Vandiyur Tank, Periyar Project

The execution by the Public Works Department of the construction of a 3" iron pipe sluice to the left of the weir at the right flank of —, sanctioned with remarks.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

READ—the following papers:—

I

Letter—from C. A. SMITH, Esq., Superintending Engineer, VI Circle.

To—the Chief Engineer for Irrigation.

Dated—Camp, Tadpatri, the 21st February 1906.

No.—132 C.E.

In forwarding herewith an estimate, amounting to Rs. 75, for constructing a 3" iron pipe sluice about 250 feet to the left of weir at right flank of Vandiyur tank for feeding a small urani, I have the honour to inform you that the Executive Engineer reports that the cost will be borne by the villagers themselves, but the work will be carried out under the supervision of the Public Works Department without any centage charges. I request you therefore to be so good as to move Government to waive the percentage charges as the work is chiefly for the interest of the general public. A report is attached to the estimate.

ENCLOSURE.

Report to accompany the estimate for constructing a 3" iron pipe sluice about 250 feet to the left of weir at right flank of Vandiyur tank.

	RS.
Amount of estimate	75

The estimate has been prepared on the petition of the villagers of Managiri and it provides for a 3" iron pipe sluice (high level sluice) for feeding a small urani about 250 feet to the south of the weir at right flank of Vandiyur tank. The cost will be borne by the villagers themselves, but the work will be done under the supervision of the Public Works Department.

The capacity of the urani being 90,000 cubic feet and the number of fillings—four times a year. The supply of Periyár water to this urani will not only be beneficial to the villagers but also will not in any way be detrimental to the interest of irrigation supply.

As the work is for the interest of the general public use, the work can be carried out by Public Works Department without centage charges.

A. V. RAMALINGA AIYAR,
Executive Engineer, Madura Division.

II

Note by the Chief Engineer for Irrigation.

The Superintending Engineer, VI Circle, submits an estimate, amounting to Rs. 75, for constructing a 3" iron pipe sluice about 250 feet to the left of the weir at the right flank of Vandiyur tank, Periyár project. It is stated that the sluice is intended to supply a small tank and that its cost will be borne by the villagers interested. As the work is chiefly in the interests of the general public, the Superintending Engineer proposes that the work be carried out under the supervision of this department, the percentage charges being waived. The Superintending Engineer's recommendation may be approved.

2. The proposed work will, after execution, become the property of Government under G.O., No. 899 I., dated 15th November 1894.

29th March 1906.

F. J. WILSON,
Chief Engineer for Irrigation.

Order—No. 367 I., dated 2nd April 1906.

The execution by the Public Works Department of the work referred to is sanctioned, the percentage charges being waived.

2. The attention of the Superintending Engineer is drawn to paragraph 2 of the Chief Engineer's note.
