Drainage of Black Town. 10

The Committee for reporting on observe that the Scheme proposed by Captain Boulderson owing to peculiarities in the Main Sewers of Black Town is not likely to succeed but will most probably increase the evils it is intended to remove. Propose the remodelling of the large drains and the adoption of a new System of drainage with a supply of water for the whole of Madras on the principle of Pipe drainage. Propose also the filling up of the ditch joining the Cesspool on the North Esplanade with the Coum River. Also that the floor of the Sewer at the North East Angle of the Fort be raised at once to such a Slope as the levels will admit of without diminishing the capacity of the drain so as to reduce its efficiency. The Right Honorable the President requests that Captain Boulderson's Plan is considered objectionable does not think that Government can do any thing in the matter until an Officer can be found who is capable of reviewing both Major Boulderson's plan and the Committee's proceedings. Honorable Mr. Thomas consideres the plan proposed by the Committee as far too comprehensive thinks that instead of the present open Mouthed drains it will be sufficient to substitute tanks at the lowest practicable level so as to give the greatest amount of inclination to the drainage and to lift the sewage from them by mechanical means. Is of opinion that the Town of Madras is on the whole one of the healthiest Towns of its size in the world. The Honorable Mr. Eliott considers the Committee's proposal too comprehensive. thinks however a Plan and Estimate should be called for for the improvement to the floor of the Sewer at the North East Angle of the Fort as proposed by the Committee.
