expenditure is limited to what they have authorized for the undertaking I is of opinion that the Government Foundry is a useless expensive establishment calculated to do harm, and to repress the outlay and efforts of private Capitalists & advises therefore that its final abolition be proposed to the Honorable Court and that pending a reply the Public work done in it be confined to the smallest amount and that none on private account be permitted on any pretence — observes that the correspondence on this subject should be sent to the Home authorities by an early opportunity — — — — — — 10 Sept 1853 No. 37

Under the circumstances noticed observes that the Steam Boats now on the Godavery have not only been built without authority but in direct disregard of the orders of Government that to maintain an establishment like the Foundry at Dowlaiswaram for such purposes is at variance with the Public interests and the good of the Service and that whatever specious reasons may now be advanced to the contrary it is a mere cloak for indulging in personal schemes in which the public money is squandered Comments on the proceedings of the Officers in charge of the Godavery Division and regards his final opinion that the only effectual course to remedy the evils attendant on the Foundry and the unauthorized large outlay to which it has led is to suffer it at once and to prohibit the formation of any more Steam Boats as well as any new establishments being longer kept in the public employ to work those that have been already built contrary to orders considers it highly desirable that these questions should be referred at the earliest period to the Honorable Court for their final decision — — — — — — — — — — — — — — 4 Augt No. 23 a d

Considers the project of an anicut across the Palaur River at Arcot to be a very admirable one and one of which the benefits cannot be overrated and the Plans & Estimates prepared by the Civil Engineer of the 4th Division to have been prepared with the greatest care and skill such as to entitle them to perfect confidence. Is of opinion that the Palaur Anicut will effectually protect the Districts which it is intended to fertilize from all possibility of scarcity or famine so far as human means are available to effect that end and proposes that the project be immediately submitted to the Honorable Court with the strongest recommendation of this Govt that it may meet with their early sanction — 25th May 1853 No. 48 — 13 Sept 1853 No. 61 — 22 Sept 1853 P.1

trust that if his energy and the aid of the Revenue authorities the Dollar amount will be rendered available for the approaching season. The Govt is not however satisfied that the disaster which has occurred is entirely caused by the floods during the present year and doubt whether such serious results would have followed the floods, if the foundations of the work had been in proper repair above that the Bd. must be well aware of the necessity of constant examination of these works with the view of arresting the progress of any defect of strengthening points where pressure may have exposed them to danger of filling up holes found by the current close to the work and of clearing the bed or banks of the River above of accumulations of sand which might divert the stream from its proper course Govt desire to be clearly informed whether during the year 1852 such precautions were taken by the then Civil Engineer of the Division whether after the Monsoon of 51. the embankment was carefully examined by that Officer and whether any & what measures may have been then adopted for its security — — — — — — — 18th Augt. 16th Augt. 1853 No. 39
