Main Drain traversing the North Esplanade of the Fort.—The former orders of Government respecting the drainage of Black Town not to militate against the orders of the Court for the immediate construction of the —	18th May	41
The Committee for reporting on — observe that the scheme proposed by Captain Boulderson, owing to peculiarities in the main sewers of Black Town, is not likely to succeed, but will most probably increase the evils it is intended to remove. Propose the re-modelling of the large drains and the adoption of a new system of drainage with a supply of water for the whole of Madras on the principle of pipe-drainage. Propose also the filling up of the ditch joining the cesspool on the north esplanade with the Cooum river. Also that the floor of the sewer at the north-east angle of the fort be raised at once to such a slope as the levels will admit of without diminishing the capacity of the drain so as to reduce its efficiency. The Right Honorable the President requests that Captain Boulderson's plan is considered objectionable, does not think that Government can do anything in the matter until an officer can be found who is capable of reviewing both Major Boulderson's plan and the Committee's proceedings. The Honorable Mr. Thomas considers the plan proposed by the Committee as far too comprehensive; thinks that instead of the present open-mouthed drains, it will be sufficient to substitute tanks at the lowest practicable level so as to give the greatest amount of inclination to the drainage, and to lift the sewage from them by mechanical means; is if opinion that the Town of Madras is, on the whole, one of the healthiest towns of its size in the world. The Honorable Mr. Eliott considers the Committee's proposal too comprehensive; thinks however a plan and estimate should be called for for the improvement to the floor of the sewer at the north-east angle of the fort as proposed by the Committee. Directed the plan to lie over for the present. The Military Board to submit estimates of the cost of filling up the ditch alluded to by the Committee and for raising the floor of the sewer at the north-east angle of the fort ..	6th Apr.	25-30
