12. Oct. 17. Oct. 18. 3

6373

Order

The Chief Engineer requested to forward this letter to Lieut. Falconnet and to report whether that Officer is competent and desirous to undertake the duties of Executive Officer at Tougou.

NW

6374 From the Chief

Suggesting that as it has ceased to be desirable that Para 26 of L.O.L. of 17th July 1846, should at present be enforced, that young Engineer officers should on arrival and before employment as Civil Engineers, undergo certain probationary course under the eye of the Chief Engineer himself.

12. Oct.

14

6435

Order

Govt. approve of this suggestion, and desire that it may be carried out and be enforced so long as Para 26 of the L.O.L. of 17th July 1846 may continue in abeyance. Govt. is of opinion that a limit should be placed to the residence at the Presidency of these young officers, and resolve therefore to require that the Chief Engineer report at the expiration of 2 months from date of arrival of each Officer whether he is qualified for employment in the Depart. of Public Works, and if not how much longer will be required for his becoming so.

2. Oct.

33

6437

From the Chief

Reports that he considers Lieut. Falconnet quite competent to perform the duties of a second Class Executive Engineer, but advises that he should make himself familiar with Estimate making &c. and the general official routine current at Tougou.

Communicating letter from the officer in charge of the Govt Central Museum regarding Geological Surveys, with a view to its being ascertained whether the proposal of Surgeon Balfour to depute one of the Native servants attached to the Central Museum to South Arcot for a Geological examination of the Country should be adopted. With reference to the statement of Dr. Balfour that a perusal of the Writings of Amateurs who have been engaged in Geological pursuits in that district does not hold out prospects of Mineral wealth being found there, observing that the object in recommending that a Geological survey should go hand in hand with an Assessment was for ascertaining the nature of the soils for agricultural purposes and that in this point it is not of consequence whether there be mineral wealth or not in a District, that a Geological survey would discover whether there were indications of Mineral Wealth. — 26th Oct at 52

Submits information regarding the condition and prospects of the season as called for by Government and observes that the Collector of Gungum states that the harvest has failed in his District to the extent of $\frac{3}{4}$ but that there will be quite sufficient grain to meet the demands for local consumption also that the reports of the authorities having interfered to prevent exportation are totally unfounded and have been taken up by interested parties further that the public works projected will be sufficient to employ all who may require assistance under the circumstances brought to notice states that the Collector strongly urges the continuation of a channel from Akard to Musulipatnam for purposes of navigation irrigation and for the conveyance of goods water to Musulipatnam which is much in want of that irrigation -

Objects to the modifications suggested by the Secy. Standard of the Madras Civil Service when compared in comparison with that either of Bengal or Bombay. Thinks that all anomalous cases would be better provided for by leaving to the Governor in Council to dispose of them than by attempting to lay down Rules to embrace every instance.

Minute by the Right Honourable the

Adheres to the objections recorded in his Minute of the 19th ultimo to the modifications which have been suggested by the Secy. to Govt. and B^y of Rev^y in the rules for the examination of the junior Civil Servants observed that the Rules for examination which have been proposed may prove hardly in individual cases but that the concluding ⁱⁿ part of his Memorandum of 19th November last as well as some of the remarks of the Honorable Mr. Thomas for the provision of all anomalous cases provide amply for all exceptions states that he would rather see the exceptions however numerous they may be so provided for than that the standard of the Madras test should be lowered so as to give an opening for injudicious comparisons.

Minute of Council thereon

Agrees with the Rev^y B^y that the presence in the Ryots in the District of North Arcot from the evil of over sowing or double crop land is probably counterbalanced by the larger proportion of what is rated as single crop land actually producing two crops in the season. Thinks that the B^y was right in recommending that the obligations imposed at present on the cultivators of double crop land should not be withdrawn and that the earliest opportunity should be taken to send a branch of Capt. Prically's survey to begin in the Southern Taluques of North Arcot observes that of the great advantages of and urgent necessity for a general survey there can be only one view but that without fully qualified and efficient European supervision it will prove a failure & records his unqualified opinion that it will not do to trust to Native Agency in this matter observes that should it be necessary to have additional establishments for the partial survey of the Taluques of North Arcot donations may be applied for to the Govt. of India as a preliminary step.

Observes that in proposing Mr. Porter, late Coll. of Masulipatam for the office of Civil Auditor he could not fail to bear in mind that throughout the long and minute legal investigations which have been so long carried on in connection with his management of the Masulipatam District, nothing had appeared to implicate him in any form beyond his candour and over confidence in his Head Sheristadar, that he had already suffered a heavy pecuniary loss and punishment thereby, that he has always borne the character of a most faithful and honorable public servant. Under this explanation trusts that the Honorable Court will confirm what Govt. has done in the matter.

Concurs in the views and suggestions set forth, and offered, in the Memo. of the Secretary to Govt. on the present system of Annual reports on the Rev^y from Land and Extra Sources, and recommends that the B^y of Rev^y and the Com^y for the Northern Circars be directed to place themselves in communication and to propose an outline of a form for all Reports from the Revenue authorities in the Districts including Land and Extra Sources of Rev^y combined, as well as from the Board of Revenue and the Com^y. Thinks that a great deal of the argumentation and prolix style of many Reports, and the constant and uncalled for repetitions of the same topics would be obviated, by a General report, such as Mr. Pycroft recommends, and that it is desirable to enjoin on the Collectors and Sub Collectors the advantage of being kept diffuse in their periodical Reports. Feels personally thankful to Mr. Pycroft for having placed this important proposal before Govt. in the clear manner he has done, and observes that should it be necessary the subject be at once intimated to the Honorable Court for their approval.

Doubts the advantage likely to spring from the proposed extension of the Samuleottah Channel to Toner in Rajahmundry being such as to authorize the large outlay required, and as it is stated to be altogether a new work, thinks that it should be submitted to the Court of Directors before it is sanctioned. Observes that the employment of the people is the strongest argument in its favor at present, but that, that object has been provided for by the orders already issued and without at all disapproving of the Project states that he would prefer seeing that large sum expended in Roads than in Canals for navigation. Observes that a further obstacle to this Project is the want of efficient superintendence, which in a work of the kind is of the last importance, and that this cannot be obtained without drawing some of the officers away from the Amnicut.

Considers in the apprehensions of the local authorities that the proposed Canal to be cut from the Coarney River to the Tandiman Rajah's country is not unlikely to reduce the supply of Water below what is always wanted for purposes of Irrigation. Observes that no risk stands before him on that point and that he has observed nothing in the conduct of the Tandiman Rajah to be relied on for his undertaking and carrying through such a work which will not merely bring with it a heavy charge but will lead to large demands on the Rajah for injury done to Private property. For these reasons suggests that if the matter is intended to go further it may be referred not only for Minute inquiry and report to the Agent at Passacotta but to the Board of Trichinopoly and all other Revenue authorities in the Districts. Wholly dissenting from the views laid down by the Board of Public Works with regard to the more extended project of opening Canals with the apparent object of superseding Roads in the Madras Presidency and advises that whatever may be decided on by this Court it may be submitted to the Revenue authorities before any orders are issued.

Considers with the Honorable Mr. Thomas that the Report of the Engineer of the Division is essentially misgiving on the proposition from the Rajah Tandiman to cut a Canal from the Coarney to his Territories and observes that he has no hesitation in condemning the whole Project which is one of the wildest that has been recently laid before Court. Observes that should his Honorable Colleagues view it differently there can be no difficulty in its being opened up that his recent misapprehension of the Tandiman Rajah has become such as to lead him to think that even were there no other reasons he is not deserving of the interest proposed to be taken in him and that it will be better to reject him when he makes his candid Request that his views on this case may be submitted to the Honorable Court when the Paper goes home.

on in the letter from the D^y of Riv^y regarding the
survey of the South Arcot Collectorate under Cap-
tain Priestly, and suggests that in addition to
the three Parties recommended to be placed under
Captain Priestly, that officer should have two
commissioned Assistants, that is Commissioned Officers
attached to him, and that as soon as he pronounced
them fit to be trusted with independent charges
they have each three Parties assigned to their
supervision, so that there will within no very
distant period, be three Superintendents and nine
Parties at work. Thinks such an arrangement
to be not merely most desirable as rapidly acce-
lerating the survey of the Country but as providing
for the absence, from sickness or any other
cause of Captain Priestly; Thinks that the memo-
randum drawn up by the Revenue Secretary
to Govt on this subject contains opinions deserving
of the deepest consideration, and observes that
he had in a slight degree anticipated Mr.
Pycroft's views by advising the organization of
an Establishment of three times the strength of that
proposed by the D^y to be under Captain Priestly
concurs in his suggestions that if the survey is to
be made a General one, it should be quite
removed from the supervision of the Revenue Board
and placed under that of a Civil Officer of high
Rank and experience who should devote his
entire time and energies to overlooking and guiding
it and that were it thought expedient he might
be made an Extra Officer Member of the Revenue

With reference to the Estimate Amounting to Rs 22,883-4-8, for excavation of a Channel for the Manaccondanar in Tanjore. Observing that it is very unfortunate that it should be so generally unknown or disregarded by the Superintending Engineers that Govt. has not the power of sanctioning works beyond a certain sum without the confirmation of the Govt. of India; that proposals are in consequence made which may be very necessary but which cannot be acceded to at once in consequence of the very narrow restrictions placed on the discretionary powers of this Govt. Thinks that it would be unsafe to commence the minor Channels connected with the Manaccondanar without previously forming the main one, on which they will depend and that the matter must therefore be referred to the Govt. of India. Is of opinion that Collectors and Officers of Engineers should be distinctly warned about

about this, in order that they may make their applications at an early period, and that it is more particularly necessary that this course should be adopted in seasons like the present, where the lives of many of the Ryots and of their families may be hazarded by delay in affording them aid by employment. Think it worthy of consideration whether under the circumstances the work should not be sanctioned at once.

Is of opinion that Mr. Collyer of Bellary has made out a case for early interference which has not been met by the observations of the D. of B. that the reductions that have already been made in the rates fixed by the original survey can leave no doubt that that operation was conducted on false principles by the exaction of a higher rent than the land could possibly bear, and that this error seems to have been prominently committed in the Goollem Talook, which is therefore the one to which the Act. Collyer most wisely proposes to apply the first and immediate remedy.

Is of opinion that the principle laid down by the Govt. of India in 1847 Viz. that the revenue derived from Forest products however small should not be relinquished so long as they can be collected without oppression is a correct one, and that it is most important as regards the Govt. and the people that, however small the amount collected, it should not be relinquished for political, moral, and economical reasons. For reasons stated considers that the political and moral reasons for outweigh the question of expediency, but economically that the Rumani system is very objectionable and that other measures should be tried before resorting to it. Thinks the renting system a fairer one, if care be taken that there be competition and that well defined conditions be laid down and strictly enforced and that the relinquishment of the tax is a mere avoiding of or rather escaping from the difficulty rather than overcoming it, and by no means

Recommended with reference to the order of Govt. dated 10th instant that Civil Engineers who had been nominated to act as Civil Engineers of the 2^d Division may be at once appointed as Superintendent of the Eastern Coast Canal in anticipation of Sanction. State that, under the new rules for the preparation and submission of a Budget, Major Lawford and Capt. Poileau should remain in their present divisions till the end of the year to draw up the projects for 1855/56 and that if the proposition be approved it will be easy to make provision for the succession to the 2^d Division before the end of the year. Recommend further that the question as to the Cuddalore Port may be determined by the Chief Engineer, Major Lawford and Capt. Poileau & Duclutery, without Capt. Poileau who may be left to the guidance of the opinions recorded by those officers after their consultation.

Order

Govt. observes that by their orders in Extract mins of Com: 22^d Decemr it was left open to the Coll^o to issue food gratuitously in cases of event destitution and where the parties were physically incapable of labouring. Govt. sanctions the amount already expended upon that account being charged upon the surplus Chattram or funds as proposed by the Coll^o and permits him to continue to issue food in such instances as those referred to in his letter on the express condition that the relief is limited to such extreme cases and is withdrawn at the earliest period that circumstances will allow.

Authorized accordingly but Govt will determine when a copy of the decree is submitted whether the costs if any be adjudged against the Collr shall be borne by that Officer or by the Govt. Govt would however prefer if the Plaintiffs could be induced to withdraw the suit by the Collr giving them a guarantee that in the event of their sustaining any loss consequences of the work full compensation will be made to them. If they persist in their legal proceedings in spite of this assurance the action must go on and the answer may then be put in as proposed
