captured, a mountainous province adjoining Malabar, and the latter district which had broken out into revolt was soon after forced to submit. Three years later several of the smaller States bordering on Mysore, including Bellary and Gooty were recaptured, and owing to the defeat of the combined armies of the Marāthās and the Nizām, with whom he was once more at war, he was able to take possession of all the Maratha territory south of the River Kistna and also of the Cuddapah district.

The year 1780 saw the commencement of the Second Mysore War, in which Haidar Alī with promised assistance from his former foes, the Marāthās and the Nizām, which, however, never matured, and the active co-operation of the French then at war with England, formed a very powerful combination against the British forces in India. In that year he advanced with a large army towards the east coast and actually arrived within a few miles of Madras, but after some initial success he was eventually defeated by Sir Eyre Coote at Porto Novo in July 1781, and later at Arni. Haidar died in camp near Chittoor in the North Arcot district, while his army was returning to Mysore, on 7th December 1782, or the first day of the *Hijri* year 1197. His body was taken to Seringapatam and buried there in state.

Haidar Alī owed his success to great natural ability, and more particularly to ability in war which often reached the heights of genius. He was wholly illiterate and unable either to read or to write, his signature never getting beyond the stage of the initial letter of his name, which is so familiar on his own gold coins and on the gold and silver coins of his son. He is said to have treated his subjects fairly, to have administered justice impartially and to have encouraged the arts of peace; but on the other hand he was frequently guilty of the grossest cruelty. Bowring (Haidar Ali and Tipu Sultan, Rulers of India, p. 113) thus refers to him:-"Whatever defects may be justly attributed to Haidar as a ruler, or in his private life, he was a bold, an original, and an enterprising commander, skilful in tactics and fertile in resources, full of energy, and never desponding in defeat. Notwithstanding the severity of his internal rule, and the terror which he inspired, his name is always mentioned in Mysore with respect, if not with While the cruelties which he sometimes practised are forgotten, his prowess and success have an abiding place in the memory of the people."

Tīpū Sultān who was born at Devanhalli, Mysore State, in 1753, commenced his reign while engaged in war with the British and it may be added terminated it in like manner seventeen The Second Mysore War ended early in 1784, one of years later. the contributing causes being the conclusion of peace between France and England in the previous year; the peace conditions with Tīpū included the restitution of prisoners on both sides and the restoration of all conquered territory. In 1783 Bednur or Nagar, which had been taken by General Matthews in January, was recaptured by Tīpū three months later, and he was enthroned here with great ceremony on the 4th of May, a day recorded on many of his gold and silver coins, and by a strange coincidence also the anniversary of his death. About this time great cruelties were perpetrated by Tipū on the west coast and in Coorg, where large numbers of Hindus and Christians were forcibly converted to Islam. Throughout his reign he showed intense zeal in the propagation of his religion, coupled with a great deal of narrowminded bigotry, in these respects reversing the general policy of his father who always exhibited toleration in religious matters.

In 1786 the combined forces of the Marāthās and the Nizām declared war, and peace was only concluded in the following year on Tīpū restoring a number of forts which he had previously captured and paying a considerable indemnity. On his return to Seringapatam which was now the capital, he gave orders for the demolition of the old town of Mysore, in order to destroy the chief evidence of the deposed Hindu Rājās, and the new fort Nazarbār was erected in its immediate vicinity. In 1788 he visited Calicut, and for reasons similar to those which actuated him in the destruction of Mysore, arranged for the demolition of the capital of Malabar and the transfer of his government from Calicut to Feroke. During this period, while his power was at its zenith, he assumed the title of Bādshāh or King and dispatched ambassadors to Constantinople and Paris, chiefly with the object of securing co-operation against the English, but without success. The State of Travancore, on the southern part of the Malabar Coast, which had never been conquered by Haidar Alī, was

invaded by Tīpū at the end of 1789, and as the Rājā of the State was an ally of the British, war once more became inevitable.

In the Third Mysore War, which commenced in 1790, united action was taken against Tīpū by the British, the Marāthās and the Nizām. The British army under Lord Cornwallis took Bangalore in March 1791 and the capital Seringapatam in February 1792. By the treaty, which Tīpū was forced to conclude, Malabar, Coorg, Dindigul and part of the Carnatic, were ceded to England, the Marāthās received the territory between the river Kistna and its southern tributary the Tungabhadra, while the Nizām had certain former possessions restored, including the Cuddapah district; in addition a very heavy indemnity was levied.

During the remaining years of his reign Tīpū did everything in his power to bring about the overthrow of the British power in India, and once more made an unsuccessful attempt to obtain the assistance of the French, sending for this purpose a special embassy to Mauritius. This and other trouble led to the Fourth and last Mysore War, in which, after a short campaign, Seringapatam fell to the assault of the British army under General Harris on 4th May 1799, and Tīpū Sultān was amongst the slain. After Tīpū's death portions of his dominions were divided among the allies, and the Hindu Rāj of Mysore was restored in the person

of Krishna Rājā Wodeyar, then a child of six years.

It is difficult to form an accurate estimate of the character of Tīpū Sultān, because the views of contemporary writers, whether English or Muhammadan, are obviously biassed. His cruelty and religious bigotry are undoubted, and he perpetrated many atrocities in the name of religion; he has been justly censured for his excesses in war, though they perhaps never exceeded a standard set elsewhere in more modern times. That he was a brave man cannot be doubted, and while on several occasions he showed considerable military ability, he fell far short of his father in this respect. Unlike Haidar he was a man of education and the changes which he introduced into the calendar, the names of his forts, of civil and military offices, and of weights and measures, certainly display a considerable amount of ingenuity, though by more than one writer they have been held to afford evidence of his insanity. Nowhere else is Tīpū's love of innovation better seen than in his coinage. It has been left to an English writer of fiction to give, in the words of one of his characters, the most favourable account of Tīpū Sultān that I have been able to discover, and while no doubt reproducing contemporary Muhammadan opinion, it is perhaps nearer the truth than are some of the accounts which have been written in an entirely opposite direction. This imperfect notice may fittingly conclude with the extract in question :-

"He was a great man—such an one as Hind will never see again. He had great ambition, wonderful ability, perseverance, and the art of leading men's hearts more than they were aware of, or cared to acknowledge; he had patient application, and nothing was done without his sanction, even to the meanest affairs, and the business of his dominions was vast. You will allow he was brave, and died like a soldier. He was kind and considerate to his servants, and a steady friend to those he loved. Mashalla! he was a great man."—Meadows Taylor, Tippoo Sultaun, p. 450.

COINS OF HAIDAR ALI.

It was not till after the capture of Nagar or Bednür, in 1763, that Haidar felt himself sufficiently established in the government of Mysore to undertake the sovereign right of coinage. He did so, however, with extreme caution, for none of his coins exhibits more than the initial letter of his name, and in associating it with Hindu deities he showed remarkable toleration on the part of a Muhammadan; but no doubt he felt it necessary to avoid giving offence to the Hindu population of Mysore which far exceeded his co-reiigionists in number.

His earliest coin, the so-called Bahādurī pagoda, which judging from its comparative abundance at the present day must have had an extensive circulation, was copied from the pagoda struck in the sixteenth century by Sadāsiva Nāyak, the first Rājā of Ikkeri or Bednūr, who in turn imitated the pagoda of Sadāsivarāva of Vijayanagara (*Cf.* Hultzsch, *Ind. Antiq.*, vol. XX, p. 307, 1891). The rare half-pagoda (No. 6 of the catalogue), referred to briefly by Marsden and so far as I know not chronicled since, in place of Siva and Parvatī has a seated figure of Vishnu, and was no doubt copied from the 'Durga' pagoda, coined according to Elliot by the Bedar Poligar of Chitaldrug, which again followed a Vijayanagara model in the gold coins of Krishnaraya. The "new Muhammad Shāhi" pageda struck at Gooty (No. 3), was simply a copy of an earlier Mughal pagoda of the same mint which was first coined during the reign of Muhammad Shah, and was reissued later by Morāri Rāo, the Marāthā chief who occupied Gooty before Haidar. Similar Mughal pagodas were issued at Imtivazgarh (Adoni in the Bellary district), Tadpatri (Anantapur district) and Ganjikotah (Gandikota in the Cuddapah district), originally in the reign of Farrukh-Siyar. The second of the Gooty pagodas (No. 4) is dated 1198, and was, therefore, struck in the second year of the reign of Tipū Sultān, who was in all probability unaware of its existence. I have, for convenience, placed it beside the other Gooty pagoda, although it cannot be regarded as a coin of Haidar Alī.

Two types of gold fanam are met with, the first resembling the Bahādurī pagoda and half-pagoda, the second dated. Among the latter is a coin struck at Calicut dated II66 (I752-53 A.D.), an impossible date for this town which did not fall into Haidar's hands till I766; the date is obviously blundered and it is possible that this fanam was really issued by Tīpū Sultān. Tufnell and other writers have referred to coins weighing three grains or even less, which they regard as half-fanams, but I am inclined to think that these, and similar coins of Tīpū, are really small-sized fanams, with the same amount of gold as the ordinary fanams which owe their larger size to a greater amount of alloy.

The copper paisas with elephant obverse, struck at Seringapatam in the last two years of Haidar's reign, are of considerable interest, as they form the model on which the extensive series of copper coins issued by his son was based.

Under the heading "Doubtful copper coins of Haidar Alī" are included three distinct series, all worthy of special mention. The first consists of three roughly executed and undated paisas, two of which were struck at Bellary and the third at Seringapatam; they may possibly have been issued by Tīpū, although their extreme roughness seems to indicate otherwise. Attention may be drawn to the two ways in which the word Bellary is spelt, and it may be stated that no other coins of this mint are known. coins with Kanarese numerals are evidently a reissue of the similar coins struck by one of the Mysore Rajas before the Muhammadan usurpation, which from their great abundance at the present day had evidently a very extensive circulation. original coins, which are of two sizes, weighing approximately 46 grains and 23 grains, bear on the obverse Kanarese numerals from I to 33 according to Major Jackson, though personally I have not met with a number higher than 32. The significance of these numerals is unknown, but the opinion has been expressed that they may indicate the years of a reign, and but for the awkward exception just referred to I would have felt inclined to attribute them to Chikka Deva (1672-1704), or to Krishna Rājā Wodeyar (1734-1766). The coins, now catalogued for the first time, bear in addition to the Kanarese numerals, which possibly indicate regnal years, the Arabic numeral repeated, which is perhaps an indication of value. On the chequered reverse Haidar's initial T is found, a fact which does not enable us to assign the coins definitely either to the father or the son, but inasmuch as Tipū had a very extensive copper coinage of his own, it seems more likely that these insignificant pieces were issued by his father, to whose general policy of copying earlier types they also conform. We finally come to the "tiger and battle-axe" coins which were first attributed to Mysore by Moor, and were considered by Marsden to be possibly pattern pieces of Tipu Sultan that never came into general use. I have catalogued them as issues of Haidar, but there is perhaps just as great probability that they originated with Tipu, to whose half-paisas, and quarterpaisas they on the whole conform both in weight and size*; their border also is identical with that of many of Tīpū's copper coins. I have never met with a specimen in Mysore, and most of those now found come from Malabar, leading to the suspicion that they may have formed a temporary issue for Calicut.

As already indicated the Bahādurī pagoda is still a common coin, while the corresponding half-pagoda is rare, as are also the Gooty pagodas. The half-pagoda with a seated figure of Vishnu is also a rare coin, and I only know of two other specimens than that referred to by Marsden; there was probably a pagoda of similar type, though no examples are known to numismatists. The Bahādurī fanams are not rare, but the other gold fanams are seldom met with. Of the two dated paisas, the one issued in 1105 is not uncommon, while the later one is very rare. The thick coarse paisa struck at Seringapatam is not rare, nor is the Bellary paisa

^{*}The smallest "lion and battle-axe" coin is only about half the weight of Tipu's eighth of a paisa, and it was possibly intended to represent a sixteenth of a paisa.

with the elephant to right, but the one with the elephant to left is distinctly rare. None of the small copper coins with Kanarese numerals and Haidar's initial is commonly met with, and clear examples showing more than a small part of the die are rare. The "tiger and battle-axe" coins are all rare and particularly those of the smallest size.

COINS OF TĪPŪ SULTĀN.

The coins of Tīpū Sultān exist in far greater variety and number than those of his father. They were issued in gold, silver and copper, from no fewer than twelve different mints, and some of them at least appeared in every one of the seventeen years of his reign. But few mint-names occur on Haidar's coins and as far as is known his issues were confined to gold and copper.

THE MINTS.

In the detailed catalogue Tīpū's mints are arranged in the following order:—

(I) Pattan (Seringapatam).

(2) Nagar.

(3) Faiz Hisār (Gooty).(4) Bengalūr (Bangalore).

(5) Farrukh-yāb Hisār (Chitaldrūg).

(6) Kalīkūt (Calicut).(7) Farrukhī (Feroke).

(8) Salāmābād (Satyamangalam). (9) Khāliqābād (Dindigul).

(IO) Zafarābād (Gurramkonda). (II) Khwurshed-sawād (Dhārwār).

(12) Nazarbār (Mysore).

It will be seen from this list that most of the mint-towns, which were selected on account of their military or political importance, bear fanciful names specially invented for them by Tīpū, and that only Nagar, Bangalore, Calicut and Feroke, are recognizable on the coins. One of the mints appears under two designations, viz., its own proper name Dhārwār and the fanciful one Khwurshedsawād.

Moor (Narrative of the Operations of Little's Detachment, p. 476, pl. II, fig. 6) describes and figures a paisa dated 1217, on which the mint-town is read Benazīr, ين 'the incomparable', a name given by Tīpū to Hole Honnūr in the Shimoga district of Mysore. This coin has not been rediscovered, and as there is some doubt whether the figure was actually taken from a coin I have omitted the mint from the catalogue. The section of Moor's work dealing with coins was prepared in a hurry and contains not a few inaccuracies, hence in the absence of further evidence the above course is probably the best one to a dopt.

In the first year of his reign Tīpū issued but few coins and these only from the Seringapatam and Nagar mints. In the fifth regnal year the number of mints was increased to eight, and in the following year when Tīpū may be said to have been at the summit of his power, the only mint not in operation was Calicut which had been destroyed in the previous year and its place taken by Feroke. During the seventh and eighth years a considerable number of

mints still issued coins, but in the ninth year there is a sudden falling off, as a result of the military difficulties in which Tīpū found himself before the decisive siege of Bangalore in 1792. By the treaty which followed the capture of that city Tīpū lost the half of his dominions, and from this time onwards Calicut, Feroke, Dindigul, Gurramkonda and Dhārwār ceased to be in his possession. From the tenth year to the end of the reign coins were only issued from the Seringapatam, Nagar and Gooty mints, and from the last of these only in copper. In the seventeenth or last year of the reign which commenced less than a month before the death of Tīpū, so far as is known only two varieties of copper coin were struck, both at the Nagar mint. With but few exceptions and these confined to gold and silver issues, the name of the mint regularly occurs on the coins of Tīpū Sultān.

Following the example of Haidar Alī, Tīpū has not recorded his own name on any of his coins, though the initial letter of his father's name τ is frequently met with on the gold and silver issues. It is equally noteworthy that the name of the ruling Mughal Emperor, Shāh Ālam II, to whom Tīpū at least nominally owed allegiance, is conspicuous by its absence, and it is said that an offering of the coins which he injudiciously or insolently made evoked great resentment from the Emperor on account of this omission.

THE DATES ON THE COINS.

The coins issued during the first four years of Tīpū's reign bear the Hijri date, the numerals as usual reading from left to right, while those from the fifth year to the end of the reign are dated in accordance with Tīpū's special Maulūdi era, and the figures read from right to left. The coins of the fourth year are dated IT. (1200 A.H.), while those of the fifth year bear the date of the (1215 A.M.), and it appears probable that the commencement of a new century influenced Tīpū in making the change at this time. The *Hijri* years are lunar years of twelve lunar months each, while those of the Maulūdi system, which as the name indicates dates from the birth and not from the flight of the Prophet, are luni-solar years of twelve lunar months, with an intercalated or adhika month added at certain intervals. Tīpū in founding his new calendar, as was pointed out by Kirkpatrick in 1811, simply adopted the Hindu calendar in common use in Mysore, which had a cycle of sixty years, and substituted Arabic names for the Hindu ones assigned to the cyclic years and months.

The following extract is taken from an article on the subject by the present writer [Journ., As. Soc., Bengal (New Series), Vol. X, 1914]:—"Several writers puzzled by the difference of fourteen years between the two systems at the time the new one was introduced, have supposed that the term Maulūdī was used in a figurative sense, and that the era originated in the commencement of Muhammad's mission, or had reference to the time when he first announced himself as the Messenger of God. The true explanation was, however, furnished by Marsden (Numismata Orientalia, Part II, p. 701, 1825) who pointed out, that if the year of the Prophet's birth

in the Christian reckoning be subtracted from the Christian year in which the innovation was introduced, the result is 1215. For this purpose Marsden takes the date of Muhammad's birth as 571 A.D., and the first year of the new era as 1786 A.D. (1786 - 571 = 1215); but as we shall see, Tīpū Sultān, for some unexplained reason, appears to have assumed that Muhammad was born in 572 A.D., as the first year of the new era certainly commenced in 1787 A.D.

The correct formula is, therefore, 1787 - 572 = 1215.

All writers on the subject since the time of Marsden have, so far as I know, without a single exception, assumed, not unnaturally, that because the fourth regnal year terminated in 1786 A.D., the year 1215 A.M., also commenced in the same year, but this, as I shall proceed to show, is an error and the year 1215 really commenced in 1787. In certain of Tīpū's letters referred to in Kirkpatrick's Select Letters of Tippoo Sultan (1811), Beatson's View of the Origin and Conduct of the War with Tippoo Sultan (1800), and Wood's Review of the War in Mysore (1800), the complete Mauludi date, and the corresponding Hijri one, were both noted at the time the letter was written. At my instance these dates have been examined by the Hon'ble Diwan Bahadur L. D. Swamikannu Pillai, M.A., LL.B., author of Indian Chronology (Madras, 1911), and a well-known authority on the subject. He reports that they completely establish the facts that the months of Tīpū's new system were Indian lunar months, that the days of the month were simply tithis continuously numbered from one to thirty, the fortnights being omitted, and further that Tipu's extra months were without a single exception the Indian adhika months. Mr. Swamikannu Pillai finds that the Maulūdī year began regularly at the same time as the Indian luni-solar year, i.e., on Chaitra śukla pratipadā, or the first tithi of the bright fortnight of Chaitra, and that the serial numbers of Tīpū's cyclic years, recorded on many of his gold and silver coins, are exactly the same as those of the South Indian cyclic years."

Although an examination of the dates on these letters shows clearly that the Mauludi year 1215 corresponds to 1787-88, yet Marsden, who has been followed by all later writers, makes it commence in 1786, and similarly antedates by one year all the other regnal years of Tipū Sultān, with but one exception. exception is the last year of the reign 1227, and concerning the Nagar paisa bearing this date he writes (op. cit. p. 724):- "This is probably the latest specimen of his coinage that has been preserved and must have been struck within about a month of his death; the year 1227 of his era having begun on the 6th of April 1799, and the storming of Seringapatam, on which occasion he fell, having happened on the 4th of May of that year, being the anniversary of his accession." So firmly, however, had the mistaken dates become established, that the late Major Tufnell, in his Catalogue of Mysore Coins in the Collection of the Government Museum, Bangalore (1889), attempts to show that Marsden is wrong and that

the year 1227 corresponds to 1798.

While the fifth regnal year 1215 A.M. commenced on 20th March 1787, the first day of the Indian luni-solar year which was numbered 41 both in the Indian and in Tipu's calendar, the fourth regnal year 1200 A.H. terminated on 23rd October 1786. On making the

change Tīpū was, therefore, forced to allow a period of nearly five months to elapse between the end of the last *Hijri* year and the beginning of the first *Maulūdi* one. If coins were struck during this transitional period they may have been dated 1215 in anticipation of the new era, or it is possible that the coins of 1201 from the Seringapatam, Nagar and Chitaldrūg mints were issued at this time. It is, however, just as likely that the latter coins were dated in error, the die-engraver being unaware of the introduction of the new era. On page 28 will be found a table showing the date according to the Christian reckoning of the commencement of each year of Tīpū Sultān's reign.

As the result no doubt of unfamiliarity with the Arabic numerals on the part of South Indian die-engravers, numerous errors occur in the dates of the coins, more particularly of the copper ones. On the coins of 1215 A.M., the date was intended to be written of the coins of 1215 A.M., the date was intended to be written of the but in a good many cases it is for a sin the older arrangement, and some instances occur of a similar mistake in 1216 and later years. In a few coins the date recorded is a mixture of the two arrangements, e.g., for for off (vide No. 292), while errors due to one or more numerals being reversed are not uncommon, such as for one of the form left to right in error (No. 118), and with for more fill (No. 332).

THE NAMES OF THE CYCLIC YEARS.

In arriving at the names of the cyclic years which are found on certain of his gold and silver coins, * Tīpū resorted to two systems in which a certain numerical value is assigned to the letters of the Arabic alphabet. The older of these systems, in use long before Tīpū's time, termed the abjad, Asyl a combination of the letters contained twenty-two different numbers, nine units, nine برج ب tens and the first four hundreds, which were consecutively denoted by the twenty-two Arabic letters that correspond to those of the Hebrew alphabet. As Arabic contains six letters which are not found in the Hebrew alphabet, the last five hundreds and the number one thousand were consecutively assigned to these letters. Tīpū being dissatisfied with the older arrangement, introduced at the same time as his new Maulūdi era the system which is known as abtath, ابنث from the first four letters of the Arabic alphabet ن ب ن ب a system in which the same twenty-eight numbers are assigned consecutively to the twenty-eight letters of the Arabic alphabet. These systems of cyclic years were first elucidated by Kirkpatrick and Marsden, but more recently a very clear account, from which the foregoing details are taken, has appeared in the work of Taylor. A reference to any of these writers will show how the numerical value of each cyclic year-name is arrived at. The following table gives the names of the cyclic years for the

^{*}The coins on which they occur are the ahmadI, sadIqI, double-rupee, rupee and half-rupee, of the Seringapatam, Nagar, Calicut and Dharwar mints.

different years of Tīpū's reign, though only those marked with an asterisk are actually known on coins:—

Regnal year.	Cyclic year.	Name	e of cyclic year.
I	37	زکی	saki, pure.
2	38	ازل	azal, beginningless eternity,
3	39	جاو	* jalaū, splendour.
4	40	داو	* dalv, the sign Aquarius.
5	41	أشأ	* shā, a king.
6	12	سارا	* sārā, fragrant.
7	43	سراب	* sarāb, a mirage.
8	44	شتا	* shitā, winter.
9	45	زبرجد	* zaharjad, a topaz.
10	46		* sahar, dawn.
Ti -	47		sāhur, a magician.
12	48	راسخ	
13	49		* shād, joyful.
14	50		* hirāsat, a guard.
15	51	ساز	sāz, concord.
16	52	شاداب	shādāb, moist.
17	53	بارش	bārish, rain.

NOTE. - The first four regnal years follow the Abjad and the remainder the Abtath system.

Although the later nomenclature did not come into regular use till the fifth year, abtath terms had been invented for the earlier years, and the first regnal year is recorded on the coins as \dot{c} — sakh, glass beads, when the date of accession is given.

THE NAMES OF THE MONTHS.

Two systems of nomenclature were adopted by Tīpū for the twelve months of the year. The first, in which the names follow the *abjad* system, was in use during the first four years of the reign; while the second, which follows the *abtath* system, came into force in the fifth regnal year, along with the *Maulūdī* system of dating the coins. For details as to the two sets of month-names the reader is referred to the works of Kirkpatrick, Marsden and Taylor. On many of Tīpū's ahmadīs, sadīqīs, double-rupees, rupees and

half-rupees, struck after the introduction of the Maulūdi era, the following words are found on the reverse:

'date of accession: the year Sakh, third of Bahārī.'

Bahārī is the name of the second month of the year in both systems, and Sakh, galass beads, in the abtath reckoning, has the numerical value 37. These coins, therefore, record the fact that Tīpū Sultān ascended the throne on the third day of the second month of the thirty-seventh cyclic year. This year commenced on the 2nd of April 1783, and the date of Tīpū's enthronement therefore corresponds to the 4th May 1783, a period in which, as Marsden points out, 'he was flushed with the victory recently obtained over a British Army, on the Malabar coast.' Curiously enough this day was also the one on which Tīpū died sixteen years later.

In several cases two different regnal years are found on coins bearing the same date. For example two rupees (Nos. 53 and 54) bear the date 1216, while one purports to be of the sixth regnal year and the other of the seventh. The difference is simply due to the fact that the first was struck before the anniversary of Tīpū's accession on 4th May in the year 1216 which commenced on 7th April 1788, while the other appeared between 4th May 1788 and the end of the year 1216 on 26th March 1789. A double-rupee recorded by Weyl (No. 42), bears the date 1198, the cyclic year and the regnal year 3; in this case the date is an error for 1199.

THE LETTER YEARS.

The copper coins issued from the Seringapatam, Nagar and Gooty mints during the last four years of Tīpū's reign, and no other mints were in operation during these years, bear respectively the first four letters of the Arabic alphabet. The coins of 1224 carry the letter i, those of 1225 the letter i, of 1226 the letter and of 1227 the letter i. The letter is placed above the elephant on the obverse, while the date occurs on the reverse and occasionally on the obverse as well. In several coins of the Gooty or Faiz Hisār mint, the letter and date do not correspond, and it seems safest to suppose that the former is correct; in a strangely blundered quarter-paisa of this mint, bearing the letter i, different dates are found on the two surfaces and neither of them agrees with the letter.

THE NAMES OF THE COINS.

Some time after the introduction of the Maulūdi era Tīpū Sultān invented names for his coins, on the reverse of which they are usually found, and we owe to Dr. E. Hultzsch (Ind. Antiq., vol. XVIII, p. 313, 1889) the first detailed explanation of these names. The gold and silver coins are called after Muhammadan saints, Khalīfas in the former coins and Imāms in the latter, while the

copper coins, with the single exception of the first name for the double-paisa, which is that of a Khalīfa, bear the Arabic or Persian names of stars. The coins and their titles are as follows:—

The four-pagoda piece or ahmadi, حمدي

Ahmad, the 'most praised' is one of the names of the Prophet himself,

صديقي The double-pagoda or sadiqi, صديقي

Sadiq, 'just,' is derived from Abū Bakr Sadiq, the first Khalīfa.

The pagoda or fārūqi, فاروتي

Fārūq, 'timid,' comes from Omar Fārūq, the name of the second Khalīfa:

The double-rupee or haidari, حيد,ي

Haidar, 'a lion,' the designation of Alī, who was both the fourth Khalīfa and the first Imām. Tīpū's father is also commemorated in the name.

The rupee or imāmi,

This name which is derived from the word *Imām*, 'leader,' is no doubt intended to stand for the twelve Imāms.

The half-rupee or ābidi, عابدي

This name is derived from Alī Zain al Ābidīn, the fourth of the twelve Imāms.

The quarter-rupee or bāqiri, باقري

The name of this coin is taken from Muhammad al Bāqir, Muhammad the Great, the fifth Imām.

The one-eighth rupee or jafari sies

This name is derived from that of Jafar al Sādiq, Jafar the Just, the sixth Imām.

The one-sixteenth rupee or kāzimi, كظمى

This name commemorates Mūsā al Kāzim, Mūsā the Silent, the seventh Imām.

The one-thirty-second rupee or khizri, خضري

The name of this, the smallest of the silver coins, is derived from Al Khizr, 'the green one,' a saint who is said to have drunk of the fountain of life and in consequence to be still alive.

مشتري , or mushtari عثماني or mushtari مشتري

The largest of the copper coins bears two names; the first, which was in use from 1218 up to 1221, commemorates Othman the third Khalīfa, while the second, which first came into use in the year 1221 and was continued in all the later years during which double-paisas were struck, is derived from al mushtari, the Arabic name of the planet Jupiter.

The paisa or zohra, si

This term is simply the Persian name of the planet Venus. The paisas struck at Seringapatam, with one exception (No. 121) and those of Gooty show the above or Persian spelling of the word, while those of the Nagar mint and the exception just referred to bear the designation zohrā the Hindustani spelling.

The half-paisa or bahrām, المجازام This is the Persian name of the planet Mars. The quarter-paisa or akhtar, اخذر This is the Persian word for a star.

The one-eighth paisa or qutb, خطب This is the Arabic name of the Pole Star.

The only one of Tīpū's coins on which no name is ever recorded is the gold fanam, and the omission can hardly be due to the small size of the coin, for the designation khizrī appears on the still smaller silver half-anna. These special coin-names first appear on the gold and silver coins on or after the year 1216, while in the case of the copper coins, with the exception of the double-paisa, which bears the designation othmānī as early as 1218, the names do not appear till 1221, and, as already remarked, the name of the double-paisa was then altered to mushtarī.

THE GOLD COINS.

Of the four varieties of gold coin issued by Tīpū Sultān, the ahmadī was struck at the Seringapatam and Nagar mints, while the sadīqī is only known from the first of these. Judging from the very small number of these coins now procurable their issue cannot have been extensive; on the other hand the pagodas and fanams, which conformed to the general South Indian gold currency, were evidently much more extensively coined. Pagodas were struck at Seringapatam, Nagar and Dhārwār (including Khwurshed-sawād), while fanams, in addition to the three mints just mentioned, omitting Khwurshed-sawād, were also struck at Calicut, Feroke and Dindigul. Both Moor and Hawkes refer to a double gold muhr, which neither of these writers had seen, and the coin has not been recorded by anyone else; according to Hawkes it was known as an 'emaumi.'

AHMADI.

This coin, which has an average weight of 2II grains, was probably intended to be the equivalent of four pagodas, as the normal weight of one of the latter coins is 52½ grains. If, however, the weight of 160 grains assigned by Jackson to an ahmadī dated 1198* (Coin Collecting in Mysore, p. 18) is correct, it may be that when the coin was first issued it was intended to correspond

^{*} Hawkes (Coinage of Mysore, p. 6) in referring to an ahmadi of the same year, states that 'it weighs about 212 grains of which nearly 182 are pure gold.'

to the muhr or gold rupee, which would weigh approximately 175 grains. In any case the coin is frequently, if incorrectly, termed a gold muhr. Three variations in the inscriptions are met with, and for the first of these the following may be taken as a typical example:—

Obv.—The religion of Ahmad is illumined in the world by the victory of Haidar τ . Struck at Pattan, the (cyclic) year Azal (38), the Hijrī year 1198.

Rev.—He is the Sultān, the Unique, the Just. The third of Bahārī, the (cyclic) year Azal (38), the regnal year 2.

The following is the arrangement in the second type:

2. Obverse.

Reverse.

احدد دین در جهان -اسست ح ضرب پتن روشن زنتم حیدر شال سنه میدمد

As in the first type, but cyclic year im and regnal year o

Obv.—The religion of Ahmad is illumined in the world by the victory of Haidar . Struck at Pattan, the (cyclic) year Shā (41), the year 1215, Muhammad.

Rev.—He is the Sultan, the Unique, the Just. The third of Bahārī, the (cyclic) year Shā (41), the regnal year 5.

In this case the name of the cyclic year occupies a line by itself on the obverse, and the word Muhammad is found at the end of the legend on the same surface.

The following is the arrangement in the third and last type:-

ع. Obverse.

السلطان السلطان احمد در جهان السلطان حيد مال سخ مال سخ حيد المحاد مال سخ مال سخ مال سخ مورب العادل، جملوس س روشن زفدم حيدر احمد المديوم بهاري سنه جلوس پتن مال سراب سنه مال سنه مال سراب سنه مال سنه م

Obv.—Muhammad. The religion of Ahmad is illumined in the world by the victory of Haidar τ . An ahmadī struck at Pattan, the (cyclic) year Sarāb (43), the (Maulūdī) year 1217.

Rev.—He is the Sultān, the Unique, the Just. Date of accession the (cyclic) year Sakh (37), the third of Bahārī. Regnal year 7.

The name Muhammad now appears at the head of the obverse inscription and the denomination of the coin is also found on the same surface. Marsden remarks, with regard to the inclusion of the name of the Prophet, 'it seems intended to stop the murmurings of those to whom the exclusion of the hejrah could not fail to give occasion of scandal, and who might have begun to suspect their sovereign of heterodoxy.' The complete record of Tīpū's accession to the throne is now found on the reverse.

The three types in regard to inscriptions given above are met with in the two larger gold coins, including the one just described, and in the three larger silver coins. While the third type occurs in all of these coins, the first type is only known in the ahmadī, double-rupee and rupee, and the second in the ahmadī, double-rupee and half-rupee; but it is quite probable that this list is incomplete.

SADIQI.

The average weight of this coin is 106 grains and it was probably intended to be equivalent to two pagodas. The reverse inscription and its arrangement are identical with those found on the third type of ahmadī just described, and while the obverse inscription remains the same, the arrangement of the words as shown below is slightly different, making allowance of course for the designation of the coin sadīqī, and the various cyclic years and dates which appear on this surface in the four known varieties of the coin.

Obverse.

Obv.—Muhammad. The religion of Ahmad is illumined in the world by the victory of Haidar τ. A sadīqī struck at Pattan the (cyclic) year Sārā (42), the (Maulūdī) year 1216.

PAGODA.

Of this coin, generally termed the Sultānī pagoda, which weighs normally 52½ grains, there are three varieties and the last of these bears the distinctive term fārūqī.

I. Struck at the Pattan and Nagar mints in the first four years of the reign, of which the following may be taken as an example:—

Obverse.

بنن

Reverse.

هو بن السلطا ۱۲۰۰ ادل مذه همد

On a granulated field.

Obv.—Haidar's initial combined with the name of the mint Pattan, and the numeral 4 (regnal year).

Rev.—He is the Sultan, the Just. Hijrī year 1200.

In three coins of this type struck in the years II97 and II98 no mint is recorded, and the obverse merely bears Haidar's initial and the numeral denoting the regnal year. As no pagodas issued during these years show the mint-name Pattan, they were in all probability struck at this city. In the Nagar coins the mint-name is placed to the left of Haidar's initial.

2. Struck at the Pattan and Nagar mints in 1215, and at Dhārwār in 1216. The following is an example:—

Obverse.

As in var. I, but regnal year 0

Reverse. معمد السلطان العالم

Obv.—Haidar's initial combined with the name of the mint Pattan, and the numeral 5 (regnal year).

Rev.-Muhammad. He is the Sultan, the Just. Year 1215.

In the Nagar coin the name of the mint is placed to the left of Haidar's initial, while in the Dhārwār one it is placed below the initial

3. Struck at Pattan from 1216 to 1223, at Nagar in 1216 and 1217, and at Khwurshed-sawād in 1217 and 1218. As before a Pattan coin is taken as an example.

Obv.—A fārūqī. Pattan (regnal) year 6. Haidar's initial and the name of the mint are combined.

Rev.—Muhammad. He is the Sultan, the Unique, the Just. Year 1216.

In the Nagar coins the mint-name is to right of Haidar's initial.

The two Khwurshed-sawād fāruqīs show the following inscription on the obverse:—

Obv.—A fārūqī T Khwurshed-sawād (regnal) year 7.
In this case Haidar's initial is combined with the last letter of fārūqī.

FANAM.

This coin, which weighs from 5 to 6 grains, was equal in value to one-tenth of a pagoda, and in spite of its small size had a considerable circulation in Southern India, where, apart from those issued by Tīpū Sultān, many varieties of fanam exist.

In all Tīpū's fanams the obverse exhibits only Haidar's initial within a lined circle and a row of dots, but there are several slight variations in the reverse inscription. In the Pattan fanams we find

(struck at Pattan in the year 1198), or 119۸ ضرب بتن عند (struck at Pattan 1198); the first of these arrangements is met with only in the first two regnal years, while the second exists from the second to the thirteenth year. In the Nagar fanams the inscription is similar to the later or second Pattan type, while in those of Calicut it agrees with the first Pattan type, except that the word is omitted and the last letter of the mint-name occupies a line by itself. The Feroke fanams bear only the mint-name and the date, while the Khāliqābād ones have the date in the middle of the field, with the mint-name above and the word خرب below. I have never seen a specimen of the Dhārwār fanam and am, therefore, unable to state the arrangement of its inscription.

THE SILVER COINS.

Seven varieties of silver coin were issued by Tīpū Sultān, viz., the double-rupee struck at Pattan, Nagar, and Calicut, the rupee at Pattan, Nagar, Dhārwār and Khwurshed-sawād, the half-rupee at Pattan and Nagar, and finally the quarter, eighth, sixteenth and thirty-second of a rupee, issued only from the Pattan mint.

No silver coins appear to have been struck in the first regnal year, and only coins smaller than the rupee are known after the thirteenth year. The smallest fraction of the rupee or khizrī, was apparently only struck in the twelfth year.

DOUBLE-RUPEE.

This coin which generally weighs from 352 to 355 grains presents three varieties or types as regards its inscriptions, and as these are identical with those already described in detail in the case of the gold ahmadī, it is unnecessary to repeat them. In the double-rupees of the third type, however, the coin-name haidarī appears on the obverse, in place of the word ahmadī found on the gold coin.

The first type of inscription is found on coins dated from 1198 to 1216, including the latter year, while the third type which commences in this same year 1216 is continued to 1220. Of two double-rupees issued from the Nagar mint, one dated 1200 conforms to the earliest type, while the other dated 1215 also belongs to the first type, but shows two variations on the obverse, the word (Muhammad) being added to the usual word (Ahmad) in the first line, and the word (struck) being placed before the name of the mint in the last line. The two Calicut double-rupees struck in 1215, which differ chiefly in the arrangement of the figures in the date, are of the second type, but in one of them the name of the cyclic year occurs in the last line on the obverse.

In several of the earlier double-rupees both fields, but more particularly the reverse, are ornamented with conventional floral and even cruciform designs, in addition to the usual rosettes composed of dots; in the later coins the fields are plain.

RUPEE.

This coin weighs on an average 175 grains, but an exceptional specimen may weigh as much as 188 grains. It exists in two types, which except for differences to be detailed presently, agree as regards the inscriptions and their arrangement with the first and third types already noted in the case of the ahmadī and doublerupee. In the coins of the later type the distinctive name imāmī appears on the obverse.

The first type, so far as is known, was issued only from Seringapatam and Nagar, in the year 1200, while the later one appeared from the year 1216 onwards at Seringapatam, and at Dhārwār in 1216. A rupee struck at Nagar in 1216, which must be regarded as a variety of the later type, shows the following variations in the arrangement of the inscriptions; it will be noted that Haidar's initial is omitted:—

السلطان الوالعادل دين در جهان روشن السلطان الوالعادل حيد محمد محمد السلطان الوالعادل حيد المام صرب المسلطان الريخ جلوس سال سخ سيوم المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صرب المام صدد المام صرب المام صدد الما

Obv.—Ahmad. The religion of Muhammad is illumined in the world by the victory of Haidar. An imāmī struck at Nagar, the (cyclic) year Sārā (42), the (Maulūdī) year 1216.

Rev.—He is the Sultān, the Unique, the Just. Date of accession the (cyclic) year Sakh (37), the 3rd of Bahārī. Regnal year 6.

The rupees struck at Khwurshed-sawād in 1217 and 1218 show the following variation in the obverse:—

Obv.—Muhammad. The religion of Ahmad is illumined in the world by the victory of Haidar τ . An imāmī struck at Khwurshed-sawād, the (cyclic) year Sarāb (43), the (Maulūdī) year 1217.

HALF-RUPEE.

This coin, the abidi, weighs about 87 grains and exists in the second and third types already described for several of the foregoing gold and silver coins, but the half-rupee struck at Seringapatam in 1215, is the only known representative of the second type. The Nagar half-rupee agrees with the double-rupee, issued from the same mint in 1215 and already described, in which (Muhammad) is added to (Ahmad) in the first line of the obverse, and the word (struck) is found at the commencement of the last line on the same surface.

QUARTER-RUPEE.

Of this coin, otherwise known as the bāqirī, which has an average weight of about 43 grains, and was struck at the Seringapatam mint from 1216 to 1224, only a single type exists with the following inscriptions:—

Obverse.	Reverse.
مجمل	7
هوالسلطان	مذ
حيـــــــــ حيــــــــــــ ١١٢١	با قر
الوالعادل منه	ح پذی

Obv.—Muhammad. He is the Sultān, the Unique, the Just. Year 1216 (Maulūdī).

Rev.-Baqirī (regnal) year 6, 7, Pattan.

EIGHTH-RUPEE.

This coin, the jafari, with an average weight of about 20 grains, was struck at Seringapatam from 1218 to 1226. The inscriptions are still further reduced.

Obv.—Muhammad. Year 1218 (Maulūdī). Struck at Pattan. Tev.—Jafarī. Regnal year 8.

It will be seen that Haidar's initial is combined with the name of the mint.

SIXTEENTH-RUPEE.

This coin, known as the kāzimī, weighs approximately Io grains, and was issued from the Seringapatam mint in the years 1220 to 1226. Except for the presence of the distinctive name of the coin the inscriptions are identical with those on the eighthrupee. The following is the arrangement on the reverse:—

Rev.-Kāzimī. Regnal year 10.

THIRTY-SECOND OF A RUPEE.

This, the smallest of all Tīpū's coins, which weighs approximately 5 grains, was struck at Seringapatam, so far as is known only in the year 1222. It bears the following inscriptions:—

Obverse.	Reverse.
السلطنت	rı
اد	خضري
ضرب .	

Obv.—Struck at the royal residence.*

Rev. - Khizrī (regnal year) 12.

Although no mint-name appears on the coin it may be assumed with some degree of probability, on the analogy of the other small silver coins, that the khizrī emanated from Seringapatam.

THE COPPER COINS.

Copper coins in five different values, viz., double-paisa, paisa, half-paisa, quarter-paisa and eighth-paisa were issued by Tipū Sultan from no fewer than twelve different mints, though only the paisa appears to have been struck at all of these. The paisa, also, is the only coin known to have been struck in each of the seventeen regnal years.

The copper coins, unlike the gold and silver ones, invariably exhibit on the obverse a figure of an elephant, either advancing or standing with its head to the right or left of the field, † and in some of the double-paisas the animal is represented with its trunk uplifted, as if engaged in the act of taslim or salaaming, an action which it is usually trained to perform on special

[•] I have followed the late Major Tuinell in making the phrase dar al saltanat the equivalent of 'royal residence', rather than of 'capital', as it occurs on coins from four different mints,

[†] In the Catalogue the terms 'right' or 'left' invariably refer to the right or left of the observer, and not to the heraldic or proper right and left.

occasions. It is generally fully caparisoned, with an elaborately decorated body-cloth and head-covering, and with metal anklets on all its feet, in other words with the ornamental trappings worn by the animal on ceremonial or state occasions. As a general rule to which, however, there are many exceptions, the elephant in the earlier coins up to 1221 is turned to the left, while in the later ones from 1221 onwards it is turned to the right; the exceptions are most frequently met with during the first few years of each of these periods. The elephant, which in India is generally associated with royalty, is an inhabitant of the Mysore jungles and appears on the 'Gajapati' pagoda, which probably originated in the ancient Ganga dynasty of Mysore, a coin which was doubtless well known to Haidar and Tīpū.

The paisa weighs approximately 174 grains and the other copper coins in due proportion. The special designations appear first on the double-paisa in 1218 and on the smaller coins in 1221.

A reference is made elsewhere to the fact that some of the smaller copper coins bear the title of a coin of higher value, and it has been suggested that this was the result of a deliberate intention to raise the value of the coin. It is remarked by Buchanan (Journey to Mysore, Vol. I, p. 129, 1807):—"The value of the different coins was frequently changed by the late Sultan in a very arbitrary and oppressive manner. When he was about to pay his troops, the nominal value of each coin was raised very high, and kept at that standard for about ten days; during which time the soldiery were allowed to pay off their debts at the high valuation. After this, the standard was reduced to the proper value." It has, however, always seemed to me more probable that the title of these peculiar coins is the result rather of an error on the part of an ignorant workman who was not familiar with the Arabic letters. It seems hardly likely that a purely temporary measure would be recorded on the coin.

By many writers the double-paisa is described as a forty-cash piece, and the other coins in relative proportion down to the eighth of a paisa which is the equivalent of two-and-a-half cash. The term cash or 'kas' was in use in the Tamil districts of Southern India and was introduced in the copper currency of Mysore after the death of Tīpū Sultān, when Krishna Rājā was placed on the throne, probably to make the coins conform to those of the English East India Company. It is, however, doubtful if the term was used by Tīpū, and we know from contemporary writers that the word 'paisa' was then in general use (vide Kirkpatrick, Letter CCXXXIV).

The inscriptions on the copper coins are always of limited extent and are practically confined to the reverse.

DOUBLE-PAISA.

This coin, which weighs from 33I to 352 grains, was struck at Seringapatam and Nagar from 1218 to 1226, at Chitaldrug in 1218 and 1219, and at Feroke in 1218; specimens without any indication of the date are also known from the first two of these mints. There are three main types of this coin:—

(I) Those issued from all four mints between the years 1218 and I221, the latter year in the case of Pattan only, of which the following may be taken as an example:-

Obverse.

Elephant to right with uplifted trunk. Date Alli over the tail. Above the elephant a flag.

عثماني پتن

Othmani struck at the royal residence Pattan.

(2) Those issued from Pattan and Nagar in the years 1222 and 1223, of which the following is an example:

Obverse.

As in type (I) but date ۱۲۲۱, As in type (I) but name of and the word ولودي coin شقر (mushtari).

(maulūdi) above the elephant.

There is a second double-paisa from the Pattan mint, dated 1221, in which the above obverse (2) is combined with a reverse in which the word mushtari is found, but not the epithet dar alsaltanat (royal residence).

(3) Those issued from Pattan and Nagar in the letter years

1224 to 1226, both included:

Obverse.

Elephant to right with depressed trunk. Above the elephant a

flag carrying the letter | but no date.

پتن ضرب دار السلطنت ۴۲۲۱

مشدری سنه مواود

Mushtarī struck at the royal residence Pattan, in the Maulūdī year 1224.

PAISA.

This coin, which as already remarked was struck at all the mints, has an average weight of 174 grains, but examples weighing as little as 160 grains and as much as 193 grains are met with. In the earlier paisas, with the exception of the two earliest Nagar ones, the obverse shows merely the elephant and date, but the Pattan and Nagar coins from 1221 to 1223 (both years included) have in addition the word مولودي maulūdī, 'relating to the birth' and two paisas struck at Pattan in the years 1221 and 1222 the words of Muhammad maulūd, 'the birth of Muhammad.'

The distinctive letter for each year is found on coins of the two mints just mentioned, and also on those of Faiz Hisar, from 1224 onwards, and as late as 1227 in the case of Nagar, but the word maulūdi has now disappeared from the obverse. As regards the reverse the earlier coins as a rule merely record the mint, with the word فرب 'struck at', but on Pattan and Nagar paisas of I22I and subsequent years the special name of the coin zohra, or زهرا zohra, appears, while in those of Faiz Hisār it is only met with in the letter years. In the case of all three mints, during the letter years, the word maulūdi is associated with the date on the reverse.

A Feroke paisa struck in 1216 has the word is sanah, 'year' on the obverse, and according to Jackson a Pattan paisa of 1217 has V is on the obverse and the date along with the name of the mint on the reverse. A Nagar paisa of 1197 has the word with the date on the reverse. The reverses of some of the earlier paisas of Calicut record the word vicin bundar, 'the port', and in others from this mint the regnal year is stated on the same surface. Undated paisas are known from the Pattan, Nagar, Faiz Hisār and Calicut mints.

HALF-PAISA.

This coin, which was issued from all the mints except Calicut, weighs on an average 87 grains, but variations between 82 and 92 grains are met with. The inscriptions and their arrangement in the half-paisa agree on the whole with those of the paisa, the only important difference lying in the fact that the word maulūdi is entirely omitted from the former, except in the case of the half-paisas struck at Nagar in the last three years of the reign.

The special name place bahrām, occurs first on Pattan coins in 1221 and on Nagar and Faiz Hisār ones in 1222 and 1224 respectively. Undated half-paisas are known from the Pattan, Nagar, Faiz Hisār and Bengalūr mints.

QUARTER-PAISA.

This weighs on an average 42 grains, but examples are met with weighing from 32 to 49 grains; it appears to have been struck at all the mints except Khwurshed-sawād. A quarter-paisa from the Nagar mint dated 1198 has the date and the word recorded on the reverse; the Calicut coins of the same value have no date on either side and merely the name of the mint-town on the reverse.

The distinctive name akhtar appears first on Pattan coins in 1221, but on those of Nagar and Faiz Hisar it rarely occurs till the letter years. In other respects the quarter-paisa agrees with the half-paisa.

Attention is drawn elsewhere to the extraordinary errors which occur in some of the quarter-paisas of Nagar, Faiz Hisār and Khāliqābād, errors not only in the date, but extending even to the name of the coin in the first two of these mints. Undated quarter-paisas are known from the Pattan, Faiz Hisār, Bengalūr, Kalīkut and Khāliqābād mints.

EIGHTH-PAISA.

This the smallest of the copper coins, weighing on an average 21 grains, but occasionally as little as 18 grains, was struck only at

the Pattan, Nagar, Bengalūr, Farrukh-yāb Hisār and Salāmābād mints. It appeared as early as the year 1216 and as late as 1226.

The special name qutb, is only met with on the later Pattan and Nagar coins, appearing in the first of these as early as the year 1222, and as late as the penultimate letter year 1226, while the only known eighth-paisa from the Nagar mint was issued in the year 1226. A variety is known, possibly struck at Pattan, in which the name of the mint is omitted, although the word qutb occurs (vide Jackson, pl. II, fig. 405), and another is known without any indication of the date.

THE MILLING OF THE COINS.

While the copper coins of Tīpū Sultān are invariably unmilled. many of his gold and silver coins exhibit a highly peculiar and characteristic milling, similar to that met with in some French coins, and which, therefore, perhaps owes its origin to some of Tīpū's French workmen. It consists of one or two irregular grooves running around the edge of the coin, interrupted at regular intervals by transverse depressions or indentations, in such a manner as to give almost a crenated appearance to the margin. In some cases, possibly as the result of wear, the grooves have disappeared and only the crenations remain. The gold ahmadīs and sadiqis are all milled, as are also the later pagodas issued after 1215, with an occasional lapse; the pagodas of the earlier series are unmilled. The four larger silver coins, from the double-rupee to the quarter-rupee, appear invariably to be milled, and the few doubtful specimens which are met with probably owe their appearance to undue wear rather than to an original absence of milling. Seringapatam rupee of 1219 in the collection of the Madras Museum, is peculiar in exhibiting a coarse oblique milling, similar to that met with in some of the East India Company Madras rupees and their fractions which were struck early in the nineteenth century.

ALLIED COINS.

Copper coins of quarter-paisa size, with an elephant on the obverse, but which were evidently not struck by Haidar or Tīpū, are occasionally met with. In one of these which is an obvious copy of Tīpū's quarter-paisas, the elephant is surmounted by a crescent and star, while the reverse bears the mint-name Ganjikotah (Gandikota in the Cuddapah district), and the date 1215 (1800-01 A.D.). In others, the reverses which are always incomplete and usually illegible, suggest that they were struck by some of the Chiefs in the Bellary, Anantapur and Cuddapah districts, who struck coins in the name of the Mughal Emperors. One of these bears the date II6I (1748 A.D.) above the elephant, and if this is not an error as I strongly suspect, it might be regarded as the proto-type from which Haidar Ali took the elephant obverse. Jackson (Coin Collecting in Mysore, pl. II, fig. 484) figures a half-paisa in which the reverse bears the illegible name of a mint and the date 1202 (1787-88 A.D.). This coin, which is not uncommon, has an elephant to right, while a second type exists in which the elephant is to the left; both are possibly local issues of Wallajah, Nawab of the Carnatic.

Note.—The dates in the column showing the commencement of each Mauludi year are taken from page XCV of the *Indian Calendar*, by Sewell and Balakrishna Dikshit (1896).

The interval between the fourth and fifth regnal years represents the period between the close of the Hijri year 1200 (on 23rd October, 1786) and the commencement of the Maulūdi year 1215 (on 20th March, 1787). It corresponds to about the first five months of the Hijri year 1201.

				A STATE OF THE PARTY OF THE PAR			

ı. PATTAN پتن

(The Town.)

The word Pattan is a contraction for Srīrangapattana (Seringapatam) 'the town of the Blessed Ranganātha,' in the southern part of Mysore. Here, on an island in the River Cauvery, has existed from the ninth century a Vishnuvaite temple of great sanctity dedicated to Ranganātha, and as has happened so often under similar circumstances in Southern India, a city in course of time grew up around it. Seringapatam is situated at the western end of an island three miles long, by about one in breadth, and its fortifications, which were originally built by successive Rājās of Mysore who made the city their capital, were extended and greatly strengthened by Haidar and Tīpū. The town was seized by Haidar in 1761, at a time when he was becoming firmly established in Mysore; ten years later it was besieged by the Marāthās, who after a blockade of fifteen months, were finally induced to come to terms.

The town in its long history stood many sieges, but only the last two of these need be referred to. A British army under Lord Cornwallis appeared before Seringapatam on 6th February 1792, and eighteen days later Tīpū was forced to capitulate, the terms including the handing over of half his dominions and the payment of a heavy indemnity. The date of the first British siege of Seringapatam, which corresponds to about a month before the close of 1219 A.M., is of considerable numismatic interest, for thereafter the mints of Dindigul, Feroke (which succeeded Calicut), Gurramkonda, and Dhārwār, were no longer in Mysore territory; indeed all of these had ceased to issue coins in the previous year. At the same time the number of Tīpū's mints was greatly reduced, and after 1219 only Seringapatam, Nagar and Gooty, remained in operation. The final siege, under the command of General Harris, commenced on the 5th of April 1799, and on the 4th of May the fort was taken by assault and Tīpū Sultān slain.

As the capital of the State Seringapatam was the most important of the mints established by Tīpū Sultān. Coins of all the values in gold, silver and copper, were struck, and some or other of these were issued during all the regnal years, except the last, which commenced less than a month before Tīpū's death. The coins are usually of superior execution, yet die errors are not unknown. Two gold fanams with blundered dates are recorded and also an incorrectly dated rupee of 1220. A paisa, probably of 1216, is dated 216, and another of 1220 is dated 1260; a quarterpaisa is recorded by Jackson with bahrām (half-paisa) in error for akhtar, and a quarter-paisa of 1225 is wrongly dated 1224. There is a one-eighth paisa dated 1222, with no indication of the minttown, which in all probability emanated from Seringapatam.

In the catalogue reference will be found to certain special marks, which occur in addition to the usual dotted rosettes on some of the double-paisas, paisas and half-paisas, more particularly of 1224, 1225 and 1226. One of these, which may be described as an obliquely twisted pointed oval, occurs also on Gooty copper coins of 1225 and 1226. What the significance of this mark may

have been it is impossible to say, but the fact that it occurs on coins of the same years issued from two different mints, appears to indicate that some importance was attached to it.

The coins in all three metals show a border, which was copied in several of the other mints, consisting of a double-lined * circle enclosing a row of dots, the only exceptions being the double-rupee and rupee of 1219, which exhibit short concentric rays arranged in the form of a circular band.

On the copper coins from the year 1221† onwards, the denomination of value is recorded, that of the paisa being خور zohrā in a single case (No. 121), and in all others خور zohra. In the same year reference is made for the first time to the new era instituted by Tīpū, paisas of 1221 and 1222 bearing the date and the words 'the birth of Muhammad', to be followed in coins of the same years and of 1223 in addition, by the date and the adjectival word 'relating to the birth.'

As regards the gold coins, specimens of the ahmadī and sadīqī are of great rarity, particularly the latter, but most of the pagodas and fanams are not uncommon. Counterfeit fanams, evidently made when the coins were in circulation, are not uncommon in brass, copper, and even in silver. With the exception of some of the rupees and half-rupees, the silver coins are all scarce, particularly certain of the double-rupees and the smaller silver issues, notably the khizrī; which is extremely rare.

Many of the copper coins are still found in great numbers, but all the double-paisas, except perhaps that of 1225, and the one-eighth paisas, are rare. The commonest paisas are those issued after 1220, and particularly those of the years 1224 and 1225; of the four varieties struck in 1221, the rarest is No. 121, of those struck in the following year No. 124, and of those of 1223 the rarest is No. 128. The paisas dated 1201 and 216 (for 1216) are both rare. The commonest half-paisas are those of 1224 and 1225, but many of the others are relatively common; among the rarer ones may be enumerated Nos. 140, 148, 151 and 153. Of the two half-paisas of 1216 the larger and thinner coin is the rarer. It may be noted that the half-paisa of 1226, a common coin, is always of coarser fabric than the corresponding coins of the two preceding years. Many of the quarter-paisas are still very common, particularly as in the case of the other copper coins, those of the later years.

^{*} In the smaller silver coins there is a single-lined circle forming the inner boundary of a row of dots.

[†] Jackson records a quarter-paisa of 1219, with the designation bahram in error for akhtar. I do not know of any other instance of the special name appearing on a quarter-paisa prior to the year 1221, and the record is possibly due to some mistake.

[‡] On this coin no mint is recorded, but merely the fact that it was struck at the 'royal residence.' There can, I think, be no doubt that it is an issue of Seringapatam.

^{*} Taylor (Coins of Tipū Sultān, p. 27) describes an abidī of 1215 belonging to the third type on which the name of the coin is recorded, but it bears the cyclic year (1218) and is, therefore, probably the coin numbered 64 in the present catalogue. The coin dated 1215, which he figures on pl. I, fig. 20, belongs to the second type and is No. 61 above.

2. NAGAR گ

(The City.)

This town, in the Shimoga district of Mysore, which is situated in the north-west corner of the State, was formerly, under the name of Bednur, capital of the country ruled by the Ikkeri chiefs. The last Rājā of Bednūr died in 1755, leaving an adopted son as his heir, and the town was taken by Haidar Alī in March 1763, when the Rani and adopted heir were both imprisoned. Bednur was the most important of Haidar's annexations, and he always considered that its capture led the way to his ultimate success. He renamed the town Haidarnagar after himself, and intended to make it his capital; it became his family residence, and he established a local mint, where the well-known Haidarī pagodas and fanams were struck, and according to Ramchandra Rao (Memoirs of Haidar Ali Bahadur and of his son Tippoo Sultan) also rupees.* Nagar surrendered to General Matthews in January 1783, but was retaken by Tīpū Sultān about three months later, when the entire British garrison capitulated, and since this time it has remained in Mysore.

From the Nagar mint, and in this respect it stands alone among Tīpū's mints, were issued coins from the first regnal year to the last, without a break. The series includes in gold a single ahmadī, several pagodas of both the earlier and later (fārūqī) types, and a number of fanams; in silver there is a small set of double-rupees, rupees, and a half-rupee, while all the copper denominations, from the double-paisa to the eighth-paisa, are met with. A paisa and half-paisa dated 1227, are the only coins known to have been issued in the last year of Tīpū's reign, which commenced less than a month before his death, and no doubt their occurrence is explained by the remoteness of Nagar from the area of the military operations which culminated in the final capture of Seringapatam. In all the coins the border consists of a single or double-lined circle with a row of dots.

Special attention may be drawn to Nos. 25I, 252, 254, 255 (two paisas of 1225 and two of 1226) which bear incorrect dates on the obverse. There is also a quarter-paisa dated 126I, probably in error for 122I, and in three quarter-paisas of 122I and 1226, two of which bear blundered dates on the obverse, the designation zohrā (paisa) is found in place of the correct term akhtar. In my opinion this is the result of an error on the part of the dieengraver, rather than a deliberate attempt to enhance the value of the coin.

The gold ahmadī is of great rarity, but some of the pagodas and fanams are not uncommon. All the silver coins are of considerable rarity, the rupees being, however, more frequently met with than the other values. Of the copper coins the double-paisas are all rare, and the one-eighth paisa extremely rare; many of the paisas and half-paisas are still commonly found, but none of the quarter paisas is common. While a number of the paisas struck before 1220 are not uncommon, those issued after

^{*} As rupees struck by Haidar are not known to numismatists this statement is probably incorrect.

this year are found in still greater numbers, and the same statement applies to the half-paisas, which are, however, less common than the paisas. The following copper coins are all of considerable rarity:—Nos. 231, 244, 251, 252, 254, 255, 260, 264, 270, 278, 279, 283, 284.

3. FAIZ HISAR, فيض حصار

(The Fort of Bounty).

This name was applied to Gooty, an important town in the Anantapūr district, with a very strong hill-fort which rises about 1,000 feet above the surrounding country. Marsden makes the title the equivalent of 'the fort of abundance,' while Taylor who follows Bowring (Rulers of India, Tipū Sultān, p. 210) prefers 'the citadel of grace.' Gooty came under the dominion of the Marāthās in 1758, and was taken by Haidar Alī from the celebrated Morāri Rāo in 1775, after a siege of nine months. The upper fort was practically impregnable, but it is said that the failure of a spring of water on which the garrison depended, led to the final capitulation. The town remained in possession of Tīpū till 1799, when it was captured by General Bowser. After the death of Tīpū Gooty was restored to the Nizām, in whose territory it was included before the Marāthā invasion, but in 1800, Anantapūr along with the Bellary and Cuddapah districts, was ceded to the East India Company.

The coins of this mint consist of an extensive series of paisas, half-paisas and quarter-paisas, issued from 1215 to 1226. On many of them the inscriptions are coarsely executed, and there are frequent blunders in the dates, due to misplaced or reversed numerals, and errors in the denomination of the coins. The three latest paisas bear the denomination zohra, and the letters | . and .; as they also bear dates which are usually blundered, the safest course to adopt is to suppose that these letters, as in the Seringapatam and Nagar series, stand respectively for the years 1224, 1225 and 1226, and to date the coins accordingly. Unlike most of the letter coins of the two mints just referred to, those of Faiz Hisar are frequently dated on the obverse, but the date in a good many cases does not agree with that of the letter year, and in No. 339 different dates are found on the obverse and reverse, neither of which agrees with that of the letter. Fewer errors are met with in the halfpaisas, and those of the last three years bear the denomination bahrām and the same letters as the paisas. Considerable difficulties are encountered in the later quarter-paisas, where in addition to numerous date errors there are also errors in the denomination of the coin. Thus in place of the correct term akhtar, quarter-paisas of the years 1225 and 1226 bear the designation bahram (half-paisa), and one of 1225 is actually inscribed zohra As we have already mentioned, Tīpū occasionally allowed his coins to circulate at a higher value than they originally represented, and the suggestion has been made that the coins referred to in the last sentence were deliberately overvalued. It appears to me much more probable that they are ordinary errors, such as are frequently met with elsewhere among Tīpū's coins, and that they resulted from an imperfect knowledge of the Hindustani letters, on the part of the Telugu or other South Indian workmen who

In one of the paisas of 1225, a peculiar oblique oval mark is met with, as on some of the Seringapatam coins, although the fact that the coin bears a blundered date hardly suggests that it was

made at the latter mint. The same mark occurs on the half-paisas of 1225 and 1226, on a quarter-paisa of 1225, and on three quarter-paisas of 1226.

In the coins of 1215 and 1216, there is an ornamental border in the form of a wide double-lined circle enclosing groups of four-dotted flowers. Commencing with 1216, in which year both types of border occur, and continuing to the last year, the border consists of the usual double-lined circle enclosing a row of dots.

Gooty was the seat of a mint before it was occupied by Haidar and Tīpū, and gold pagodas were previously struck by the Marāthās in the name of Muhammad Shāh, in imitation of what are apparently true Mughal pagodas appearing first in the reign of Farrukh-Siyar. These 'old Muhammad Shāhi pagodas,' as they were termed, appear to have had an extensive local circulation, and were succeeded by the 'new Muhammad Shāhi pagodas' struck in the first place by Haidar, but continued by Tīpū. Two of these coins are recorded in this catalogue under the issues of Haidar, although one of them, which is there classified for convenience, must from its date have been struck during the reign of Tīpū. It was probably struck without Tīpū's knowledge, and as it does not conform to his general policy in regard to coins was perhaps soon suppressed.

Many of the coins of Faiz Hisār are still fairly common, more particularly the paisas of 1216 (with elephant to right), of 1217, 1221 and 1222, and the half-paisas of 1216 (both borders), 1217, 1218, 1221, 1222 and 1223; the later paisas and half-paisas from 1223 onwards, with the exception of No. 314, are all rare, yet several of the quarter-paisas of the same period are not uncommon. The quarter-paisas issued before 1222 are all rare.

4. BENGALÜR بذگلور

(Bengalūru, the City of Beans.)

Bangalore, the chief town of the district of the same name, is the largest city in Mysore State, and now includes an important British cantonment. It was long celebrated for its fort, which originally composed of earth was rebuilt in stone and greatly strengthened by Haider Alī, in the first year of his reign. Bangalore was a favourite residence of Tīpū, from whom it was taken by Lord Cornwallis on 21st March 1791, after a siege of seventeen days. The town was restored to Tīpū at the peace of 1792, when he dismantled the fort, but it was again rebuilt after his death, under the direction of Purnaiya, Dīwān of Krishnarājā.

Copper paisas, half-paisas, quarter-paisas and one-eighth paisas were struck at Bangalore between the fourth and ninth regnal years of Tīpū Sultān. The latest coins are dated 1219, a year which actually commenced fourteen days after the capture of Bangalore, but the town was restored to Tīpū by the treaty of Seringapatam, on 23rd February 1792, about a month before the close of 1219, and in all probability the coins of this year were issued during this period. Although Bangalore was held by Tīpū from 1792 to his death, all local coinage seems to have ceased after the year 1219, an apparent exception being the half-paisa dated 1222 (No. 370), which is more likely to be the result of some mixture of dies through error, than an evidence that coins were struck at Bangalore in the year recorded on this specimen. It is conceivable that in this case a discarded reverse die of Bangalore, got mixed up with a half-paisa obverse of Seringapatam or some other mint.

In all the coins of the Bangalore mint the inscription on the reverse is carefully executed, and the border on this side is the usual double-lined circle enclosing a row of dots. The elephant on the obverse is less satisfactory, and with the single exception of a half-paisa of 1215, in which the dots are present, is enclosed in a plain double-lined circle.

Several of the half-paisas and quarter-paisas of this mint are still commonly met with, but all the paisas and one-eighth paisas are more or less rare; among the special rarities may be mentioned Nos. 363, 365, 370, 373 and 382. The coins of the first two years and of the last year are less common than those of the intermediate period.

i, FARRUKH-YAB HISAR فرخياب حصار

(The fort felicitously acquired.)

This term was applied to Chitaldrūg, situated at the foot of a strongly fortified hill 126 miles north-west of Bangalore, and the chief town of the district of the same name in Mysore. The Poligar or local chief was forced to submit to Haidar Alī in 1762, but as he refused to assist his conqueror and had actually sided with the Marāthās and Nizām Alī in their operations against Mysore, the town was besieged and taken by Haidar in March 1779. The name selected by Tīpū possibly refers to the fact that the fort was captured through treachery, on the part of the Muhammadan officers in the army of the Poligar.

The mint-name has been read by Tufnell and others Farrukh-bāb Hisār, نوخباب عصار 'the fort of the fortunate gate,' but in the earlier coins the reading is undoubtedly 'yab'. In the later coins the dots of the عن are misplaced, which has led to this letter being mistaken for a به Kirkpatrick (Appendix E, p. XLI), Captain Macleod (vide Beatson, Appendix, p. clxx) and Kirmani, all support the reading now adopted.

Copper coins of all the denominations were issued from this mint in the years 1215 to 1219, both included. Moor records and figures a paisa dated 1201, but as it has not been met with since his time it is possible that a coin of 1215 has been misread. Attention may be drawn to the two sizes of paisa issued in 1216. The coins of 1215 show a treble-lined border on both sides, while those of the later years have a double-lined circle enclosing a row of oblique dashes.

Many of the coins of this mint are still fairly common, in particular the half-paisas of 1217 and 1218; the coins of 1215 and 1219 are, however, less frequently met with than those of the other years. The double-paisas and one-eighth paisa are rare, and none of the quarter-paisas is common.

6. KALİKÜT كليكرت

(Kolikod, cock-fort).

Calicut, the capital of the Malabar district, was taken by Haidar Alī in 1766 from the Zamorin or local ruler, who to evade capture allowed himself to be burned alive in his palace. Comparatively little was done to control the captured district, and the inhabitants led by the Nayar chiefs soon broke into revolt. In 1773 a force was sent by Haidar to Calicut, which quickly brought about the reconquest of the whole of Malabar. The town was taken by a British army under Major Abington in 1782, but was restored to Tīpū Sultān later. Tīpū himself visited Malabar early in 1788 and made a stay of several months, during which arrangements were made for transferring the seat of government from Calicut to Feroke. Calicut was taken by British troops towards the close of 1790, and by the treaty of Seringapatam in 1792, the Malabar district came under the jurisdiction of the East India Company. The usual spelling of the mint-town is that given above, but on some of the . كليكوت coins it is Kalīkūt

Coins were struck at Calicut in gold, silver and copper, from the second to the fifth years of Tīpū's reign. The gold coins consist merely of fanams, which appeared in all the four years that the mint was active; the only silver coins known are two varieties of double-rupee struck in 1215, of which, judging from their present scarcity, the issue must have been very limited. The copper coins, so far as is known, consist only of paisas and quarter-paisas.

The oldest dated coin is a thick coarsely executed paisa of 1198, in which the name of the mint-town is to the right of the field, and some of the letters appear to be placed at right angles to those making up the rest of the inscription; in some examples the inscription has degenerated into a mere scrawl (vide Neumann, pl. 45, no. 20088). One of the words which Jackson reads sanah,

appears to me to be بند bundar, a word which occurs clearly on another Calicut coin (No. 422). In the paisa of 1199, while the figure of the elephant is very crude, the inscription is more carefully executed. There is a variety of the last coin in which the elephant has a thinner body than usual, and extremely slender legs. The later paisas are all well made, and a feature of special interest is that the regnal year 4 is recorded on paisas of both 1200 and 1215. Very few instances are known of regnal years being recorded on the copper coins of Tīpū Sultān, this mode of reckoning being practically confined to the gold and silver issues. The undated paisa (No. 422) inscribed غرب بذه (struck at the port Kalīkūt), from its general appearance is probably an early coin. The quarter-paisas are all undated, and in some of them the inscriptions are very degenerate.

The gold and silver coins have the usual borders; while in the copper series may be found a pearled circle, a plain double-lined circle, or more commonly the usual double-lined circle enclosing a row of dots.

The gold fanams of Calicut are not uncommon, but as already indicated the silver double-rupees are of great rarity. None of the copper coins is now commonly met with, except perhaps the paisa of 1215 with the date reading from right to left. The undated paisa is extremely rare.

^{*} Tufnell (pl. III, 152) figures a variety of this coin in which the right forefoot of the elephant is distinctly raised. The same writer records a paisa of 1218, but it appears out of place among the coins of 1215 in his catalogue, and the record is doubtless an error.

رخى 7. FARRUKHİ نرخى

(Prosperity.)

This name was given to the place now known as Feroke, situated on the south bank of the Beypore River, about seven miles to the south of Calicut. In 1788, Tīpū Sultān, no doubt prompted by similar reasons to those which led to the destruction of the town of Mysore, demolished Calicut and commenced the erection of a fort a few miles away, around which in course of time it was hoped a new Calicut would arise. The fort was still unfinished on 10th December 1790, when it was taken by Colonel Hartley, after the defeat of Tīpū's army under Husain Alī. The designation of this mint is no more intelligible than are most of Tīpū's newly invented names, but in this case it has persisted to the present day, thus affording a solitary instance of the term which he adopted coming into general use.

The coins of this mint, which were issued during the years 1216, 1217 and 1218, consist of gold fanams, and in copper of a double-paisa, and single, half and quarter-paisas. Moor in his "Narrative of the Operations of Little's Detachment" (p. 475, pl. II, fig. 2), describes and figures a double-paisa of the year 1219, but there can be little doubt that he has misread a similar coin of the previous year, for the year 1219 actually commenced a few months after Farrukhi was captured by the British. Both Weyl and Jackson record a quarter-paisa dated 1226, doubtless a die error for 1216.

In the majority of the copper coins the ornamental border on both surfaces consists of the usual row of dots between two lined circles, but in two of the paisas of 1216 the dots are replaced by curved dashes.

The paisa of 1217 is still commonly found and that of the following year is not uncommon. The other coins are less frequently met with, the double-paisa, the paisas of 1216, and the quarter-paisas being all rare. The gold fanams are not uncommon.

هلم اباد 8. SALAMABAD ملام اباد

(The City of Peace.)

This name was applied to the town of Satyamangalam, situated on the Bhavani river, in the northern part of the Coimbatore district. It was a place of considerable military importance during the campaigns of Haidar and Tīpū, because it lies close to the passes through which troops descended to the low country from the Mysore plateau, when operating in the south and towards the west coast. The town had been in the possession of Mysore for about a hundred years before Haidar came into power. It was captured by British troops under Colonel Floyd, in August 1790, but was afterwards abandoned. Satyamangalam remained in the possession of Tīpū up to the time of his death.

A series of roughly executed copper coins was issued from this mint in the years 1216, 1217 and 1218. In all of them, with the exception of a half-paisa of 1216, there is a wide marginal double-lined circle crossed by radiating lines, while in the half-paisa just referred to, the space between the two circles is occupied by three-branched flowers which almost resemble arrow-heads, pointing around the circumference.

The coins of this mint are all more or less rare, the paisas of 1216 and 1217 being perhaps more frequently met with than any of the others, while the quarter and one-eighth paisa are both extremely rare.

9. KHĀLIQĀBĀD خالق اباد

(The City of God.)

This fanciful appellation was, we have every reason to believe, given to Dindigul, an important town in the Madura district, with an isolated rock which was formerly strongly fortified rising 280 feet above the surrounding country. It first became included in Mysore territory in 1742, and thirteen years later Haidar Alī was appointed military governor of the place, an appointment which may be said to have been the commencement of his rise to power. Dindigul surrendered to Col. Wood in August 1767, but was retaken by Haidar in the following year. It surrendered once again to Col. Lang in May 1783, and was restored to Tipu Sultan by the treaty of Mangalore in 1784. It was subsequently taken by Col. Stuart on 22nd August 1790, from which date it ceased to be included in Mysore, and was finally placed under the control of the East India Company by the treaty of 1792. It is on record that Tīpū visited Dindigul in 1788, after founding Farrukhī, but the coinage of Khāliqābād dates from a year earlier than this visit.

Hawkes in 1856 recorded the statement that Khāliqābād was a name given by Tīpū to Chandagāl, near Seringapatam, and this attribution has been followed generally by later writers. In Dr. Taylor's memoir The Coins of Tipū Sultān, issued in 1914, will be found, however, a series of arguments, supplied by the present writer, in favour of identifying the mint with Dindigul rather than Chandagal, and these may be briefly recapitulated. Chandagal is an insignificant village at the southern end of the main ford over the River Cauvery to Seringapatam, and is almost within stone throw of the latter place. It is extremely unlikely that Tipu would locate a second mint so near his chief one, and the places selected for coinage operations were always of importance in some way or other. The coins, which were only in use for a few years, are of coarse execution, and the dies were evidently made by workmen who were ignorant of the characters, which could hardly have been the case in a place close to Seringapatam. Many of the coins are not rare at the present day in the Madura district, and they are certainly commoner there than anywhere else, while of a number of Tīpū's copper coins collected for me at Dindigul some years ago, the majority were of the Khāliqābād mint. In the History of the Reign of Tipū Sultān by Mīr Hussein Alī Khān Kirmānī, it is definitely stated that Khāliqābād was another name for Dindigul. and although Kirmani is not always correct in his statements, this one may perhaps be accepted. It is in every way likely that such an important fortified town as Dindigul, dominating as it did the northern entrance to the Madura district, would be selected as a fitting location for a mint.

One of the commonest coins of Khāliqābād is a quarter-paisa apparently dated 1225, an impossible year for Dindigul, but as will be seen from the catalogue there are numerous variations of this coin, and I think there can be little doubt that they are the work of Tamil die-cutters who were ignorant of the Arabic numerals, and the year intended was really 1215.

Gold fanams, and copper paisas, half-paisas and quarter-paisas, were struck at Khāliqābād from 1215 to 1218. The last year is recorded by Marsden and Taylor (vide Coins of Tipū Sultān, pl. I, fig. 3), but as will be seen from Taylor's figure the last numeral of the date is not erect, and some doubt may in consequence be expressed as to whether the year is not 1217. The coins are all roughly executed and the date is very frequently blundered.

The most usual border is a double-lined circle enclosing oblique lines or dashes, but on some coins the oblique lines are replaced by objects resembling arrow-heads, or \land - shaped cross-bars.

The gold fanams are now rare, and with the exception of some of the blundered quarter-paisas of 1215 which are not infrequently met with, none of the copper coins can be said to be common. In fact the paisas must be described as moderately rare.

نافراباد ZAFARĀBĀD ظفراباد

(The City of Victory.)

This name was at first assigned to Mercara, the capital of Coorg, but in December 1785 (1200 A.H.) it was transferred to Gurramkonda (vide Kirkpatrick, pp. 206, 224). From their dates none of the coins could, therefore, have been struck at Mercara.

Gurramkonda, a town in the Cuddapah district with a strong hill-fort, was taken by Haidar Alī in 1768 from the Nawābs of Cuddapah, who owed allegiance to the Nizām. A few years later it surrendered to the Marāthās, from whom, however, it was recaptured by Tīpū Sultān early in 1774. In 1791 the town was invested by British troops and a strong force of the Nizām's, but the fort managed to hold out till the following year, when peace was declared. By the treaty of 1792 the Cuddapah district was restored to the Nizām, by whom in 1800, it along with the Bellary and Anantapūr districts was ceded to the East India Company.

The coins of this mint consist of a small series of paisas and of half and quarter-paisas, struck from 1215 to 1218, but no coin of the year 1217 has yet been recorded. In most of them the border consists of the usual double-lined circle enclosing a row of dots. Two of the half-paisas, however, exhibit peculiar borders; in one of them the double-lined circle on both sides encloses objects resembling arrow-heads, while in the other the border just described occurs on the reverse, and the obverse has groups of three short concentric lines within the double circle.

The least rare of the Zafarābād coins is the half-paisa of 1218, which is still occasionally met with. All the other coins of this mint are more or less rare, and some of them are now very seldom met with.

II. DHĀRWĀR دهار وار خورشيد سواد KHWURSHED-SAWĀD

(The sun-blackened place.)

From Dhārwār, the chief town of the district of the same name in the extreme south of the Bombay Presidency, were issued in the year 1216 two coins in gold and one in silver. In the two following years a limited number of coins in gold, silver and copper, were struck at the same mint, to which the fanciful name Khwurshed-sawād was now applied. This strongly fortified town was taken by Haidar Alī from the Marāthās in 1778, the garrison of the fort being deceived by an ingenious stratagem. It finally surrendered to the combined British and Marāthā army on 7th April 1791, after a siege of twenty-nine weeks. By the treaty of Seringapatam it was, in the following year, restored to the Marāthās.

The pagoda with the mint name Dhārwār follows the earlier or sultānī type, while the two later pagodas, in which the mint appears as Khwurshed-sawād, conform to the fārūqī type; in all three the border consists of a lined circle enclosing a row of dots, but in the two later coins and on the reverse of the oldest one the circle appears to be single. The rupees also bear the two mint names; all belong to the later type or imāmī, and the border is a single or double-lined circle enclosing a row of dots. Only three copper coins are known, and these have a distinctive border consisting of a wide double-lined circle enclosing dots in groups of three, arranged in triangular fashion, with considerable intervals between. Two peculiar 'arrow-head' marks are noticeable on the reverse of the paisa of 1217.

The coins of this mint are all more or less rare, the paisa of 1218 being perhaps the least rare. The rupees are of considerable rarity, and the same may also be said of the half-paisa.

نظر بار NAZARBĀR نظر بار

(Scattering favour.)

In 1787, Tīpū Sultān wishing to destroy the evidences of Hindu power, demolished the old fort and town of Mysore, and erected a new fort about a mile to the east of the older one, to which the above fanciful name was given. Mysore or Mahishūr derives its name from Mahishāsura, the buffalo-headed monster destroyed by Kāli, who is locally known as Chāmundi. It has been the capital of the State since the death of Tīpū, but it was an important city, and the seat of the Rājās or Wodeyars, long before the Muhammadan usurpation. The fort of Nazarbūr was still unfinished in 1799, and the stones used in its construction, which had actually been taken from the old fort, were brought back and used in the restoration of the latter.

The coinage of this mint is limited to a paisa, half-paisa and quarter-paisa, struck in 1216, all of which are somewhat rare, the half-paisa being, however, more frequently met with than the other two. The border in all is a double-lined circle enclosing a row of dots, as in the Seringapatam coins. Mysore is only a few miles distant from Seringapatam, where possibly the Nazarbār coins were actually struck.
