BORROWED

equation K. In it, we can see that the
number of features in the novel set of words
is less than that in the original set of words.
This study revealed that when the features
of the novel set of words are compared with
those of the original set of words, there is a
marked reduction in the number of features.
The result shows that the features of the novel
set of words are more similar to those of the
original set of words than they are to the
features of the original set of words. This
implies that the novel set of words is more
similar to the original set of words than
they are to the features of the original set of
words. The results of this study suggest
that the novel set of words is more similar
to the original set of words than they are to
the features of the original set of words.

FOREWORD

‘Gowda Kannada’ by Dr. K. Kushalappa Gowda is the result of his research on the Gowda dialect of Kannada spoken by the caste Gowda. This dialect has many peculiar features which are not found in Standard Kannada and it was thought that it would be very useful, in many ways, if these features are brought out and are made known to linguists in general and to Dravidologists in particular. When this was suggested to Dr. Gowda he has cheerfully taken up the work and I am very glad that it is now possible for us to place the present monograph before all who are interested in this type of study.

MONITORING

Monitoring is the systematic collection and analysis of information about the performance of a program or activity over time. Monitoring is often used to determine if the program or activity is being carried out as planned and if it is meeting its intended goals. It can also be used to identify problems and make changes to improve the program or activity. Monitoring is typically conducted by a third party, such as a government agency or a non-governmental organization. Monitoring can be done at different levels, such as individual, organizational, or national. Monitoring can also be done at different times, such as during the planning phase, implementation phase, and evaluation phase. Monitoring can help to ensure that programs and activities are effective and efficient, and can help to identify areas for improvement.

MONITORING & EVALUATION

Monitoring

Evaluating
by comparing to what
existing in

evaluating
and evaluating
the level of change
in the system

level of change

level of change

Monitoring and Evaluation are two related concepts that are often used together. Monitoring is the process of collecting and analyzing information about the progress of a program or activity over time. Evaluation is the process of determining the effectiveness of a program or activity based on the information collected through monitoring.

INTRODUCTION

The term '*Gowda Kannada*' is used to identify the dialect of Kannada spoken by a people called Gowdas, who are the natives of the areas of Puttur, Sullia and Mercara taluks of the present Mysore State and also in the eastern part of Kasargod taluk which is now attached to Kerala state. The number of Gowdas is estimated to be about sixty thousand.

The ethnic relationship of this community to the Gowdas, the predominant community of (Old) Mysore state is not clear. The Gowdas of Puttur, Sullia, Mercara and eastern part of Kasargod Taluks have distinct social, cultural, and linguistic features. They have sub-groups based on clan or go:tra (known as *ba:i*). The tradition says that originally there were ten families. When some outsiders also were taken into this community, they were assigned to a new go:tra, with the result that there then existed eighteen go:tras. Marriages between persons belonging to the same go:tras are forbidden. The names of the well-known go:tras are : *nanda:ri*, *baṅga:ri*, *na:yeri*, *mu:la:ri*, *va:ga:ri*, *hemmana*, *kaburu* and so on. The Gowdas follow the patriarchal family system.

The religion followed by them is Hinduism and they have not been influenced by any particular sect like '*saivism*' and '*vaisṇavism*'. Moreover, they have their own local deities and '*kuladeivas*' (family deity) - which are entirely different from veidika deities. For long time, the worshipping of these deities in the traditional manner used to take place, in every family, before the starting of agricultural work and

soon after the harvest. All members of the family would gather at that time under one roof, and if there were disputes between any members of the family, they would be settled by all those who were gathered there. However, everywhere, traditions are fast becoming taboo, and the peaceful, co-operative and homogeneous social life is splitting into disunited, disorganised and individualistic social system. Gowdas are no exception to this.

There are two linguistic groups among the Gowdas : (1) Tulu speakers and (2) Kannada speakers. The Tulu speakers are predominant in the western parts of Puttur, Sullia and Kasargod Taluks, while Kannada speakers are more predominant in the rest of the region. Except the language difference, all other customs are same between the two linguistic groups.

The dialect of Kannada spoken by the Gowdas differs considerably from SK, the standard dialect used in schools and other official and inter-community transactions. The main differences are in (1) Phonology and (2) in Grammar. GK has a higher number of vowel phonemes than that of SK (e.g. : i, ə, ε, and ɔ). In the consonantal system, GK has a phonemic distinction between voiceless and voiced stops like SK, but does not have aspirated stops at all, even in borrowed words. GK has only the fricative /s/, whereas SK has three fricatives /s/, /s'/, and /ʂ/. In morphology, only two genders—(Masc. and Neuter) are distinguished in the Third person Pronouns in GK. The feminine is a separate entity in SK, having distinct pronominal endings in verbs. There is only one common plural in the Third Person Pronoun in GK; whereas, in SK, a distinction between superior and inferior is made. Also in GK, no distinction is made

between the Accusative and Genitive cases. In SK they are distinct. There are a number of differences in verb constructions also between GK and SK. The use of common pronominal termination in the Past finite verb and the non-distinction of superior and inferior category in verbs (*āvā ba:ti*) 'he came', *adi ba:ti* 'she or it came'; *avu bands*, 'they came' (i.e. men, women, animals or things) may be cited as an example for the difference of verb construction of GK in comparison with SK, where, Masculine, Feminine and Neuter terminations are distinct in all verb constructions and also in plural, there are two categories as superior and inferior pl. e.g.: *avanu bandanu* 'he came', *avaļu bandaļu* 'she came', *adu banditu* 'it came', *avaru bandaru* 'he or she (i.e. persons) came', *avu banduvu* 'they came' (i.e.: neuter pl.).

Other important differences of this type are briefly mentioned under the respective headings, though the comparison between SK and GK is not the primary aim of this work.

Kannada, the second most ancient of the literary languages of the Dravidian family has a large number of dialects, most of which have already been described by enthusiastic modern linguists. It may be possible that there are some yet to be investigated. GK was one such "ana:ghra:nita pusparam", which is now just unfurling its petals to the fraternity of linguists.

I am happy to record my deep sense of gratitude to Prof. S. Agesthialingom, Director, CAS in Linguistics, Anna-malai University for his kindness in including this book in the Publication series of CAS in Linguistics. His valuable suggestions and guidance helped me from time to time in

bringing out this book in the present form. I also offer my sincere thanks to my esteemed colleagues Mr. K. Balasubramanian and Mr. Pon. Kothandaraman, Lecturers in Linguistics and Mr. P. N. Ravindran, Research Scholar who took special care to see this book through the Press and also to correct the proof during my absence from the department.

K. Kushalappa Gowda.

1.2. ALLOPHONICS

1.2.1. The vowel phonemes and their allophones are described below.

1.2.1.1. SHORT VOWELS

1.2.1.1.a. /i/, /e/ and /ɛ/ are the front unrounded vowels.

/i/ has two allophones.

(i) [I] is a lower high front vowel. It occurs in the following environments :

a. Initially² before *v*.

Eg. [I]vike 'to these'

b. Medially after *l* and *s*

nə:l[I]ke 'tongue'

(ii) [i] is a high front vowel. It occurs elsewhere.

[i]sudu 'putting'

/e/ has two allophones.

(i) [e] is a higher mid front vowel. It occurs medially before *y* and *v* & a high vowel

m[e]yi 'body'

a:c[e]yu 'they of the other side'

(ii) [E] is a mean mid vowel. It occurs elsewhere.

Initially

[E] d [E] 'chest' [E] l [E] 'leaf'

[E] l [E] 'young, tender'

Medially

n[E]ttiri 'blood' h[E]gil 'shoulder'

n[E]g [E] 'laughter' k[E] ! [E]g [E] 'below'

k[E]nn [E] 'cheek' k[E] r [E] 'tank'

Finally

tɔŋg[E] 'younger sister' att[E] 'mother-in-law'

sɔs[E] 'daughter-in-law' gu:q[E] 'girl'

tal[E] 'head' r[E]pp[E] 'eyelash'

/ɛ/ has two allophones.

(i) [æ] is a higher low front vowel having only a few occurrences, especially in the words of foreign origin.

h[æ]nd/i 'handle' l[æ]mpu 'lamp'

(ii) [ɛ] is a lower mid vowel; it occurs in the following example.

h[ɛ]ru ‘flux put to cooled milk to prepare curds’

1.2.1.1 b /i/, /ə/ and /a/ are the central vowels. Only the last one has lengthened form in contrast with the short vowel.

/i/ has only one allophone. [i] is a central high unrounded vowel. It occurs in the second syllable and also in the final position of a word.

<i>hud[i]ga</i>	‘young boy’	<i>hud[i]gi</i>	‘young girl’
<i>ad[i]kE</i>	‘to her’	<i>na:d[i]ni</i>	‘younger sister-in-law’
<i>pad[i]ñji</i>	‘green gram’	<i>nEtt[i]r[i]</i>	‘blood’

Final position

<i>gðnd[i]</i>	‘male, man’	<i>kðnñ[i]</i>	‘eye’
<i>henn[i]</i>	‘wife’	<i>hanñ[i]</i>	‘fruit’

In many instances, the second syllabic position coincides with the potential pause. Therefore when these constructions are segmented out, [i] will be in final position itself.

<i>kðnñ[i]</i>	<i>bombe</i>	‘pupil of the eye’
<i>kðn[i]</i>	<i>gundu</i>	‘the heart of the animal or birds’
<i>ba:[i]</i>	<i>kðtti</i>	‘sword’

/ə/ has only one allophone. [ə] is a mean mid central vowel. It occurs in medial position only.

<i>k[ə]yi</i>	‘hand’
<i>k[ə]tti</i>	‘sickle, knife’
<i>g[ə]ñti</i>	‘knot’
<i>n[ə]di</i>	‘plant’
<i>d[ə]ddi</i>	‘chaff, husk of the paddy’

<i>hal![ð]li</i>	'in the river'
<i>ka:gaden[ð]vu</i>	'people of the
	lower side'

/a/ has two allophones.

(i) [a] is a low central unrounded vowel. It occurs medially in *C-C* positions.

(*C*=any consonant)

<i>m[a]gʌ</i>	'daughter'
<i>m[a]rʌ</i>	'tree'
<i>m[a]ne</i>	'house'
<i>m[a]re</i>	'screen'

(ii) [ʌ] is a lower mid back unrounded vowel.
It occurs elsewhere.

Initially

<i>[ʌ]/i</i>	'weep' (imperative)	<i>[ʌ]di</i>	'she or it'
<i>[ʌ]jj[ʌ]</i>	'grandfather, old man'	<i>[ʌ]liy[ʌ]</i>	'son-in-law' etc.

Medially

Before geminate consonants or consonant clusters.

<i>k[ʌ]tʃ[ʌ]</i>	'dam'	<i>g[ʌ]tʃ[ʌ]</i>	'ghauts'
<i>n[ʌ]sʃ[ʌ]</i>	'loss'		

Finally

<i>[ʌ]jj[ʌ]</i>	'grand father, old man'
<i>mar[ʌ]</i>	'tree'
<i>makk[ʌ]</i>	'children'

1.2.1.1.c. /u/, /o/ and /ɔ/ are the back rounded vowels.

/u/ has only one allophone. [u] is a high back rounded vowel. It occurs in initial, medial and final positions.

<i>[u]d[u]r[u]</i>	'to fall off, as the leaves of trees' etc.
--------------------	--------------------------------------------

[u]g[u]r[u] ‘finger nails’

[u]d[u] ‘to wear’ (like dhoti or saree etc.)

[u]!i ‘chisel’.

/o/ has only one allophone. [o] is a higher mid back rounded vowel. It occurs initially and medially only.

[o]lli ‘bed sheet’ [o]li ‘leaf of the coconut trees’

m[o]di ‘clean’ m[o]ri ‘young of an animal’

k[o]du ‘give’ etc.

/ɔ/ has two allophones.

(i) [ɔ] is a lower mid back vowel. It occurs in interrogative forms.

naŋg[ɔ] ‘to me?’ ni:vg[ɔ] ‘is it to you?’

o!ɔ] ‘is he (they, hon-pl.) in?’ u!ɔ] ‘is she, or it

present?’

(ii) [ɔ] is a mean mid rounded vowel. It occurs elsewhere.

Initially

[ɔ]rsu ‘to rub’ [ɔ]di ‘to break’

[ɔ]dE ‘a kind of round shaped savoury dish’

Medially.

m[ɔ]ri ‘to bark’ h[ɔ]di ‘to beat’

h[ɔ]!!E ‘belly’ h[ɔ]sa ‘new’ etc.

1.2.1.2. Long vowels.

1.2.1.2.a. Articulatory descriptions of long vowels correspond to that of the respective short vowels.

1.2.1.2.b. The long vowels except the low central one, are tense and higher than the low vowels. In case of the low central unrounded vowel, the long vowel is lower and also lax.

1.2.1.2.c. The long vowels and their allophones.

/i:/ has only one allophone. [i:] It occurs in initial and medial positions of a word.

[i:]ce	'this side'	[i:]ga	'now'
s[i:]ta	'cold'	n[i:]ri	'water'
<i>h[i:]ri</i> 'to dring like the animals drinking water etc'			

/e:/ has two allophones.

(i) [e:] It occurs in non-final position of a word.

[e:]di	'goat'	[e:]ri	'to climb'
[e:]li	'seven'	[e:]ni	'ladder'
k[e:]li	'to listen,ask etc.'	k[e:]di	'jealousy'
b[e:]di	'fetters'	b[e:]ri	'root'
b[e:]ku	'wanted'	t[e:]ri	'temple car'
n[e:]li	'to hang'		

(ii) [E:] is a mean mid long vowel. It occurs before non-high vowels.

<i>k[E:]rE</i>	'a kind of snake'	<i>k[E:]nE</i>	'a bulbous root' (edible)'Amorphophallus'
----------------	-------------------	----------------	----------------------------------------------

/a:/ has only one allophone. [a:] It occurs in non-final position of a word.

[a:]cE	'that side'	[a:]nE	'elephant'
[a:]lE	'mill'	[a:]sE	'desire'
m[a:]ti	'words'	m[a:]ri	'to sell'
k[a:]di	'forest'	m[a:]di	'to do'
k[a:]ri	'birds nest'	d[a:]ri	'way'

/u:/ has only one allophone. [u:]. It occurs in initial and medial positions.

[u:]ta	'food, meals'	[u:]ru	'one's native place'
[u:]liga	'work' (forced work)	k[u:]du	'to gather, flock, join etc.'

g[u:]du ‘cage’

/o:/ has two allophones.

- (i) [o:] It occurs in non-final positions, except in an interjection denoting pain.

ayy[o:] ‘O! alas!’

Examples for non-final occurrences.

[o:]*du* ‘tiles, broken shreds of a pot, skull’ etc.

[o:]*du* ‘read’ *g[o:]ndu* ‘gum’

- (ii) [ɔ:] is a mean mid back rounded vowel. It occurs in initial syllable when the following syllable has a non-high vowel.

k[ɔ:]tE ‘fortress’ *[ɔ:]tE* ‘reed’

d[ɔ:]sa ‘sin’ *d[ɔ:]sE* ‘rice cake’

1.2.2. The following is the description of the consonant phonemes and their allophones.

1.2.2.1. a. *Voiceless stops.*

/p/ has one allophone. [p] is a bilabial stop. It occurs initially and medially.

[p]E:tE ‘town’ *[p]et:ti* ‘blows’

[p]ustaka ‘book’ *sa[p]ura* ‘thin’

[p]a:[p]a ‘innocent’ ‘poor’ *[p]a:vu* ‘a measurement,
‘sin’ 1/4 of a seer’

kð[p]i ‘monkey’ (contemptuous term used in scolding
children)

/t/ has only one allophone, [t], the dental stop. It occurs in initial and medial positions.

[t]ompu ‘cool’ *[t]ɔdE* ‘thigh’

[t]e:ri ‘temple car’ *ge[t]i* ‘support’

[t]ɔli ‘to wash’ *[E]t[E]* ‘sorrow’

ru[t]t ‘taste’

/t/ has only one allophone. [t] is the retroflex stop. It occurs in medial position except in one example: *toppi* 'cap', where it occurs initially. Often it varies with the dental stop also in this word.

e.g. *toppi*³ id.

Examples for medial occurrences.

<i>a:[t]a</i>	'play'	<i>u:[t]a:</i>	'food, meals'
<i>to:[t]a</i>	'garden'	<i>naŋ[t]a</i>	'guest, related person' (male)

/č/ has only one allophone. [č], the palatal affricate. It occurs in initial and medial positions.

<i>[č]ondra</i>	'moon'	<i>[č]a:di</i>	'slander'
<i>[č]a:ti</i>	'whip'		'mud, slush'
<i>a:[č]E</i>	"that side"	<i>na:[č]ike</i>	'shyness' etc.

/k/ has one allophone. [k], the velar stop. It has initial and medial occurrences.

<i>[k]ari</i>	'call'	<i>[k]əri</i>	'charcoal'
<i>be:[k]u</i>	'want'	<i>ya:[k]E</i>	'why'
<i>so:[k]u</i>	'style, fashion in dress'		

1.2.2.1.b. *Voiced stops:*

The position of articulation corresponds to their voiceless counterparts.

/b/ has only one allophone. [b] It occurs in initial and medial positions.

<i>[b]ari</i>	'write'	<i>[b]odi</i>	'beat, strike'
<i>su[b]aga</i>	'an innocent person'	<i>sa[b]a:ri</i>	'going, procession ,'

/d/ has only one allophone. [d] It occurs in initial and medial positions.

<i>d]a:ri</i>	'path'	<i>[d]u:du</i>	'push'
---------------	--------	----------------	--------

[d]evva	'demon'	[d]o:ni	'boat'
ba:[d]u	'coming'	ho:[d]u	'going'
i[d]i	'this (woman or thing)	a[d]i	'that (woman or thing)'
ya:[d]i	'which' (woman or thing)	ma:[d]i	'to turn'

/d/ has two allophones.

- (i) [r] the retroflex flap. It occurs between two short vowels.

kə[r]i	'cut'	hɔ[r]i	'beat'
su[r]u	'burn'	mo[r]u	'to kindle fire in the
ki[r]i	'spark'		[hearth]

- (ii) [d] the retroflex stop. It occurs elsewhere.

Initially.

[d]ombara:ta	'juggler's play'	[d]abbi	'tin'
[d]a:bu	'waist band, zone, made of silver or gold'		

Medially after long vowels

e:[d]i	'goat'	a:[d]i	'play' (imperative)
ka:[d]i	'forest'	gu:[d]u	'nest', cage'
ku:[d]u	'to flock, gather as cattle' etc.		

- /j/ has only one allophone. [j]; it occurs in initial and medial positions.

Initially

[j]o:ru	'speedily'	[j]o:du	'chappals'
[j]e:di	'white sticky soil' etc.		

Medially

ka[j]e	'marshy soil'	du:[j]i	'needle'
--------	---------------	---------	----------

<i>ne:[j]i</i>	'paddy seedlings to be transplanted'	<i>ma[j]a</i>	'a mark on the body(black spot, mole etc.)
<i>ra[j]e</i>	'holiday'		

/g/ has only one allophone [g]. It has initial and medial occurrences.

Initially

[g]eri	'feather, wing of a bird'	[g]ε/si	'sweet potato'
[g]əypu	'curry'		

Medially

u[g]i	'to spit'	bi[g]i	'to tighten'
tu:[g]u	'to hand'	be:[g]u	'soon'
ma[g]a	'daughter'		

1.2.2.1.c. NASALS

/m/, /n/, /ɳ/, /ñ/ and /ɳ/ are the nasal phonemes.

/m/ has one allophone.

/m/ the bilabial nasal. It occurs in initial and medial positions.

Initially

[m]ane	'house'	[m]ara	'tree'
[m]e:le	'above'	[m]u:le	'corner'
[m]ɔle	'breast'		

Medially

sa:[m]a:nɪ	'things'	ka[m]a:nɪ	'arch'
u[m]i	'chaff', 'husk'	to[m]pu	'cool'
ke[m] pu	'red'	ko[m]bu	'horn,
co[m]bu	'pot'	ni[m]be	'lime fruit'

/n/ has only one allophone. [n] the dental nasal, which occurs in initial and medial positions.

Initially

[n]etti	'top of the head'	[n]e:ji	'paddy seedlings'
[n]uji	'the gum of the teeth'		

Medially

ma[n]e	'house'	je[n]a	'person'
di[n]a	'day'	cu:[n]a	'a pole used for fencing'
i[n]di	'today'	ku[n]du	'to become dry due to
go:[n]du	'gum'		[excessive boiling]

/ɳ/ has only one allophone. [ɳ] the retroflex nasal which occurs in the medial position only.

ma[ɳ]e	'plank'	ne[ɳ]e	'wick of the lamp'
me[ɳ]isi	'chillies'	gə[ɳ]di	'male', 'hero'
pu[ɳ]da	'a mischievous boy'	so[ɳ]ta	'waist'
gə[ɳ]ti	'a knot'	e[ɳ]ti	'the number eight' etc.

/ñ/ has only one allophone. [ñ] the palatal nasal.

It occurs medially, always before the homorganic stops when single and between vowels when double.

na[ñ]ji	'poison'	gə[ñ]ji	'gruel'
kə[ñ]ci	'bell metal'	če[ñ]či	'a pouch, a small bag'
o[ñ]ču	'to sift'	ko[ñ][ñ]e	'babble'

/ñ/ has one allophone. [ñ] the velar nasal which occurs in medial positions.

ta[ñ]ge	'younger sister'	sa[ñ]ka	'bridge'
su[ñ]ka	'tax'	ra[ñ]gi	'colour'
giđi[ñ]a	'eagle'	ke:đi[ñ]a	'a jealous person'
ma:di[ñ]a	'a man of Madiga caste'	ga:ni[ñ]a	'an oil miller'

1.2.2.1.d. NON-STOP CONSONANTS

(i) SEMI VOWELS

/y/ and /v/ are the semi vowels.

/y/ has only one allophone. [y] the palatal continuant.

It occurs initially before a: and medially before consonants and also between vowels.

Initially

[y]a:ri	'who'	[y]a:di	'which'
[y]a:va	'which'	[y]a:ke	'why'

Medially

ko[y]ka	'the one who cuts'	sa[y]kali	'bicycle'
bo[y]di	'having scolded'	sa:[y]a	'help'
sa:[y]i	'ink'	me[y]i	'body' etc.

/v/ has only one allophone. [w] the bilabial continuant, which occurs in medial positions.

to[w]ru	'parent's house'	na:[w]u	'we'
a[w]u	'they'	a[w]ke	'to them'
so:[w]u	'death ceremony'		

(ii) FRICATIVES

/s/ and /h/ are the fricative consonants.

/s/ has two allophones.

(i) [s'] a palatal voiceless fricative. It occurs after /k/.

sa:k[s']i	'witness'	nak[s']e	'photo, picture'
-----------	-----------	----------	------------------

(ii) [s] the alveolar voiceless fricative which occurs elsewhere.

[s]ara	'chain'	ar[s]u	'king'
[s]e:ri	'to join'	[s]i:re	'saree'

/h/ has one allophone. [h] the glottal voiced fricative.
It occurs in word initial position.

[h]a:li	'milk'	[h]e:li	'to say'
[h]i:ri	'to drink like animals'	[h]a:nka:ra	'ego, arrogance' etc.

(iii) TRILLS

/r/ has only one allophone. [r] the alveolar short trill. It has initial and medial occurrences.

Initially

[r]aje	'holiday'	[r]a:gi	'red millet'
--------	-----------	---------	--------------

Medially

ma[r]a	'tree'	ku[r]e	'monkey'
kə[r]i	'charcoal'	sə[r]i	'correct'
mo[r]i	'young of an animal'		

(iv) LATERALS

/l/ and /ɿ/ are the dental and retroflex consonants .

/l/ has only one allophone. [l] the dental lateral, has initial and medial occurrences.

Initially

[l]otte	'lie'	[l]eñca	bribe'
[l]a:yki	'good'		

Medially

ma[l]e	'forest'	ba[l]e	'net'
o[l]e	'hearth'	a:[l]e	'mill' etc.

/ɿ/ has one allophone. [ɿ] the retroflex lateral. It occurs in medial positions.

ma[ɿ]e	'rains'	be[ɿ]e	'crop'
e[ɿ]i	'pull', 'drag'	kà[ɿ]i	'deduct' etc.

1.3. CONTRASTING PAIRS

1.3.1. QUALITATIVE CONTRAST

(a) VOWELS

/i/ vs. /e/	/kađi/	'grind'
	/kade/	'Indian stag' (Rusa Aristotalis)
/e/ vs. /ɛ/	/heru/	'to give birth'
	/hɛru/	'flux that is put to cooled milk to prepare curds'
/i/ vs. /ɪ/	/ba:li/	'life, horn of a corn, a razor'
	/ba:li/	'having lived, having cut into halves'
	/gəndi/	'man'
	/gəndi/	'an outlet'
/e/ vs. /ə/	/keri/	'to scratch'
	/kəri/	'charcoal'
/ɛ/ vs. /a/	/hɛru/	'flux' etc.
	/hari/	'cut, tear'
/ə/ vs. /i/	/gənti/	'knot, a packet' etc.
	/jiginti/	'pinch'
/ə/ vs. /a/	/kəri/	'charcoal'
	/kari/	'call'
/a/ vs. /ɔ/	/mari/	'to forget'
	/mɔri/	'to bark'
/i/ vs. /u/	/koṭti/	'having given'
	/koṭtu/	'spade'
/ə/ vs. /o/	/kədi/	'cut'
	/kodi/	'the top of the climber' etc.
/u/ vs. /o/	/muri/	'break'
	/mori/	'young of an animal'

/o/ vs. /ɔ/	/mori/	'young of an animal'
	/mɔri/	'bark'
/i/ vs. /e/	/bandi/	'having come'
	/bande/	'I came'
/i/ vs. /ɛ/		No examples.
/i/ vs. /ɔ/	/bandi/	'having come'
	/bands/	'they came'
/ɔ/ vs. /ɛ/		No examples.
/ə/ vs. /u/	/kəri/	'charcoal'
	/kuri/	'sheep'
/ə/ vs. /ɔ/		No examples.

b. CONSONANTS

(1) STOPS

/p/ vs. /b/	/pe:te/	'town'
	/be:te/	'hunting'
/pp/ vs. /bb/	/kəppu/	'black'
	/kəbbu/	'sugar cane'
/t/ vs. /d/	/ete/	'sorrow'
	/ede/	'chest'
/tt/ vs. /dd/	/bitti/	'seed'
	/biddi/	'having fallen'
/ʈ/ vs. /ɖ/	/no:ʈu/	'rupee note'
	/no:ɖu/	'look, see'
/ʈʈ/ vs. /ɖɖ/	/gaʈʈa/	'hill'
	/gadda/	'beard'
/c/ vs. /j/	/ne:ci/	'having lifted'
	/ne:ji/	'seedling of paddy'
/cc/ vs. /jj/	/kəcci/	'having bitten'
	/kəjji/	'scab, itching'

/k/ vs. /g/ vs. /h/	/ku:du/	'to gather'
	/gu:du/	'nest'
	/hu:du/	'to plough'
/kk/ vs. /gg/	/makka/	'children'
	/magga/	'loom'

(2) NASALS

Contrast between /m/, /n/ and /ɳ/

/m/ vs. /n/	/mara/	'tree'
	/nara/	'nerve'
/m/ vs. /ɳ/	/ca:me/	'a kind of pulse'
	/ca:ɳe/	'baldness'
/n/ vs. /ɳ/	/mane/	'house'
	/maɳe/	'plank, seat'
/mm/ vs. /ɳɳ/	/emme/	'she-buffalo'
	/enɳe/	'oil'
/nn/ vs. /ɳɳ/	/tanna/	'one's own'
	/taɳɳaŋge/	'cool'
/mm/ vs. /nn/	/kammaɳge/	'sweet'
	/kanna/	'burgler's hole'
/ɳɳ/ vs. /ɳɳ/	/maɳɳa/	'son'
	/haɳɳa/	'a little'
	/noɳɳa/	'yoke'
	/noɳɳe/	'babbling speech'

Examples of contrast with the geminated forms of the other nasals are as follows:

/kɔmme/	'pot belly, a bamboo plaited container'
/kɔɳɳe/	'babbling speech'
/dɔɳɳe/	'a stick'
/sɔɳɳe/	'zero'

Velar nasal geminated form contrasting with the geminated forms of the other nasals:

/namma/	'ours'
/nanna/	'mine'
/sanna/	'small'
/maṇṇa/	'son'

(3) OTHER CONSONANTS

- (i) Contrasting pairs for /r/, /l/, /l/.

/ha:rɪ/	'fly, jump'
/ha:lɪ/	'milk'
/ha:lɪ/	'bad'

- (ii) Contrasting pairs between /v/, /y/ and /s/.

/ba:ve/	'I will cone'
/ba:ye/	'mouth'
/ba:se/	'language, knowledge'

1.3.2. QUANTITATIVE CONTRAST

(a) VOWELS

/i/ vs. /i:/	/miji/	'to pound'
	/mi:sɪ/	'to swim'
/e/ vs. /e:/	/ke:di/	'to go off like the lamp'
	/ke:dɪ/	'jealousy'
/a/ vs. /a:/	/male/	'forest'
	/ma:le/	'garland'
/u/ vs. /u:/	/kuḍu/	'horse gram'
	/ku:ḍu/	'to flock, gather'
/o/ vs. /o:/	/modi/	'clean'
	/mo:ḍi/	'illegible'

(b) CONSONANTS

(1) STOPS

/p/ vs. /pp/	/kapa/	'cough, phlegm'
	/kappa/	'tribute'
/t/ vs. /tt/	/kate/	'story'
	/katte/	'ass'
/ʈ/ vs. /ʈʈ/	/maʈa/	'monastery'
	/maʈʈa/	'level'
/c/ vs. /cc/	No examples	
/k/ vs. /kk/	/taka/	'take' 2nd sg.
	/takka/	'appropriate'
/b/ vs. /bb/	/ube/	'heat'
	/ubbu/	'to swell'
/d/ vs. /dd/	/gade/	'club'
	/gadde/	'paddy field'
/ɖ/ vs. /ɖɖ/	/modi/	'clean'
	/moɖɖi/	'food for cattle'
/j/ vs. /jj/	/maja/	'body mark'
	/ajja/	'old man, grand-father'
/g/ vs. /gg/	/maga/	'daughter'
	/magga/	'loom'

(2) NASALS.

/m/ vs. /mm/	/umi/	'chaff, husk of paddy'
	/umma/	'interjection showing unwillingness'
/n/ vs. /nn/	/mane/	'house'
	/manne/	'day before yesterday'
/ɳ/ vs. /ɳɳ/	/ene/	'equal'
	/enɳe/	'oil'

(3) OTHER CONSONANTS

/s/ and /r/ do not have geminate forms. /l/ and /l/ have geminated forms and the following are the examples of contrast between single and geminate lateral consonants.

/l/ vs. /ll/		
	/bale/	'net'
	/balle/	'thick forest'
	/eli/	'rat'
	/elli/	'where'
	/oli/	'leaf'
	/olli/	'blanket' etc

There are no minimal contrasting pairs to show that /y/ and /yy/ are distinct in G. K. /y/ is frequently met within examples like: /meyi/ 'body', /kayi/ 'hand', /hoyi/ 'pour' etc., /yy/ too occurs in some examples sporadically: Eg. /poyyel/ 'sands', /ayyo/ 'interjection of pain'.

The following are examples of contrast between /v/ and /vv/.

/avara/ 'their' /avvana/ 'the mother's

After long vowels geminate consonants do not occur in G. K.

1.4. CONSONANT CLUSTERS

The consonant clusters can be divided mainly into two classes: viz., (1) Two consonant clusters and (2) Three consonant clusters. The latter one has a few instances only and in these the first consonant is /v/ or a nasal and the third is /y/ or /r/. The second consonant is uniformly a stop. These are few in number and they occur in medial position of a word.

1.4.1 THREE CONSONANT CLUSTERS

The following are the examples of three consonant clusters.

<i>-wky-</i>	<i>sowkya</i>	'good health and happiness'
<i>-mbr-</i>	<i>ta:mbra</i>	'copper'
<i>-n̪tr-</i>	<i>nañtri</i>	'relatives, guests'
<i>-ntr-</i>	<i>mantri</i>	'minister'
<i>-ndr-</i>	<i>cendra</i>	'moon'

1.4.2 TWO CONSONANT CLUSTERS

1.4.2.1. A few of the clusters occur in word initial positions also. The following are the examples of such instances. The first consonant is invariably a stop.

<i>kr-</i>	<i>kraya</i>	'price'
<i>pr-</i>	<i>prasne</i>	'question'
	<i>prayattina</i>	'effort'
<i>br-</i>	<i>bra:mbiri</i>	'brahmins'
<i>ks-</i>	<i>ksaya</i>	'tuberculosis'

1.4.2.2. The following are the examples of two-consonant clusters occurring in the medial position of a word. They are classified into two major classes. (1) $-C_1 C_1-$ type of clusters and (2) $-C_1 C_2$ type of clusters. The second class is further analysed into five sub-groups.

- i. C_1 is stop and C_2 is a non-stop.
- ii. C_1 is a nasal and C_2 is a stop.
- iii. C_1 is a non-stop and C_2 is a stop.
- iv. C_1 is a non-stop and C_2 is a nasal.
- v. Both C_1 and C_2 are non-stops.

1.4.2.2.1. $-C_1 C_2-$ type of clusters.

(a) VOICELESS STOPS

$-pp-$	<i>appa</i>	'father'
	<i>oppu</i>	'agree'
	<i>soppu</i>	'leaf'
$-tt-$	<i>etti</i>	'bull'
	<i>hottu</i>	'time'
$-tt-$	<i>otti</i>	'all'
	<i>kattta</i>	'dam'
	<i>hatti</i>	'cattle shed'
$-cc-$	<i>kicci</i>	'fire'
	<i>mocci</i>	'axe'
	<i>hecci</i>	'much'
$-kk-$	<i>akka</i>	'elder sister'
	<i>makka</i>	'children'

(b) VOICED STOPS

$-bb-$	<i>habba</i>	'festival'
	<i>obba</i>	'one man'
	<i>tobbu</i>	'embrace'
	<i>gobbara</i>	'manure'
$-dd-$	<i>udda</i>	'length'
	<i>gadde</i>	'paddy field'
	<i>gudde</i>	'to punch with the fist'
$-dd-$	<i>gadda</i>	'beard'
	<i>hedda</i>	'dull fellow'
$-jj-$	<i>aaja</i>	'grandfather'
	<i>mojjige</i>	'butter-milk'
$-gg-$	<i>magga</i>	'loom',
	<i>hugge</i>	'cooked rice'
	<i>boggu</i>	'to bend'

(c) NASALS

-mm-	<i>emme</i>	'she buffalo'
	<i>omme</i>	'once'
-nn-	<i>kanna</i>	'burgler's hole'
	<i>ninna</i>	'yours'
-ɳɳ-	<i>aɳɳa</i>	'elder brother'
	<i>moɳɳi</i>	'earth'
-ññ-	<i>haññña</i>	'a little'
	<i>koññe</i>	'babbling speech'
-ńń-	<i>nońńia</i>	'yoke'
	<i>mańńia</i>	'son'

(d) LIQUIDS

-vv-	<i>avva</i>	'mother'
-yy-	<i>poyye</i>	'sands'
-ll-	<i>olli</i>	'blanket'
	<i>ille</i>	'not present'
-ɿɿ-	<i>haɿɿa</i>	'river'

I.4.2.2. - C_1C_2 - type of clusters.

(a) C_1 is a stop and C_2 is a non-stop.

-dy-	<i>modya/a</i>	'washer-man'
-by-	<i>abya:sa</i>	'practice'
-ty-	<i>satya</i>	'truth'
	<i>hatya:ri</i>	'tools'
-ʈr-	<i>katre</i>	'a disease'
-kr-	<i>cekra</i>	'wheel'

- <i>tl-</i>	<i>batli</i>	'plate'
	<i>ho:tl̩i</i>	'hotel'
	<i>ka:tli</i>	'order'
- <i>ks-</i>	<i>nakse</i>	'photo, picture'

(b) C_1 is a nasal and C_2 is a stop.

- <i>mp-</i>	<i>tompu</i>	'cool'
	<i>kempu</i>	'red'
- <i>mb-</i>	<i>combu</i>	'pot'
	<i>kombu</i>	'horn'
- <i>mc-</i>	<i>camca</i>	'spoon'
- <i>nt-</i>	<i>kənti</i>	'to set as sun'
	<i>sonta</i>	'own'
- <i>nd-</i>	<i>andi</i>	'that day'
	<i>banda</i>	'you came'
- <i>ṇt-</i>	<i>naṇṭa</i>	'relative'
	<i>gəṇṭi</i>	'knot'
- <i>ṇd-</i>	<i>tundu</i>	'piece'
	<i>gundu</i>	'bullet'
- <i>ṇk-</i>	<i>hoṇku</i>	'to turn on sides, to roll as in sleep'
- <i>ñc-</i>	<i>mañca</i>	'cot'
	<i>kəñci</i>	'bell-metal'
- <i>ñj-</i>	<i>gəñji</i>	'gruel'
	<i>nañji</i>	'poison'
- <i>ṇk-</i>	<i>saṇka</i>	'bridge'
	<i>suṇka</i>	'tax'
- <i>ñg-</i>	<i>tange</i>	'younger sister'
	<i>nañge</i>	'to me'

(c) C_1 is a non-stop and C_2 is a stop.

-yk-	<i>koyka</i>	'one who cuts'
-rp-	<i>karpu:ra</i>	'camphor'
-rb-	<i>darba:ri</i>	'show, haughtiness'
-rt-	<i>arta</i>	'meaning'
-rc-	<i>kərci</i>	'expenses'
-rj-	<i>arji</i>	'application'
	<i>marji</i>	'manner'
-rk-	<i>tərka</i>	'stubbornness'
	<i>morka</i>	'uneasiness in stomach'
-rg-	<i>mo:rga</i>	'route', 'path'
-lp-	<i>alpa</i>	'stingy person'
-łp-	<i>bɔłpu</i>	'light'
-łt-	<i>ałte</i>	'measurement'
-st-	<i>a:sti</i>	'property'
-st̪-	<i>kasta</i>	'difficulty'
	<i>nasta</i>	'loss'

(a) C_1 is non-stop and C_2 is a nasal.

-rm-	<i>dərma</i>	'good conduct, free gift'
-rn-	<i>a:rne</i>	'a kind of lizard'
-lm-	<i>jəlma</i>	'birth, existence in the world'

(e) Both C_1 and C_2 are non stops.

-yl-	<i>koylı</i>	'harvest'
	<i>hoylı</i>	'strong current'
	<i>boylı</i>	'paddy fields'
-yr-	<i>poyer</i>	'crop'
-ry-	<i>ka:rya</i>	'action'

-rl-	<i>berli</i>	'fingers'
	<i>kərli</i>	'intestines'
-rs-	<i>vorsa</i>	'year'
	<i>torsu</i>	'to itch'
-vr-	<i>tovru</i>	'parents,' house'
-sn-	<i>prasne</i>	'question'
-sy-	<i>ha:sya</i>	'humour, fun'

1.4.2.3. The following are the examples of stop plus nasal and nasal plus /y/ clusters.

(a) Stop plus nasal.

-dm-	<i>padma</i>	'name of a girl'
-jñ-	<i>ajña:na</i>	'wrong belief'

(b) Nasal plus /y/

-ny-	<i>punya</i>	'good act'
-ny-	<i>anya:ya</i>	'wrong doing, injustice'

1.5. SUPRA SEGMENTALS

/ ± / This is represented by the space left between two words. The presence of the space contrasts with the absence of space.

/mojjigeni:ri/	[mojjigEni:ri]	'diluted butter milk'
/mojjigeñni:ri/	[mojjigEni:ri]	'butter milk and water'

/ ↑ / The rising tone occurs with interrogation particle and is represented by the symbol '?'.

/bands↑ /	[bands?]	'did they come?'
/koduvv↑ /	[koduvv?]	'will they give'

/ ↓ / The falling tone is unmarked. It occurs in

declarative types of utterances.

<i>/bandsə</i> ↓ /	[<i>bandsə</i>]	'they came'
<i>/koduvə</i> ↓ /	[<i>koduvə</i>]	'they will give'

/~/ has one allophone [~] occurring with vowels a and i: in final positions.

<i>avā</i>	'that man'
<i>ivā</i>	'this man,'
<i>ma:vā</i>	'father-in-law'
	'maternal uncle'
<i>ya:vā</i>	'which man'
<i>nī:</i>	'you (sg.)'

The contrast between nasalised and oral a is as follows.

<i>ya:vā</i>	'which man'
<i>ya:va</i>	'which thing'

FOOT-NOTES

1. S. K. has *i*, *u*, *e*, *o* and *a* and their corresponding lengthened forms as phonemes in the vowel-section. *i*, *ɛ*, *ə* and *ɔ* are found extra in G. K. of which the latter three have phonemic status in Dharwar and Mysore dialects. (Ref: The Structure of Kannada : R. C. Hiremath and An Outline of Colloquial Kannada, by William Bright).
2. The term 'Initial', 'Medial' and 'Final' are used with reference to words only whether specified or not so in the paper.
3. This variation does not occur in my idiolect.

Morphophonemics

2.1 REGULAR MORPHOPHONEMIC CHANGES

$$i \rightarrow \phi/C - \& \left\{ \begin{array}{c} t \\ d \end{array} \right\} \quad (1)$$

ni & n & ge → *ni-ñ-ge*
na & n & ge → *'na-ñ-ge*

a → *e/CC-& ti* (23)

bañta & ti → *bañte-ti*
nañta & ti → *nan̄te-ti*
miñda & ti → *miñde-ti*

2.2. IRREGULAR MORPHOPHONEMIC CHANGES

In a few instances of derivation of nouns by compounding and suffixation, some morphophonemic changes take place. Since they cannot be generalised, they are listed below. However, the kind of changes involved are noted and the examples are listed under each head. Derivations by lengthening of certain vowels of the stem, or by changing any one of the consonants or vowels are not included in this list, as all such examples are given separately under the noun derivaton.

1. Geminate consonants become degeminated in the second word of a compound.

ni:r-ulli → *ni:ruļi* ‘onion’
beļl-ulli → *beļluļi* ‘garlic’
mod[moduve]-mañña → *modmañña* ‘bride groom’

<i>ajja-appa</i>	→	<i>ajjapa</i>	'grand father'
<i>uggu avva</i>	→	<i>uggava</i>	'grand mother'
<i>bi:g-hullu</i>	→	<i>bi:gili</i>	'hay'
<i>cikka-appa</i>	→	<i>cikapa</i>	'father's younger brother'
<i>saṇṇa-appa</i>	→	<i>saṇapa</i>	"
<i>dodḍa-appa</i>	→	<i>doḍapa</i>	'father's elder brother'
<i>dodḍa-avva</i>	→	<i>doḍava</i>	'father's elder brother's wife or mother's elder sister'
<i>saṇṇa-avva</i>	→	<i>saṇava</i>	'father's younger brother's wife' or mother's younger sister.
<i>ayye-appa</i>	→	<i>ayyepa</i>	'parents'
<i>ji:rda-akki</i>	→	<i>ji:radaki</i>	'a kind of spice'

2. Geminate consonants in words referring to age, become degeminated when followed by words referring to father and mother.

<i>dodḍa-appa</i>	→	<i>doḍapa</i>
<i>dodḍa-avva</i>	→	<i>doḍava</i>
<i>saṇṇa-appa</i>	→	<i>saṇapa</i>
<i>cikka-appa</i>	→	<i>cikapa</i>
<i>cikka-avva</i>	→	<i>cikava</i>

3. Initial *h-* of the second word becomes lost in a compound.

<i>ba:le-haṇṇi</i>	→	<i>ba:leṇṇi-</i>	'plantain fruit'
<i>ka:di-handi</i>	→	<i>ka:dandi</i>	'wild boar'
<i>mi:nī-hoṭṭe</i>	→	<i>mi:nōṭṭe</i>	'calves of the leg'
<i>mane-hakki</i>	→	<i>manekki</i>	'sparrows'
<i>bosiri-hengisi</i>	→	<i>bosireṅgisi</i>	'pregnant woman'
<i>ni:ri-hoy</i>	→	<i>ni:roy</i>	'to pour water'

4. Initial vowel of the second word becomes lost, if it is preceded by a word ending in a vowel which is other than an enunciative vowel.

<i>ba:le-hann̩i</i>	→	<i>ba:leññi</i>
<i>mane-hakki</i>	→	<i>manekki</i>
<i>ele-adike</i>	→	<i>eleđike</i> ‘betel nut and leaves’

In one word, viz., *hugesoppu* → *hosepu*, it is curious that *-g-* → ϕ and in the compounding process, *s-* has shifted position to that of *-g-*. All other changes that have taken place are akin to those noted above.

The following are the changes that take place when derivative morphemes are affixed to roots.

5. Final vowel of the stem → ϕ before *-CV* type of derivative suffixes.

<i>bođi-ka</i>	→	<i>bođka</i>	‘one who smears himself’
<i>ɔđi-ki</i>	→	<i>ɔđki</i>	‘crack’
<i>haļe-ti</i>	→	<i>hal-ti</i>	‘old thing’
<i>bala-dī</i>	→	<i>bal-dī</i>	‘right side’
<i>siđi-li</i>	→	<i>siđ-lī</i>	‘thunder bolt’

6. The final vowel of the stems is partially or fully assimilated to the following vowel of the suffix. The main factor of partial assimilation is the height of the tongue.

<i>huri-pu</i>	→	<i>huru-pu</i>	‘enthusiasm’
<i>me:pu-ta</i>	→	<i>me:pa-ta</i>	‘one who graes of cows’
<i>beļe-vu</i>	→	<i>belə-vu</i>	‘mischief’
<i>kadi-vu</i>	→	<i>kadə-vu</i>	‘passage’
<i>puli-vu</i>	→	<i>pule-vu</i>	‘pain’

<i>kutta-ṭi</i>	→	<i>kuttə-ṭi</i>	'rotten'
<i>bisi-li-</i>	→	<i>bisi-li</i>	'sunshine'
<i>okku-li</i>		<i>okki-li</i>	'threshing of paddy'

7. The final *-y* of the stem preceded by a long vowel is lost when followed by consonant beginning derivative suffixes.

<i>ka:y-pu</i>	→	<i>ka:-pu</i>	'nest of a hen'
<i>me:y-pu</i>	→	<i>me:-pu</i>	'grazing'
<i>be:y-ne</i>	→	<i>be:-ne</i>	'pain'
<i>sa:y-vu</i>	→	<i>sa:-vu</i>	'death'
<i>ka:y-vu</i>	→	<i>ka:-vu</i>	'hotness'

8. Final consonants of the stems preceded by short vowels are assimilated (partially or fully) to the consonant following.

<i>hir-[< *per]-gi</i>	→	<i>hig-gi</i>	'swell of joy'
<i>her[< *per]-me</i>	→	<i>hem-me</i>	'pride'
<i>kem-də</i>	→	<i>ken-də</i>	'live coal'
<i>tin-di</i>	→	<i>tin-đi</i>	'eatables'
<i>moļa-key</i>	→	<i>mon-kəy</i>	'elbow'
<i>biṭ-ṭi</i>	→	<i>bit-ṭi</i>	'free labour'
<i>haṭ-ṭi</i>	→	<i>hat-ṭi</i>	'cowshed'

9. A vowel is introduced in between the final consonant of the stem and consonant of the suffix.

<i>hag-li</i>	→	<i>hag-i-li</i>	'day time'
<i>tin-si</i>	→	<i>tin-əsi</i>	'eatables'

19. A nasal is introduced between final vowel of the stem and consonant of the suffix.

<i>bale-ga:ra</i>	→	<i>bale-n-ga:ra</i>	'spider'
-------------------	---	---------------------	----------

FOOT NOTES

1. There is also another alternant of the word with long vowel: *sa:y-*; *sa:-vu*. If we take the long vowel as the basic one, the short vowel alternant can be treated as the resultant form of the morphophonemic change, as, V→V/-CC; When we examine the examples given for Rule No. 4, we notice that the long vowel does not become short when two consonants immediately follow it, but, instead, the final consonant of the root morpheme is lost. This is, perhaps, due to the fact that the root vowel is basically long. Hence, in the above, of the alternants *say-* and *sa:y-*, *sa:-vu* the short vowel alternant has been taken as the root form and the long one is treated as its conditioned alternant. (See 9-A 1.2)
2. An interesting development has taken place in these examples. In OK, the expression for 'starting out' is a Noun + Verb construction: **pora* + *paḍu* → *poramadu* (-m- → -V-; in V-V position) *pora-* 'outside' *paḍu* 'to fall off, lie down' etc. In Middle Kannada: *horavaḍu*, *horavant-* as in *horavanta* 'started out-he' Kumaravyasa Bharata, 15th Cent. A.D.), where the augment of a nasal cannot be explained. However, SK, has reduced the Noun + Verb into Verb as *horad-* *hara-t-* past stem. The GK form is akin to that of SK; Tuḷu also has a parallel construction *pida:di*, 'to go out', whereas, in Tamil, the older type of construction viz: Noun + Verb, as in *pura-p-pati*, is still maintained and the morphophonemic changes take place only in the verb element of the construction.

In the case of the example *mord-t-*, it may also be said to 'have been derived from Noun+Verb construction as e.g. *more* + *idu*, *more* 'crying' (noun), + *idu* 'to put'; but, now, the second member of the compound has been incorporated with the first and the first member of the compound which was originally a noun has lost its nominal significance.

Nouns

3.1. PERSON See under Pro-nouns (4).

3.2. GENDER

The morphemes distinguishing number also distinguish the gender when they occur with demonstratives and other noun or verb roots for deriving nouns. These two types are distinguished as (1) Non-Gender Number markers and (2) Gender-Number markers. The former occurs with personal pronominal bases, (First, Second and Reflexive) and the latter, elsewhere. The Feminine gender marker does not occur with demonstrative pronominal bases, but, occurs only with other Nominal bases. The derived nouns or pronouns concord with verbs only regarding the person and number distinctions. In other words, the distinction of gender is made only in the nominal constructions and not in verbal constructions.

3.2.1 NON-GENDER NUMBER MARKERS

St +

3.2.1.1 Singular

{n} ~ -n-

~ -n- occurs after First and Second person and after Reflexive bases.

E.g. na:n → nā: 'I' (19)

ni:-n → nī: 'you' (19)

ta:-n → tā: 'self' (19)

na-n-a → na-nn-a 'mine'

'my' (21)

<i>ni-n-a</i>	\rightarrow	<i>ni-nn-a</i>	'your'	(21)
			'you'	
<i>na-n-ge</i>	\rightarrow	<i>na-ñ-ge</i>	'to me'	(22)
<i>ni-n-ge</i>	\rightarrow	<i>ni-ñ-ge</i>	'to you'	(22)
<i>ta-n-ge</i>	\rightarrow	<i>tan-i-ge</i>	'to self'	(20)

3.2.1.2 PLURAL

St +

{m} ~ -m- ~ -v- ~ -ϕ/

~ -m- occurs after CV- type stems.

E.g. <i>na-m-a</i>	\rightarrow	<i>na-mm-a</i>	'our'	(21)
<i>ni-m-a</i>	\rightarrow	<i>ni-mm-a</i>	'your'	(21)

~ -v- occurs after CV:- type stems

E.g. <i>na:-v-u</i>		'we'	
<i>ni:-v-u</i>		'you'	
<i>na:-v-ge</i>		'to us'	
<i>ni:-v-ge</i>		'to you'	

~ -ϕ- occurs elsewhere

E.g. <i>av-ϕ-u</i>		'they'	
<i>iv-ϕ-u</i>		'these persons/things'	

3.2.2 GENDER-NUMBER MARKERS

St ± Dem ± Person +

3.2.2.1. MASCULINE

{a} ~ -ña ~ -n ~ -a

~ -ña occurs after the stem mag-

E.g. <i>mag-na</i>	\rightarrow	<i>man-ña¹</i>	'son'
--------------------	---------------	---------------------------	-------

∞ -n occurs after third person markers

E.g. <i>ay-a-n</i>	\rightarrow	<i>av-ā</i>	'that man'	(19)
<i>iv-a-n</i>	\rightarrow	<i>iv-ā</i>	'this man'	(19)

∞ -a occurs elsewhere

E.g. <i>kurd-a</i>		'blind man'
<i>ja:n-a</i>		'clever man'
<i>ku!l-a</i>		'dwarfish man'
<i>kunt-a</i>		'lame man'
<i>tunt-a</i>		'mischievous man'
<i>nant-a</i>		'male relative'
<i>bant-a</i>		'strong man'

3.2.2.2. NEUTER

{d} ~ -d

~ -d occurs after the Third person marker ϕ .

E.g. <i>a-ϕ-di</i>		'that thing' (woman)
<i>i-ϕ-di</i>		'this thing' (woman)

3.2.2.3. FEMININE

{a!} ∞ -a! ∞ -e ∞ -i ~ -ti

∞ -a! occurs after the stem mag-

E.g. <i>mag-a!-</i>		'daughter'
---------------------	--	------------

∞ -i occurs after the stem *ku!l-* and also the stems ending in stops (other than nasals)

E.g. <i>kurd-i</i>		'blind woman'
<i>tunt-i</i>		'mischievous woman'
<i>pott-i</i>		'deaf woman'

∞ -e occurs in stems *ja:n-* and *ka!l-*

E.g. <i>ja:n-e</i>		'clever woman'
<i>ka!l-e</i>		'female thief'

~ -ti occurs after the stems ending in -r, -l, -l and also after the stems ending in -s and -i.

E.g. <i>kalsuga:r-ti</i>	'efficient woman'
<i>haṭaga.r-ti</i>	'stubborn woman'
<i>ha:r-ti</i>	'brahmin woman'
<i>me:r-ti</i>	'woman of me:ra caste'
<i>hol-ti</i>	'woman of holeya caste'
<i>modyol-ti</i>	'woman of washer man caste'
<i>ma:pul-ti</i>	'a muslim woman'
<i>buddol-ti</i>	'a widow, who is remarried'
<i>dikka:l-ti</i> ²	'woman of a harijan caste'
<i>nanṭa -ti</i> → <i>nanṭe-ti</i> ³	'female ralative' (23)
<i>banṭa-ti</i> → <i>banṭe-ti</i>	'woman of Banta caste' (23)
<i>minda-ti</i> → <i>minde-ti</i>	'mistress' (23)
<i>kelsi-ti</i>	'woman of barber caste' (23)

The feminine gender marker does not occur in pronominal constructions. All the allomorphs, except one are not phonologically conditioned. Since they contrast with the corresponding masculine nouns (eg: kurḍ-a 'blind man', kurḍ-i 'blind woman'), they have morphological significance and hence are analysed as given above. In instances of referring to a respectable person, or a group of women, the superior plural pronoun is used, which is common for both males and females.

3.2.2.4 GENDER PLURAL

3.2.2.4.1 KINSHIP PLURAL

{ndar} ~ -ndar ~ -ka!

~ -ndar occurs after the kinship nouns ending in -a

E.g. appa-ndari	'fathers'	(16)
avva-ndari	'mothers'	(16)
anna-ndari	'elder brothers'	(16)
okka-ndari	'elder sisters'	(16)
tamma-ndari	'younger brothers'	(16)

~ ka! occurs after the kinship terms ending in e, & -i.

E.g. sose-ka!-a	'of daughters-in-law'	(16)
atte-ka!-ige	'to mothers-in-law'	(16)
na:dini-ka!-ige	'to sisters-in-law'	(16)
tange-ka!-ige	'to younger sisters'	(16)

3.2.2.4.2 SUPERIOR PLURAL

The superior plural is used in referring to single respectable persons, both males and females, or a group of persons.

{ar} ∞ φ ∞ -r, ∞ -ar

∞ -φ- occurs after the Third person marker φ in the demonstrative bases.

E.g. av-φ-φ-u	'they' (also he or she)
iv-φ-φ-u	'these persons' (also this man or woman)

∞ -r occurs after the Third person marker φ which is preceded by a vowel ending stem.

E.g. ya:-φ-r:	'which persons (man or woman)'
---------------	--------------------------------

$\infty -ar$ occurs elsewhere.

E.g. <i>naŋt-ar</i>	'relatives'	(17)
<i>ha:r-ar-</i>	'brahmins'	(17)

3.2.2.4.3 COMMON PLURAL

{*ga!*} $\infty -kal \infty -ga!$

$\infty -kal$ occurs after the stem mag-

E.g. <i>mag-kal-</i> → <i>mak-kal</i>	'children'	(16 & 18)
- <i>ga!</i> occurs elsewhere.		

E.g. <i>a:ne-ga</i>	'elephants'	(16 and 18)
<i>kuire-ga</i>	'horses'	(16 and 18)
<i>kotti-ga</i>	'cats'	(16 and 18)
<i>etti-ga</i>	'oxen'	(16 and 18)
<i>ka:ɳa-ɳ-ga</i>	'buffalos'	(16 and 18)
<i>mara-ɳ-ga</i>	'trees'	(16 and 18)
<i>pustaka-ɳ-ga</i>	'books'	(16 and 18)
<i>ka:gada-ga</i>	'papers'	(16 and 18)
<i>arsu-ga</i>	'kings'	(16 and 18)
<i>ra:ɳi-ga</i>	'queens'	(16 and 18)
<i>mantri-ga</i>	'ministers'	(16 and 18)

3.3 INFLEXIONAL INCREMENTS

St ± Pn ± NM +

{*ar*} $\infty -ar- \infty -a- \sim -k- \sim -d-$

$\infty -ar$ occurs after the Gender Number markers and before all case markers except the dative in Demonstrative and Interrogative bases.

E.g. <i>a-ϕ-d-ar-a</i>	'Its' or 'It'
<i>a-ϕ-d-ar-li</i>	'in it'
<i>av-ϕ-ar-a</i>	'their' or 'them'
<i>ya-ϕ-d-ar-nda</i>	'from which' or 'by which'

∞ -a occurs between number markers and Instrumental or Ablative case markers in Personal pronominal bases.

E.g. <i>na-n-a-nda</i>	→	<i>na-nn-a-nda</i>	'by or from me'
<i>na-m-a-nda</i>	→	<i>na-mm-a-nda</i>	'by or from me'
<i>ni-n-a-nda</i>	→	<i>ni-mm-a-nda</i>	'by or from you'
<i>ni-m-a-nda</i>	→	<i>ni-mm-a-nda</i>	'by or from you'
<i>ta-n-a-nda</i>	→	<i>ta-nn-a-nda</i>	'by or from self'
<i>ta-m-a-nda</i>	→	<i>ta-mm-a-nda</i>	'by or from selves'

~ -k- occurs between -a ending inanimate nouns and dative case marker.

E.g. <i>mar-k-ke</i>	'to the tree'
<i>puṣṭaka-k-ke</i>	'to the books'
<i>haṇa-k-ke</i>	'to money'

~ -d- occurs between -a ending inanimate nouns and genitive case marker.

E.g. <i>mara-d-a</i>	'of the tree'
<i>puṣṭaka-d-a</i>	'of the book'
<i>haṇa-d-a</i>	'of the money'

3.4 CASES

St ± Pn.M ± NM ± In.I +

The nominative is unmarked both in GK and SK. The Accusative-Genitive and Instrumental-Ablative are homophonous pairs in GK, while in SK, only the latter pair is met with. The Locative marker occurs only in inanimate nouns in GK, but in SK, it occurs in animate nouns also. However, in animate nouns in GK, when necessary, the Locative sense is expressed by Post positions. The distinction between the Accusative and Genitive is sometimes determined in -a ending inanimate nouns, by the kind of

Inflexional increments with which they occur. e.g. *mara-n-a kədi* 'cut the tree' (Acc), *mara-d-a gelli* 'branch of the tree' (Gen) (See 3.3). Such instances are rare in number and moreover, -n- is sometimes used in both functions. e.g. *mara-n-a gelli* ~ *mara-d-a gelli* 'branch of the tree', *mara-n-a kədi* 'cut the tree'. This variation, perhaps be explained through old Kannada examples, where we come across a few words of inanimate class taking the same ending as the animate class. e.g. *mara-n-a* 'of the tree', *kolan-a* 'of the lake', *polan-a* 'of the field' etc. -n occurring before the case marker, perhaps indicates the Singular number, since, these are the concrete objects and therefore countable. Abstract nouns, or the objects which occur in a group or mass, are treated with -m ending. e.g. *guṇam* 'good character' (Nom), and such nouns will have -d- as Inflectional increment before case markers other than the Dative. e.g. *guṇa-d-a* 'of the good character', *ku:ṭa-d-a* 'of the gathering', *ru:pa-d-a* 'of the beauty'. Though this irregularity in pattern was levelled in middle and modern Kannada GK, seems to have retained the old pattern in having the variation regarding the Inflectional Increments, referred to above.

Since the Nominative is not marked, it has not been included in the analysis following.

3.4.1 ACCUSATIVE

{a} ~ -a ~ -na⁴

~ -a occurs after nouns stem ending in consonants.

E.g. *ad-ar-a* 'It'

av-ar-a 'them'

ya:r-a 'whom'

<i>ha:r-r-a</i>	'brahmins'	(17)
<i>mara-ñ-gal-a</i>	'the trees'	(22)
<i>na-nn-a</i>	'me'	(21)
<i>av-â-n-a</i>	'him'	

~ -na occurs elsewhere.

E.g. <i>akka-na</i>	'elder sister'
<i>avva-na</i>	'mother'
<i>appa-na</i>	'father'
<i>mara-na</i>	'the tree'
<i>kurd-i-na</i>	'the blind woman'
<i>kotti-na</i>	'the cat'
<i>e:ñi-na</i>	'the ladder'
<i>atte-na</i>	'the aunt'
<i>ko:te-na</i>	'the fort'
<i>guru-na</i>	'the teacher'
<i>ka:ri-na</i>	'the car'

3.4.2 INSTRUMENTAL

{-nda} ~ -da ~ nda

~ -da occurs after -n ending stems in demonstratives.

E.g. <i>av-â-n-da</i>	'by him'
<i>iv-â-n-da</i>	'by this man'

~ -nda occurs elsewhere.

E.g. <i>appa-nda</i>	'by father'
<i>mara-nda</i>	'by the tree'
<i>ad-ar-nda</i>	'by it or her'
<i>kurd-i-nda</i>	'by the blind woman'
<i>kotti-nda</i>	'by the cat'
<i>e:ñi-nda</i>	'by the ladder'
<i>atte-nda</i>	'by aunt'

<i>ko:te-nda</i>	'by the fort'
<i>ko:tu-nda</i>	'by the coat'
<i>ka:ri-nda</i>	'by the car'
<i>mara-ñ-gal-nda</i>	'by the trees'

3.4.3 DATIVE

{nge} ~ -ke ~ -nge ~ -ge

~ ke occurs after the noun stems having the Inflectional increment -k-, and also after the Demonstrative and Interrogative pronouns.

E.g. <i>mara-k-ke</i>	'to the tree'
<i>pustaka-k-ke</i>	'to the book'
<i>hana-k-ke</i>	'to the money'
<i>adi-ke</i>	'to it'
<i>idi-ke</i>	'to this'
<i>ya:di-ke</i>	'to which'
<i>ya:vu-ke</i>	'to which (pl)'
<i>avu-ke</i>	'to them'

~ -nge occurs after -a ending noun stems belonging to animate class.

E.g. <i>appa-nge</i>	'to father'	(22)
<i>avva-nge</i>	'to mother'	(22)
<i>akka-nge</i>	'to elder sister'	(22)
<i>ko:na-nge</i>	'to the buffalo'	(22)
<i>gi:na-nge</i>	'to the parrot'	(22)

~ -ge occurs elsewhere.

E.g. <i>tange-ge</i>	'to younger sister'
<i>katte-ge</i>	'to the donkey'
<i>ko:tu-ge</i>	'to the coat'
<i>ka:ri-ge</i>	'to the car'
<i>mantri-ge</i>	'to the minister'

<i>mara-ñ-gal-ge</i>	\rightarrow	<i>mara-ñ-gəl-i-ge</i>	'to the trees'
			(16 and 20)
<i>ko:na-ñ-gal-ge</i>	\rightarrow	<i>ko:na-ñ-gəl-i-ge</i>	'to the buffalos'
			(16 and 20)
<i>ka:di-gal-ge</i>	\rightarrow	<i>ka:-di-gəl-i-ge</i>	'to the forests'
			(16 and 20)
<i>iv-a-n-ge</i>	\rightarrow	<i>iv-a-ñ-ge</i>	'to this man'
			(20)

3.4.4 ABLATIVE

{*nda*} ~ -*nda*

E.g. <i>appa-nda</i>		'from the father'
<i>mara-nda</i>		'from the tree'
<i>ava-n-nda</i>	\rightarrow	<i>av-â-nda</i>
		'from him'
<i>ad-ar-nda</i>		'from it'
<i>ko:te-nda</i>		'from the fort'
<i>mara-ñ-ga!-nda</i>		'from the trees'

3.4.5 GENITIVE

{*na*} ~ -*na* ~ -*a*

~ -*na* occurs after vowel ending noun stems.

E.g. <i>appa-na</i>		'father's'
<i>avva-na</i>		'mother's'
<i>kotti-na</i>		'of the cat'
<i>ko:te-na</i>		'of the fort'
<i>mane-na</i>		'of the house'

~ -*a* occurs elsewhere.

E.g. <i>mara-d-a</i>		'of the tree'
<i>ad-ar-a</i>		'its'
<i>ya:r-a</i>		'whose'
<i>ha:r-r-a</i>		'brahmins'

3.4.6 The Locative case construction is morphological in inanimate nouns (by affixing the marker -li) and in animate nouns it is periphrastic (by compounding post-positions to noun stems).

3.4.6.1 LOCATIVE (Morphological)

{li} ~ -li

E.g. <i>mara-li</i>	→ <i>marə-li</i>	'on the tree'	(16)
<i>e:ni-li</i>		'on the ladder'	
<i>ko:te-li</i>		'in the fort'	
<i>ka:ri-li</i>		'in the car'	
<i>ad-ar-li</i>		'in it'	

3.4.6.2 LOCATIVE (Periphrastic)

hakkale 'near'

E.g. <i>nanna-hakkale</i>		'with me, in me'
<i>appana-hakkale</i>		'with father, in father'
<i>olege</i>		'inside, within'
<i>na-nn-a</i> + <i>olege</i>	<i>na-nn-olege</i>	'within myself'
<i>appa-na</i> + <i>olege</i>	<i>appa-n-olege</i>	'within father'
<i>av-ar-a</i> + <i>olege</i>	<i>av-ar-olege</i>	'within themselves'
<i>me:le</i>		'above'
<i>appa-n-a-</i> <i>me:le</i>		'upon father'
<i>mara-d-a</i> <i>me:le</i>		'upon the tree'
<i>ya:r-a</i> <i>me:le</i>		'upon whom'
<i>kelege</i>		'below'
<i>mara-d-a</i> <i>kelege</i>		'below the tree'
<i>ko:te-na</i> <i>kelege</i>		'below the fort'
<i>e:ni-na</i> <i>kelege</i>		'below the ladder'

Though in declining the Locative, there is no difference between animate and inanimate class nouns in SK, it also has the periphrastic construction of Locative, as GK. The

post positions used in such constructions refer to the location not within the noun but indicate the nearness or proximity between the two nouns in a sentence. e.g. avana hattira *hāṇa* illa ‘he has got no money on him,’ where hattira, shows the relationship of nearness between avana and *hāṇa*. The usual post position for indicating location or proximity is ‘hattira’, which is a derived form from two verbal roots., i.e. patti ‘having joined’+ir-a, the state of being joined’. In other Dravidian languages also the tendency is to use a post-position for the locative if the noun belongs to animate class, (e.g. Tamil *en kitte* ‘near me’, *appa:* *kitte* ‘near father’ etc.). The post position hakkale used in GK locative construction is not related to that of SK, viz, ‘hattira’. It shows very close resemblance in form and meaning to the old Tamil form ‘pakkal’ used in similar constructions⁵. We do not come across this word in any ancient records of Kannada and also this word has fallen to disuse in modern Tamil. It is interesting to note that this form with the phonetic change of p into h- in the course of the History of Kannada is being used in GK quite naturally. The fact that GK, never had any direct contact with Tamil, and bears similaity in the use of this word, makes us to reconstruct the same to Proto-Kannada and now, perhaps this is the only known dialect to have a natural use for the word.

3.4.7 SOCIATIVE

This is also expressed periphrastically by compounding *ottige* with any noun stem.

Eg: *na-n-* + *ottige* → *na-nn-ottige* ‘with me’ (21)

ya:r- + *ottige* → *ya:r-ottige* ‘with whom’

appa-n- + *ottige* → *appa-n-ottige* ‘with father’

FOOT NOTES

1. Cf. K. Kushalappa Gowda, Gender distinction in Gowda, Kannada, Emeneau SaSThipu:rti commemoration volume—Indian Linguistics, Poona and Annamalai University, 1965.
2. The word *dikka:l* is borrowed from Tulu, where the final *-a:l* is a feminine gender suffix in contrast with the masculine *-e*, e.g. *dikke* ‘a male member of dikka caste’. The words *dikka* and *dikka:l* are borrowed into GK and the latter word is once again added with *-ti* the feminine gender suffix. In GK, *-a:l*, one of the feminine suffixes will become—a finally (See 2.1.18), thereby the feminine noun also will be **dikka*, thus raising conflict with the noun in masculine gender. The addition of *-ti to dikka:l*, which is already a noun in feminine class could be explained as a means to avoid homonymic clash.
3. For frequency of vowel changes in GK, see K. Kushalappa Gowda, Gowda Kannada and Standard Kannda, a synchronic comparison— Paper presented in the Seminar on Comparative Dravidian and subsequently published in papers on Dravidian— by CAS in Linguistics, Annamalai University, Annamalainagar—1969.
4. Since a nasal occurs in the allomorphs of all cases except the Locative, a suggestion of offering an alternative analysis, treating the nasal as an Inflectional increment or number, or gender marker may seem imminent. But the alternative is not favoured for the following reasons:

1. The recurrent partial occurring in all nouns irrespective of the vowels with which they end, (for examples see under -n occurs elsewhere in 3.4.1), demands making a morphemic segmentation taking the nasal as the part of the suffix.
2. The nasal cannot be taken as an Inflectional Increment since in Third person Neuter, -ar- already occurs as an Inflectional increment and consequently one cannot possibly have two inflectional increments before case marker. This solitary example cannot be taken as a basis for setting two inflectional increments in a single construction.
3. The predictability of allomorphs will become complicated.
5. Information regarding Ancient Tamil usage of 'pakkal' was given by Dr. S. V. Shanmugam in a private conversation. I am inclined to suspect the post position in question, viz., pakkal as a noun in Locative case: pakka- 'side' + al (locative) "in".

Chapter 4

Pronouns

There are four classes of pronouns: (1) personal
(2) Reflexive, (3) Demonstrative, and (4) Interrogative.

The personal pronouns constitute person and Number markers. The Demonstratives have Remote, Proximate and interrogative bases followed by third person marker which again is followed by Gender number markers. The Reflexive pronoun has the same constituents as that of First and Second person pronouns. In spite of its formal resemblance to the First and Second Person pronouns it differs from both of them in that it can concord with verbs having first and third person pronominal endings, whereas the First and Second person Pronouns concord only with verbs having the corresponding pronominal endings.

Exclusive and Inclusive First person plural pronouns do not occur in GK. Though these two different kinds of pronouns are met with in Old Kannada texts, in SK, they are not occurring now. However, in some social dialects, viz., Havyaka and Badaga, it has been reported by scholars that there are Inclusive and Exclusive pronouns in First person just as they are in other Dravidian Languages, like, Tamil, Malayalam, Telugu, Tulu and so on.

Interrogative pronouns are similar in structure to the Demonstrative pronouns. The Interrogative pronouns when

added with the conjunctive clitic *-u:* and interrogative clitic *-o:*, will function in the following manner.

<i>ya:v-a-n-u</i>	'whoever'
<i>ya:-ɸ-r-u</i>	'whoever'
<i>ya:-v-a-n-o</i>	'some one'
<i>ya:-ɸ-r-o</i>	'some one or some people'

The collective pronoun *ellaru*—'all persons', occurring in SK, is not occurring in GK, as a morphological construction and instead the Third person Plural pronoun *avu* 'they', forms a compound with the word *ella*—'all' as,

ella + avu → ell-avu 'all persons'.

The morphemes indicating number of Gendar-number are described under respective headings and the person aspects of the pronoun are described below.

4.1. FIRST PERSON.

{*na*} ~*na-* ~*na:-*

~*na-* occurs (1) before *-n*, (singular number marker), followed by all case markers and (2) before *-m*, (Plural number marker) followed by all case markers except Dative.

E.g. *na-n-a* → *na-nn-a* 'my' (21)

na-n-ge → *na-ñ-ge* 'to me' (22)

na-n-a-nda → *na-nn-a-nda* 'by me' (21)

na-m-a → *na-mm-a* 'our' (21)

na-m-a-nda → *na-mm-a-nda* 'by us' (21)

na: occurs elsewhere.

E.g. *na:* 'I' (13)

na:-v-u 'we' (13)

na:-v-ge 'to us'

na:-n-e: 'I only [emph.]'

4.2 SECOND PERSON

$\{ni:\}$ ~ni- ~nī:-, ~ni:-

~ni- occurs (1) before -n (singular number marker) followed by all case markers and (2) before -m- (Plural number marker), followed by all case markers except Dative.

E.g. ni-n-a → ni-nn-a 'your' (21)

ni-n-ge → ni-n-ge 'to you' (22)

ni-n-a-nda → ni-nn-a-nda 'by you' (21)

ni-m-a → ni-mm-a 'your' (21)

ni-m-a-nda → ni-mm-a-nda 'by you' (21)

nī:- occurs before ≠

E.g. ni:- ≠ 'you' (19)

ni:- occurs elsewhere.

E.g. ni:-v-u 'you'

ni:-v-ge 'to you'

ni:-n-e: 'you alone'

4.3 REFLEXIVE

$\{ta:\}$ ~ta- ~ta:-

~ta- occurs (1) before -n, (singular number marker) followed by all case markers and (2) before m, (plural number marker) followed by all case markers except dative.

E.g. ta-n-a → ta-nn-a 'one's self' (21)

ta-n-a-nda → ta-nn-a-nda 'by one's self' (21)

ta-n-ge → tan-i-ge 'to one's self' (20)

ta-m-a → ta-mm-a 'of their self' (21)

ta-m-a-nda → ta-mm-a-nda 'by their self' (21)

ta:- occurs elsewhere.

E.g. ta:-v-u 'self'

ta:-n-e 'self only' (emph.)

4.4 DEMONSTRATIVE THIRD PERSON PRONOUN

4.4.1 THIRD PERSON

$\{a\} \infty a\text{-}, \infty \phi\text{-}$

$\sim a$ occurs between (i) the demonstrative (ii) Interrogative bases and $-n\text{-}$, Masculine singular marker.

E.g. $iv-a-n \rightarrow iv-\tilde{a}\text{-} \quad \text{'this man'}$ (19)

$iv-a-n-a \quad \text{'this man's'}$

$av-a-n \rightarrow av-\tilde{a} \quad \text{'that man'}$

$av-a-n-a \quad \text{'that man's'}$

$ya:v-a-n \rightarrow ya:v-\tilde{a}\text{-} \quad \text{'which man'}$ (19)

$\sim \phi$ occurs elsewhere.

$i-\phi-d-i \quad \text{'this thing/woman'}$

$a-\phi-d-i \quad \text{'that thing/woman'}$

$ya:-\phi-d-i \quad \text{'which thing/woman'}$

$ya:-\phi-r-i \quad \text{'who'}$

$av-\phi-\phi-u \quad \text{'they' (persons/animals)}$

$iv-\phi-\phi-u \quad \text{'these (person/animals)'}$

Chapter 5

Adjectives and Adverbs

Certain words, are neither declined nor conjugated and they occur as attributes to nouns and verbs. These are called adjectives and adverbs respectively. Some of them occur as attributes for both nouns and verbs. The following are the examples of the adjectives.

ella— ‘all’ *ell-avu* ‘all persons’

kempu ‘red’ *kem-* occurs in other constructions like *keñci* ‘redness’, *keñ-da* ‘red hot coal’

koppu ‘black’ *kɔr* occurs in other constructions as, *kɔri* ‘black,’ ‘charcoal’, *kɔriya* ‘black man’

anseṇa ‘yellow’. It is a noun by itself, meaning “turmeric”. Since, there is no separate word for yellow colour in GK, the word denoting the yellow object is used to denote the colour’

ni:la ‘blue’ *ella* ‘all’

haṭe ‘old’ Further derivation is possible by affixing some suffixes; *haṭ-ba* ‘old man’ *haṭ-ti* ‘old thing’.

hos-a ‘new’ Further derivation is possible by adding suffixes. *hos-ba* ‘new person’, *hos-ti* ‘new thing’, ‘festival on which day new rice will be cooked’.

ba:ṭa ‘much’ (prob:from Skt *banuṭa* through SK *bahaṭa*)

ba:ri ‘much’ ‘big’

- hañña* 'a little', probably derived from *hani* (<*pani*) 'a drop'
- tumba* 'much', probably derived from *tumbu* 'to fill'
- olla* 'good' *olla-ta* 'well formed (body)' and *olla-di* 'good thing' are the other derived forms.
- bisi* 'hot' *becca*, *beccange* 'being hot', are the other derived forms from the adjective base. Prob. *be:y-* 'to boil' also is connected to this'.

The following are the examples of ADVERBS.

- bellange* 'whitish' *beldi* 'that which is white', *bolpu* 'light' are the other derived forms from the same root'.
- mettange* 'softly' derived from *medu* 'soft'. But the root *medu* does not occur in GK. *midi>miji* 'to pound', 'to make soft', is probably connected to this root'.
- kammaṅge* 'sweetly'
- tanṅange* 'cool', *tanī(>ceṇi)* 'to become cool' is the verbal root from which this adverb is, perhaps derived.
- telliṅge* 'thinly', dilutedly' *teļi* 'rice water' is perhaps connected with this root'.
- summaṅge* 'quietly, without any purpose, unnecessarily'
- becca* 'hot' *beccange* is the other derived adverb from the same root.
- pakka* 'at once', 'quickly'

be:ga 'at once, quickly' probably this has come to GK through SK, from Skt. *ve:ga*

omme 'once' *bavnob yldudorq* 'down'

imme 'twice' *mln flow* *m njo* 'boog'

The following are the onomatopoeic words which are used as adverbs.

jiri *jiri* 'dripping'

paṭa *paṭa* 'drop by drop'

gada *gada* 'making a grappling noise'

kata *kata* 'grattling, the imitative noise of grinding the teeth'.

Chapter 6

Interjections

Interjection showing agreement, disagreement, pain, wonder, disgust, etc. occur in GK. Always they occur as links between conversational bits.

The following are the examples of Interjections of agreement

1. *hū* "yes" "alright", "then"

This is used in the middle of speech where the speaker makes a statement and the hearer agrees with him and indicates that he is ready to hear further from the speaker.

When this Interjection occurs after the speaker gave a command, it indicates that the hearer is willing to follow the instruction of the speaker. In the same way, the following two Interjections also are used. But, they can also occur after the speaker completed his speech, and the conversation terminates with the utterance of any one of them by the hearer.

E.g. 2. *səri* "yes", "alright"

3. *səy* , ,

4. *hā:* , ,

The following are the examples of Interjections of disagreement.

5. *ūhū* 'no'
6. *ā:hā* 'don't'

The following are the examples of 'Interjections denoting wonder.'

7. *abba* 'oh'
8. *a:ha:* 'oh'
9. *o:ho* 'oh'

The following is the example of Interjection showing anger and displeasure

10. *happa:* "how dare you!"

The following are the examples showing disgust.

11. *ci ~ ci* "o! how bad!"
12. *tu: ~ tu:le* ,,,

Chapter 7

Noun Derivation

7.1. DERIVATION BY SUFFIXATION

Some nouns are analysable as having two or more than two morphemes and in all such nouns one of the constituents, i.e. the Post-junctural segment, will be a root morpheme. The next one will be a nominalising suffix, which, on affixation to the root, converts the root into a noun. The root may belong to noun, verb, or an adjective class. These suffixes are not predictable and therefore are listed below.

7.1.1 NOUN DERIVATIVE SUFFIXES

Except *-ka*, *-iya*, and *-ya*, which are having the masculine gender element in them, all other suffixes do not have any reference to the gender. The above ones are included in the derivative category, since, they do not have directly opposed feminine gender forms. The exact number of occurrences of *-vant-is* not counted, since, the suffix can be added to any noun to derive further nouns, meaning one who possesses of the property referred to in the root morpheme. However, the most common constructions, are taken into account and the functional load of each has been calculated.

The following table gives the details of the occurrence of the derivative suffixes and their functional load. The total number of occurrences of the derivative nouns is 140 in the sample and percentage is calculated on this total.

Number of Derivative suffixes = 50

Total Number of Derived nouns = 140

Derivation of nouns per suffix = $\frac{140}{50} = 2.80$

Therefore the mean reading = 2.80

7.1.2 Table showing the functional load of derivation suffixes

Suffixes	Derived from Roots						Funct. load	Plus Minus of the mean. 2.80	
	Adjectives			Verbs					
	Nouns	Actual	%	Actual	%	Actual	%		
1. -ka				1	0.71	0.71	-2.09		
2. -ki				3	2.14	2.14	-0.66		
3. -ke				3	2.14	2.14	-0.66		
4. -ge	1	0.71		1	0.71	1.42	-1.38		
5. -gi				1	0.71	0.71	-2.09		
6. -ci				1	0.71	0.71	-2.09		
7. -Ti				3	2.14	2.14	-0.66		
8. -De				1	0.71	0.71	-2.09		
9. -Di							-2.09		
10. -ta	1	0.71		2	1.42	0.71	1.42	-1.38	
11. -ti	1	0.71		1	0.71	0.71	-2.09	-1.38	
12. -ti				2	1.42	1.42	-1.38		
13. -di				2	1.42	1.42	-1.38		

Suffixes	Derived from Roots						Funct load	Plus Minus of the mean 2.80		
	Nouns		Adjectives		Verbs					
	Actual	%	Actual	%	Actual	%				
14. -de	2	1.42					1.42	-1.38		
15. -pu	2	1.42	2	1.42			2.84	+0.04		
16. -me	2	1.42					1.42	-1.38		
17. -hi			3	2.14			2.14	-0.66		
			(4)	(2.85)			(2.85)	(+ 0.04)		
18. -va	1	0.71					0.71	-2.09		
19. -vu	5	3.57					3.57	+1.77		
	(1)	(0.71)					(0.71)	(-0.09)		
20. -Lu	1	0.71					0.71	-2.09		
21. -ne	1	0.71					0.71	-2.09

49c. -Ti					2	1.42	1.42	-1.38		
50 -Want	6						4.29	+1.49		

7.1.3 The following are the examples of derived nouns :

-ka	bodi	'beat'	+	ka	→ bod-ka	'one who smears'
-ki	*bod-	'live'	+	ki	→ bod-ki	'life'
	ɔdi	'break'	+	ki	→ ɔd-ki	'crack,breakage'
	hari	'tear'	+	ki	→ har-ki	'rags'
-ke	be:y	'burn,boil'	+	ke	→ be:n-ke	'burning,heat'
	*bay-	'desire'	+	ke	→ bay-ke	'desire'
	hodi	'cover'	+	ke	→ hodi-ke	'cover.
						blanket'
-ge	ney	'weave'	+	ge	→ ney-ge	'weaving'
-gi	hir-	'big'	+	gi	→ hig-gi	'swelling with pride'
-ci	*ken-	'red'	+	ci	→ keñ-ci	'reddishness of hair'
-ti	nət	'plant'	+	ti	→ nət-ti	'vegetables'
	*bið	'to leave'	+	ti	→ bið-ti	'free labour'
	had-	'to lie down'	+	ti	→ hat-ti	'cowshed'
-da	kem-	'red'	+	da	→ ken-da	'red hot coal'
-di	tin-	'eat'	+	di	→ tin-di	'eatables'
	ka:n-	'see'	+	di	→ kən-di	'hole to see'
-ta	hodi	'beat'	+	ta	→ hod-ta	'beating'
	me:pu-	'grazing'	+	ta	→ me:pa-ta	'one who grazes'
-ti	mu:ku	'nose'	+	ti	→ mu:kiti	'nosewing'
-ti	hosa	'new'	+	ti	→ hos-ti	'new thing'
	hale	'old'	+	ti	→ hal-ti	'old thing'
-di	bala	'right'	+	di	→ bal-di	'that which is right'
	eda	'left'	+	di	→ ed-di	'that which is left'

<i>-de</i>	<i>mun</i> ‘front’	+	<i>de</i>	→ <i>mun-de</i> ‘frontage’
	<i>hin</i> ‘bank’	+	<i>de</i>	→ <i>hin-de</i> ‘backside’
<i>-pu</i>	<i>bol-</i> ‘white’	+	<i>pu</i>	→ <i>bol-pu</i> ‘light’
	<i>ka:y</i> ‘protect’	+	<i>pu</i>	→ <i>ka:-pu</i> ‘nest of a hen’
	<i>huri</i> ‘tigithen’	+	<i>pu</i>	→ <i>hurpu</i> ‘enthusiasm’
	<i>me:y</i> ‘to graze’	+	<i>pu</i>	→ <i>me:-pu</i> ‘grazing’
<i>-ne</i>	<i>be:y</i> ‘to burn’	+	<i>ne</i>	→ <i>be:-ne</i> ‘pain’
<i>-me</i>	<i>her</i> ‘big’	+	<i>me</i>	→ <i>hem-me</i> ‘bigness’
<i>-li</i>	<i>okku</i> ‘to thrash’	+	<i>li</i>	→ <i>okki-li</i> ‘farmer, tenant’
	<i>hag*</i> ‘to divide’	+	<i>li</i>	→ <i>hagi-li</i> ‘daytime’
	<i>iri*</i> ‘black’	+	<i>li</i>	→ <i>irli</i> ‘night’
	<i>bisi</i> ‘hot’	+	<i>li</i>	→ <i>bisi-li</i> ‘sun’
	<i>koy</i> ‘cut’	+	<i>li</i>	→ <i>hoy-li</i> ‘strong current’
	<i>siđi</i> ‘to scatter’	+	<i>li</i>	→ <i>siđ-li</i> ‘lightning’
<i>-va</i>	<i>*pađ</i> ‘to lie	+	<i>va</i>	→ <i>pođva</i> ‘what’
	down’			
<i>-vu</i>	<i>ka:y</i> ‘to become	+	<i>vu</i>	→ <i>ka:-vu</i> ‘hotness’
	hot’			
	<i>beļe</i> ‘grow’	+	<i>vu</i>	→ <i>beļəvu</i> ‘cunningness’
				‘mischief’
	<i>kađi</i> ‘to cross’	+	<i>vu</i>	→ <i>kad-əvu</i> ‘passage’
	<i>puļi</i> ‘to pain’	+	<i>vu</i>	→ <i>puļevu</i> ‘pain by
				rheumaticism’
	<i>sa:y</i> ‘to die’	+	<i>vu</i>	→ <i>sa:-vu</i> ‘death ceremony’
<i>-lu</i>	<i>muccu</i> ‘to close,	+	<i>lu</i>	→ <i>muccu-lu</i> ‘lid, cover’
	cover’			
<i>-ale</i>	<i>*katt</i> ‘that	+	<i>-ale</i>	→ <i>kattale</i> ‘darkness’
	which is black’			
	<i>*batt-</i> ‘empty’	+	<i>ale</i>	→ <i>bett-ale</i> ‘being naked’
<i>-ada</i>	<i>ottu</i> ‘to press’	+	<i>ada</i>	→ <i>ott-ada</i> ‘pressing’
<i>-afe</i>	<i>kem</i>	+	<i>afe</i>	→ <i>kemmenate</i> ‘reddish’

-a:la	<i>modi-</i>	'leave, camp'	+	<i>a:ra</i>	→ <i>bida:ra</i> 'camp'
-a:ra	* <i>bid-</i>	'leave camp'	+	<i>a:ra</i>	→ <i>bida:ra</i> 'camp'
	<i>gu:du</i>	'to flock'	+	<i>a:ra</i>	→ <i>guða:ra</i> 'small hutment'
-ike	<i>nambu</i>	'believe'	+	<i>ike</i>	→ <i>namb-ike</i> 'belief'
	<i>he:l</i>	'say'	+	<i>like</i>	→ <i>he:l-ike</i> 'message, invitation'
	<i>ke:l</i>	'ask'	+	<i>ike</i>	→ <i>ke:l-ike</i> 'request'
	<i>na:cí</i>	'to be ashamed'	+	<i>ike</i>	→ <i>na:c-ike</i> 'shame'
	<i>ho:lí</i>	'resemble'	+	<i>ike</i>	→ <i>ho:l-ike</i> 'resemblance'
	<i>ka:ní</i>	'to see'	+	<i>ike</i>	→ <i>ka:n-ike</i> 'presentation'
	<i>ba:l</i>	'live'	+	<i>ike</i>	→ <i>ba:l-ike</i> 'durability'
	<i>añju</i>	'to fear'	+	<i>ike</i>	→ <i>añj-ike</i> 'fear'
	<i>yajma:na</i>	'master'	+	<i>ike</i>	→ <i>yajma:n-ike</i> 'mastership'
	<i>eccar</i>	'to be awakened'	+	<i>ike</i>	→ <i>eccar-ike</i> 'carefulness'
	<i>he:sí</i>	'to dislike'	+	<i>ike</i>	→ <i>he:s-ike</i> 'dirt'
-ige	<i>ha:s</i>	'to spread'	+	<i>ige</i>	→ <i>ha:s-ige</i> 'bed'
	<i>adí</i>	'to cook'	+	<i>ige</i>	→ <i>ad-ige</i> 'cooking'
	<i>uðu</i>	'to wear'	+	<i>ige</i>	→ <i>uð-ige</i> 'dress'
	<i>bodi</i>	'beat'	+	<i>ige</i>	→ <i>bad-ige</i> 'stick'
-iña	<i>ga:ña</i>	'oil mill'	+	<i>iña</i>	→ <i>ga:ñ-iña</i> 'oilmiller'
-iri	* <i>hod</i> *	'to fry'	+	<i>iri</i>	→ <i>hodi-ri</i> 'corn'
-eni	<i>ba:c</i>	'to comb'	+	<i>eni</i>	→ <i>ba:ceñi</i> 'comb'
	<i>i:ñc</i>	'to comb'	+	<i>eni</i>	→ <i>i:ñceñi</i> 'wooden comb'
eli	<i>nədg</i>	'to shiver'	+	<i>eli</i>	→ <i>nədg-eli</i> 'shivering'
	<i>alg</i>	'cry'	+	<i>eli</i>	→ <i>alg-eli</i> 'crying'
	<i>pukku</i>	'fear'	+	<i>eli</i>	→ <i>pukk-eli</i> 'fear'

-esa	<i>ubbu</i> 'swell'	+	<i>esa</i>	→ <i>ubbesa</i> 'swelling of belly'
- <i>ṭi</i>	<i>kutta</i> 'disease'	+	<i>ṭi</i>	→ <i>kutt-ṭti</i> 'rotten'
- <i>si</i>	<i>tin</i> 'eat'	+	<i>si</i>	→ <i>ttn-si</i> 'eatables'
- <i>o:na</i>	<i>kəṭṭ</i> 'boiled'	+	<i>o:na</i>	→ <i>kəṭṭo:na</i> 'building'
- <i>ga:r</i>	<i>a:ṭa</i> 'play'	+	<i>ga:r</i>	→ <i>a:ṭa-ga:r</i> 'player'
	<i>haṭa</i> 'stubbornness'	+	<i>ga:r-</i>	<i>haṭa-ga:r</i> 'stubborn person'
	<i>ma:ṭa</i> 'sorcery'	+	<i>ga:r</i>	→ <i>ma:ṭa-ga:r</i> 'man who engages in sorcery'
	<i>kelsa</i> 'work'	+	<i>ga:r</i>	→ <i>kelsa-ga:r</i> 'worker'
	<i>mo:sa</i> 'cheating'	+	<i>ga:r</i>	→ <i>mo:sa-ga:r</i> 'cheater'
	<i>cela</i> 'stubbornness'	+	<i>ga:r</i>	→ <i>cela-ga:r</i> 'stubborn person'
	<i>ko:pa</i> 'anger'	+	<i>ga:r</i>	→ <i>ko:pa-ga:r</i> 'angry person'
	<i>kəñci</i> 'bell metal'	+	<i>ga:r</i>	→ <i>kəñci-ga:r</i> 'bell-metal maker'
	<i>sonna</i> 'gold'	+	<i>ga:r</i>	→ <i>sonne-ga:r</i> 'goldsmith'
	<i>cerma</i> 'skin'	+	<i>ga:r</i>	→ <i>sama-ga:r</i> 'cobbler'
	<i>su:le</i> 'prostitute'	+	<i>gu:r</i>	→ <i>su:le-ga:r</i> 'prosti- tution'
	<i>bale</i> 'net'	+	<i>ga:r</i>	→ <i>baleṅga:r</i> 'spider'
	<i>bałe</i> 'bangles'	+	<i>ga:r</i>	→ <i>bałe-ga:r</i> 'bangles dealer'
	<i>carce</i> 'discuss'	+	<i>ga:r</i>	→ <i>carce-ga:r</i> 'debater'
- <i>gal-</i>	<i>boy</i> 'scold'	+	<i>gołi</i>	→ <i>boy-gołi</i> 'scolding'
- <i>tana</i>	<i>heddi</i> 'innocence'	+	<i>tana</i>	→ <i>heddi-tana</i> 'being innocent'
	<i>su:le</i> 'prostitute'	+	<i>tana</i>	→ <i>su:le-tana</i> 'being a prostitute'

<i>he:le</i> 'cocquetery'	+	<i>tana</i>	→ <i>he:le-tana</i> 'being a cocquet'
<i>ka!la</i> 'thief'	+	<i>tana</i>	→ <i>ka!la-tana</i> 'being a thief'
<i>bada</i> 'poor'	+	<i>tana</i>	→ <i>badas-tana</i> 'poverty'
<i>he:di</i> 'coward'	+	<i>tana</i>	→ <i>he:di-tana</i> 'being a coward'
<i>huduga</i> 'boy'	+	<i>tana</i>	→ <i>huduga-tana</i> 'boyishness'
<i>e e</i> 'young'	+	<i>tana</i>	→ <i>e a-tana</i> 'being young'
<i>ja:na</i> 'clever'	+	<i>tana</i>	→ <i>ja:na-tana</i> 'cleverness'
- <i>stike</i>	<i>dodd̥a</i> 'big'	+	<i>stike</i> → <i>dodd̥a-stike</i> 'being big'
- <i>mbu</i>	<i>ir-</i> 'to be'	+	<i>mbu</i> → <i>i-mbu</i> 'place, shelter'
	<i>cem</i> 'red'	+	<i>mbu</i> → <i>ce-mbu</i> 'pot made of metal'
	<i>tar</i> 'coming'	+	<i>mbu</i> → <i>ta-mbu</i> 'shelter'
	<i>tale</i> 'head'	+	<i>mbu</i> → <i>tale-mbu</i> 'pillow'
- <i>ya</i>	<i>ca:li</i> 'saree'	+	<i>ya</i> → <i>ca:lya</i> 'weaver'
- <i>i</i>	<i>add̥a</i> 'across'	+	<i>i</i> → <i>add̥-i</i> 'obstacle'
- <i>e</i>	<i>nađi</i> 'walk'	+	<i>e</i> → <i>nađe</i> 'passage'
	<i>kaṭṭu</i> 'build'	+	<i>e</i> → <i>kaṭṭ-e</i> 'raised platform'
	<i>kettu</i> 'to chop off'	+	<i>e</i> → <i>kett-e</i> 'chop'
- <i>u</i>	<i>mari</i> 'forget'	+	<i>u</i> → <i>mar-u</i> 'forgetting'

V→V:

<i>id̥i</i> 'to keep'	→ <i>i:di</i> 'short, pawn'
<i>ked̥</i> 'to be spoiled'	→ <i>ke:di</i> 'jealousy'
<i>pađi</i> 'to suffer'	→ <i>pa:di</i> 'suffering'

B→PV

<i>da</i> <i>ti</i> <i>te</i>	
	<i>a:di</i> 'to play'

<i>no:d-</i> 'to see'	→ <i>no:ta</i> 'scene'
<i>ku:d-</i> 'to gather'	→ <i>ku:ta</i> 'gathering'
<i>ma:d</i> 'to do'	→ <i>ma:ta</i> 'sorcery'
<i>u:d</i> 'to feed'	→ <i>u:ta</i> 'meals'
<i>ka:d</i> 'to trouble'	→ <i>ka:ta</i> 'trouble'
<i>to:d</i> 'to burrow'	→ <i>to:ta</i> 'garden'
<i>hu:d</i> 'plough'	→ <i>hu:te</i> 'ploughing'
<i>na:d</i> 'plant'	→ <i>na:ti</i> 'planting'
<i>o:d</i> 'to run'	→ <i>o:ta</i> 'running'
<i>ka:d</i> 'forest'	→ <i>ka:ti</i> 'bicon'

-vant-

<i>buddi</i> 'knowledge' +	<i>vant</i> → <i>buddivont-a</i> 'learned man'
<i>hana</i> 'money'	+ <i>vant</i> → <i>hapavant-a</i> 'rich man'
<i>guṇa</i> 'quality'	+ <i>vant</i> → <i>gunavant-a</i> 'good person'
<i>bala</i> 'strength'	+ <i>vant</i> → <i>balavant-a</i> 'strong man'
<i>punya</i> 'good, virtue'	+ <i>vant</i> → <i>punyavant-a</i> 'lucky man'
<i>ru:pu</i> 'form'	+ <i>vant</i> → <i>ru:pavant-a</i> 'beautiful person'

7.2. DERIVATION BY COMPOUNDING:

Two or more segments can be identified in some constructions where each of the segments have the potentialities of a word. The construction, constituting such segments are called compounds and the resultant form, i.e. the compound, is treated as a single stem for all further morphological constructions (e.g. declension). These compounds, on the basis of their constituents, can be classified into four categories:

- (1) ENDOCENTRIC: Where the last constituent is the Head and the preceding ones are Attributes.
- (2) EXOCENTRIC: Where there is no Head in the construction and both the constituents together signify something or someone-other than they individually refer to.
- (3) CO-ORDINATE: Where both constituents are Heads.
- (4) ECHO-COMPOUNDS: Where one of the words is meaningless or echo with a change in initial syllable.

The compounds have the constituents belonging to the following parts of speech:

- (1) All the constituents are Nouns.
- (2) The first one is an Adjective and the last one is a Noun.
- (3) The first one is a Verb and the following one is a Noun.
- (4) Both are verbs, but the compound is a noun.
- (5) One of the constituents is an echo word.

The N+N, compounds mentioned in (1) above, have the following characteristics. (1) The Head of a noun is already derived from a verb or it is a verbal noun.

The part of the word whose meaning is not known, or doubtful is noted with an asterisk mark. When the meaning is not known, it is left blank.

7.2.1. ENDO-CENTRIC COMPOUNDS:

The following are the examples for the Endo-Centric compounds :

adigkone 'kitchen'

adige 'cooking' *ko:ne* 'room'

adipa:ya 'foundation'

adi 'under' *pa:ya* 'construction'

ra:gikəlli 'grinding stone'

ra:gi 'millet', *kəlli* 'stone'

ka:lidi:pa 'lamp'

ka:li leg; *di:pa* 'light'

ce'mnidi:pa 'kerosine lamp'

cimŋi 'kerosine' *di:pa* 'lamp'

cimŋenŋe 'kerosine (oil)'

cimŋi 'kerosine' *eŋŋe* 'oil'

suntaraga:li typhoon

*suntara** '?' + *ga:li* 'wind'

ba:lacukke 'comet'

*ba:la** 'tail' *cukke* 'star'

tingolubo!pu 'moon light'

tingolu 'moon' *bo!pu* 'light'

mojjigesoppu 'a herb smelling like buttermilk'

mojjige 'buttermilk' *soppu* 'leaf'

nelakadle 'ground nut'

nela 'earth, ground' *kadle* [*kadale*] 'bengal gram'

ja:yikaye 'a medicinal nut'

*ja:yi** ' ? ' + *ka:ye* 'nut, any unripe fruit'.

sa:gakki ‘sago’

*sa:gu** ‘sago’ *akki* ‘rice’

paṭlaka:ye ‘snakegourd’

paṭla ‘? ’ *ka:ye* ‘unripe fruit’

badaneka:ye ‘brinjal’

badane+ka:ye

**gullabade* ‘round shaped brinjal’

hosepu ‘tobacco’

hoge ‘smoke’ *soppu* ‘leaf’

ila:tigende ‘potato’

**ila:ti* [vila:yati] ‘foreign, (England)’

gende ‘bulb’

**ila:tikuḍu* ‘beans’

ila:ti + *kudu* ‘horsegram’

ni:ruḷi ‘onion’

ni:r ‘water’ + *-uḷi* ‘onion?’

beḷḷiḷiḷi ‘garlic’

beḷ ‘white’ + *uḷi*

ka:dandi ‘wild-pig’

ka:di ‘forest’ + *handi* ‘pig’

ni:rummuṇi ‘mosquito’

ni:r ‘water’ + *ummuni* ‘small fly’

na:garaha:vū ‘serpant’

na:gara ‘? ’ + *ha:vū* ‘snake’

a:mbaragəypu ‘liquid curry’

a:mbara ‘liquid’ + *gəypu* ‘curry’

avulekki ‘beaten rice’

avulu + *akki* ‘rice’

- modmaṇa* ‘bridegroom’
moduve ‘marriage’ + *maṇṇa* ‘son’
- modoḷige* ‘bride’
moduve ‘marriage’ + *aḷige** ‘girl’
- talema:ri* ‘generation’
tale ‘head’ + *ma:ri** ‘change’
- edeguddu* ‘heart burn’
ede ‘chest’ + *guddu* ‘punch’
- tu:mbukey* ‘trunk of an elephant’
tu:mbu ‘slice’ + *key* ‘hand’
- monkay* ‘elbow’
moḷa ‘length of a fore arm’ + *key* ‘hand’
- kiṅkiṇikeḍi* ‘armpit’
kiṅkiṇike ‘arm?’ + *aḍi* ‘beneath’
- bennelu* ‘back bone’
benni ‘back’ + *elu* ‘bone’
- moṇka:l* ‘knee’
moḷa + *ka:li* ‘leg’
- ediruttarā* ‘reply, opposition’
ediri ‘in front of’ + *uttara* ‘reply’
- mi:nōṭṭe* ‘calves’
mi:nī ‘fish’ + *hoṭṭe* ‘belly’
- kəṇṇi:ri* ‘tears’
kəṇṇi ‘eye’ + *ni:ri* ‘water’
- udenu:lu* ‘waist thread’
ude ‘waist’ + *nu;lu* ‘thread’
- kenṇi kəppu* ‘eyetex’
kenṇi ‘eye’ + *kəppu* ‘black’

so:daraļiya ‘sister’s son’

so:dara ‘same uteroris’ + *aliya* ‘son-in-law’

ponni:ri ‘rose water’

poni (<*pani*) ‘drop, dew’ + *ni:ri* ‘water’

ga:lipaṭa ‘kite’

ga:li ‘wind’ + *paṭa** ‘sheet’

ba:yeni:ri ‘saliva’

ba:ye ‘mouth’ + *ni:ri* ‘water’

ajjapa ‘grand father’

ajja ‘old man’ + *appa* ‘father’

uggava ‘grand mother’

uggu- (<*hugge*) ‘boiled rice’ + *avva* ‘mother’

ba:leñni ‘plantain fruit’

ba:le ‘plantain’ + *hañni* ‘fruit’

N + *N/V*

a:yakeṭṭi ‘good; appropriate’

a:ya ‘proportionate measurement for certain type
of buildings’ + *keṭṭi* ‘building’

marakodpa ‘wood pecker’

mara ‘tree’, + *kodpa* ‘one who pecks’

tl̥ige:di ‘dull, useless person’

ti:li ‘know’ + *ke:di* ‘one who has spoiled’

ođana:di ‘companion’

ođanc ‘with’ + *a:di* ‘player’

ramba:ta ‘clamour’, ‘confusion’

*ramba** ‘confusion’ + *a:ta* ‘making, playing’

anekəṭṭi ‘dam’

*ane** + *keṭṭi* ‘building’

Ng + *N* (*Ng* = noun-genitive)

bi:gadakayi 'key'

bi:gada 'of the lock' + *kayi* 'hand'

kiccininapaṭige- 'match box'

kiccina 'of fire' + *peṭige* 'box'

Ng+N

kiccinana:like 'flame'

kiccina 'of fire' + *na:like* 'tongue'

ma:yanamara 'mango tree'

ma:yana 'of mango' + *mara* 'tree'

ma:yana ka:ye 'mango'

ma:yana 'of mango' + *ka:ye* 'unripe fruit'

ji:rdəki 'bishops weed'

ji:r-da '?' + *akki* 'rice'

N+VI.N

huļume:ydu 'exema'

huļu 'worm' + *me:yudu* 'grazing'

taletirgudu 'head-reeling, giddiness'

tale 'head' + *tirgudu* 'reeling'

VlN+VI.N.

urcudu kəkkudu 'cholera'

urcudu 'purgings' + *kəkkudu* 'vomiting'

N.Abl.+VI.N.

hoṭṭendaho:du 'dysentery'

hoṭṭenda 'from belly' + *ho:du* 'going'

meyinda ho:du 'bleeding from uterus'

meyi-nda 'from body' + *ho:du* 'going'

N + N + N

monka:lì cippi ‘knee plate; (‘bone’)

mola ‘(knee joint)’ + *ka:lì* ‘leg’ + *cippi*
‘shell’

(AN) + N

bisini:rkoṭege

bisi-ni:rì ‘hot water’ + *kōtege* ‘shed’

mukka:li:mane ‘tripod’, ‘stool’

mukka:lì ‘three leg’ + *mane* ‘seat’

Nu + Nu.

onbətti ‘nine’

ondu ‘one’ + *patti* ‘ten’

hannondu ‘eleven’

hattu ‘ten’ + *ondu* ‘one’

A + N

hebba:gili ‘big door’

*her** ‘big’ + *ba:gili* ‘door’

paravu:ru ‘new/strange place’

para + ‘the other’ + *u:ru* ‘place’

biruga:li ‘typhoon’

*biru** + ‘swift’ + *ga:li* ‘wind’

biligili ‘hey’

*bilgi** ‘white (dry)’ + *hullu* ‘grass’

kəriji:rige ‘black bishops weed’

keri ‘black’ + *ji:rige* ‘bishops weed’

ka:lij:i:rige

belulu:i ‘garlic’

bel ‘white’ + *ulli* ‘onion’

kenana:yē ‘hyna’

*kena** + *na:yē* ‘dog’

mutteyde ‘a woman who is having her mangalya’

mutta ‘that one has grown up’ + *eyde* ‘woman’

ołasañci ‘conspiracy’

oła ‘inside’ + *sañci** ‘plot’

ełenege ‘smile’

ele ‘young’ + *nege* ‘laughter’

me:lvica:rñe ‘supervise’

me:le ‘above’ + *vicarñe* ‘enquiry’

hebbateberli ‘thumb, toe’

*hebbate*** ‘? ’ + *berli* ‘finger’

ańga:li ‘sole of the foot’

adi ‘under’

*agam** ‘inside’ + *ka:li* ‘leg’

malayye ‘step mother’

*mala** ‘other’ + *ayye* ‘mother’

cikapa ‘uncle’

cikka ‘small’ + *appa* ‘father’

sańapa ‘young’ ‘uncle’

sańna ‘younger’ + *appa* ‘father’

doddaro:ga ‘small pox’

dodda ‘big’ + *ro:ga* ‘disease’

kira:ni ‘a disease’

kir ‘small’ + *a:ni* ‘nails’

dodapa ‘uncle’

dodda ‘elder’ + *appa* ‘father’

dod-ava ‘aunt’

dodda ‘elder’ + *avva* ‘mother’

sanya ‘aunt’

sanna ‘younger’ + *avva* ‘mother’

malamakka ‘step children’

*mala** ‘other’ + *makka* ‘children’

nəd̪i:rli ‘midnight’

nədu ‘mid’ + *irlī* ‘night’

V + *N*

bi:skətti ‘knife’

bi:si ‘swing’ + *kətti* ‘knife’

**met̪ikətti* ‘a knife attached to a wooden plank’

*met̪ti** ‘to tread upon’ + *kətti* ‘knife’

hermāne ‘slicer’

heri ‘to cut into small pieces’ + *māne* ‘seat, plank’

met̪te:ni ‘ladder’

met̪ti ‘to tread upon’ + *e:ni* ‘ladder’

eypoñji ‘porcupine’

ey ‘throw’ + *poñji* (<*pandi*) ‘pig’

kədiva:na ‘bridles’

*kədi** (<*kadi*) ‘bite’ + *va:na** ‘iron chain’

arakelli ‘grinding stone’

ara ‘grind’ + *kəlli* ‘stone’

isimullu ‘hook axe’

isi ‘put’ + *mullu* ‘thorn’

horiyekki ‘pop corn’

hori ‘fry’ + *akki* ‘rice’

suduga:dī ‘cremation ground’

sudu ‘burn’ *ka:dī* ‘forest’

- kanda:batte* ‘extravagently’
kanda ‘seen’ + *batte* ‘way’
- suliga:li* ‘whirl wind’
suli ‘to turn round’ + *ga:li* ‘wind’
- unḍa:di* ‘lazy, glutton’
unḍi ‘having eaten’ + *a:di** ‘player’

7.2.2. EXOCENTRIC CONSTRUCTION :

Only a few examples are met with for this type of construction. The following are the examples :

- mi:nculli* ‘fishmonger’
mi:n ‘fish’ + *culli** ‘that which pounces or bounces upon’
- bosireṅgisi* ‘pregnant woman’
bosiri ‘belly’ + *heṅgisi* ‘woman’
- kottekanṇa* ‘the one who has big eyes’
kotṭe ‘round, big’ + *kanṇa* ‘he who has eyes’
- hotṭeba:ka* ‘the one who is a glutton’
hotṭe ‘belly’ + *ba:ka** ‘he who is swollen’

In a few examples, the construction has an adjective followed by 3rd person masculine pronoun.

- doddāvā* ‘rich man, big man’
dodda ‘big’ + *āvā* ‘he’
- badāvā* ‘poor man’
bada ‘poor’ + *āvā* ‘he’
‘the one who is poor’
- pa:padāvā* ‘an innocent man, a poor man’
pa:pada ‘of innocence’ + *āvā* ‘he of poverty’
‘one who is innocent, one who is poor’

7.2.3. CO-ORDINATE CONSTRUCTION :

Like Exocentric construction, there are only a few examples for the co-ordinate constructions :

elədike ‘betel nut and leaves’

ele ‘betel leaf’ + *adike* ‘betel nut’

tałamaddołi ‘yakşaga:na’

ta:la ‘cymbal’ + *maddołi* ‘drum’

ayyepa ‘parents’

ayye ‘mother’ + *appa* ‘father’

aṇṇa tamma ‘brothers’

aṇṇa ‘elder brother’ + *tange* ‘younger sister’

makkamori ‘children’

makka ‘children’ + *mori* ‘young ones’

danakəri ‘cattle’

dana ‘cow’ + *kəri* ‘calf’

7.2.4. ECHO-COMPOUNDS :

In these constructions, the last word is void of any lexical meaning:

E.g. *a:sti pa:sti* ‘property’

a:sti ‘property’ + *pa:sti* X

bada hoggəri ‘Poor people’

bada ‘poor’ + *hoggən* X

ediribadiri ‘opposite’

ediri ‘in front of’ + *badiri* X

In the following solitary example, the first word is void of lexical meaning :

E.g. *adılı badılı* X + *badılı* ‘instead’

In many other constructions, the first word is echoed, by replacing the initial syllable of the first word with *gi-*

- Eg. *u:ṭa gi:ṭa* 'means' etc.
ha:li gi:li 'milk' etc.
mara gira 'trees'
kate gite 'story' etc.
gaṇṭe giṇṭe 'bells' etc.
ca:di gi:di 'slander' etc.
jena gina 'people' etc.
ṭoppi gippi 'cap' etc.
dabbi gibbi 'tin' etc.
te:ri gi:ri 'temple car' etc.
da:ri gi:ri 'way, path' etc.
pa:li gi:li 'share' etc.
batta gitta 'paddy' etc.

* Since there are a number of examples of derived nouns commonly shared by GK, SK and also other Dravidian Languages, the derivative items listed above cannot be taken as peculiar to GK only. There is also a possibility of a readily derived noun entering GK. Such instances are obvious, when the underlying form does not occur anywhere else other than the derived item. In some other instances, the phonemic shape of the underlying form does not correspond with that of GK. e.g. *bid* (in *bitṭi*) is *buḍ* in GK, in all other contexts. Therefore, it is certain that this is a borrowed item. Tentatively all such forms which are quite obvious to us as the possible borrowed items are marked with asterisk.

Chapter 8

Verbs

8.1. CAUSATIVE

St +

{s} ~ -s-, ~ -ϕ-

~ -ϕ- occurs after -s ending stems except the stem is 'to put', to keep'.

- | | |
|----------------------------|------------------------------|
| E.g. <i>b̥ers-ϕ-id-ϕ-e</i> | 'caused to chase-I' |
| <i>ors-ϕ-i-ϕ-ti</i> | 'caused to rub-some one' (8) |
| <i>kəls-ϕ-id-ϕ-e</i> | 'caused to send-I, we' |

~ -s- occurs elsewhere.

- | | |
|--------------------------|--------------------------------|
| E.g. <i>is-s-id-ϕ-e</i> | 'caused to put-I, we' |
| <i>ad̥ng-s-id-ϕ-ər-i</i> | 'caused to hide, you' (pl/hon) |
| <i>ał-s-uv-a</i> | 'will cause to cry, you' (sg.) |

8.2. INTENTIONAL

The stems of Intentional verbs, viz. *be:ku* 'wanted', *sa:ku* 'enough' have limited number of occurrence like the positive and negative constructions only. Other verbs have more wider occurrences, since, they can be conjugated regularly. In SK. only *sa:ku* and *be:ku* occur as Intentional verbs, though, they are not separately categorized as such. All other expressions corresponding to those analysed below are not morphological in SK. They are expressed by Infinitive + *bahudu-* 'will become' as, for example, *a:ga bahudu*, 'yes, it will be alright', *koda bahudu* 'it can be given'.

These Intentional verbs in GK, have verb stem plus Intentional markers. The markers correspond to Old Kannada *-kum* (*-gum*) suffixes, which were called Aorist verb suffixes. The Aorist verbs having *-kum* (*-gum*) suffixes are numberless genderless and also personless verbs; which, in SK, except the relic *sa:ku* 'enough', *be:ku* 'wanted', are no more in use. The GK examples given below very well show that the archaic features of the language are still surviving in GK.

St ± Cs +

{*ki*} ~ *-kki*, ~ *-ku* ~ *-ki* ~ *-əki*

~ *-kki* occurs after the stem *a-* 'to become' (< **a:gu*)

E.g. *a-kki* 'yes, alright'

~ *-ku* occurs after the stem *be:-* 'want'

E.g. *be:-ku* 'wanted'

~ *-ki* occurs after the stems ending in *-a:* and *-o:*

E.g. *sa:-ki* 'enough'

ho:-ki 'can go'

~ *əki* occurs elsewhere.

E.g. *kod-əki* 'can give' 'can be given'

kod-s-əki 'can be caused to be given'

bar-əki 'can come'

bari-əki →

bari-y-əki 'can write'

o:dəki 'can read'

8.3. INFINITIVE

St ± Cs +

{*ke*} ~ *-ke*, ~ *-ike*, ~ *-Ø-*, ~ *-ake*

~ *-ϕ* before *be:da*

E.g.	<i>kod-φ bāda</i>	'don't give!,
	<i>ke:l-φ- bāda</i>	'don't listen/hear/ask'

~-ke occurs after the stems ending in long vowels.

E.g.	<i>a:-ke</i>	'to become'
	<i>ho:-ke</i>	'to go'
	<i>ta:-ke</i>	'to bring'
	<i>ba:-ke</i>	'to come'

~-ike occurs after the stems ending in consonants.

E.g.	<i>kod-ike</i>	'to give'
	<i>ha:r-ike</i>	'to jump/fly'
	<i>nu:k-ike</i>	'to push'
	<i>katt-ike</i>	'to tie, bind'
	<i>kod-s-ike</i>	'to cause to give'

~-ake occurs elsewhere.

E.g.	<i>kəli-y-ake</i>	'to learn'
	<i>holi-y-ake</i>	'to stitch'
	<i>kudi-y-ake</i>	'to drink'

The infinitives in SK, are followed by (i) prohibitive
(ii) Imperative and (iii) other Positive or Negative verbs.

- E.g. (1) *koda be:da* 'don't give'
- (2) *kodalu ho:gu* 'go for giving it!'
- (3) *kadalu he:lutte:ne* 'say to give-I'
- (4) *kodala:re* 'won't give-I'
- (5) *kodalikke illa* 'not possible to give-'
- (6) *kodal illa* 'did not give'

In GK, the different types like those in (2), (3), (4) and (5) are not found and a single type is used for them, where it can be followed by any verb. In the type (1) above GK

has a zero marker for the infinitive and in the type (6), only a finite verb in 3rd person singular is used.

- E.g. (1) *kod-baḍa* ‘don’t give’
 (2) *kodike ho:gu* ‘go for giving it’
 (3) *kodike he:lne* ‘say to give-I’
 (4) *kodike ille* → *kodikile* ‘won’t give’
 (5) *kodike ille* → *kodikile* ‘won’t give’
 (6) *koṭṭati ille* → *kottiṭile* ‘did not give’

Caldwell (Comparative Grammar of Dravidian Languages 1956, Madras, Page 533) thinks that the infinitive was originally a verbal noun and also gives a Kannada example *ma:dalke* ‘to do’ as verbal noun. (verbal noun also is used in Canarese as infinitive). The infinitives can be substituted by as verbal nouns. But these infinitives in Kannada, do not take any other case suffixes. The verbal nouns, can be declined to any cases. The example cited by Caldwell, viz. *ma:dalke-* is not a verbal noun as he thinks, since, the suffixes *-alke*, as a whole is only a conditioned allomorph of the morpheme-infinitive, (Cf: K.K.G. Grammar of Kannada, Ph. D. thesis, Annamalai University, 1969; pp. 264-265). Of course the Infinitive, on comparison with the other Dr. languages, can be called verbal nouns, perhaps in the reconstructed stage, so far as Kannada is concerned. In Tamil, the Infinitives can be equated with verbal nouns, (*seyal ve:n̄tum*) since they can be added with case markers, e.g., *seyal*, *seyalai*, *seyala:l* etc. (*seyal* ‘work’)

The situation noted above for Infinitives in Kannada is applicable to GK also. However, it must be noted that the range of infinitive markers in GK is limited and also, there is one example of the Infinitive verb, which can be declined to cases also. E.g. *kudiyake* ‘to drink or thirst’,

kudiyakege 'to thirst' (dat.), *kudiyakena* 'thirst (Acc., Gen.)' *kudiyakenda* 'by thirst'. Since this is only one available example, it is not possible to state whether it represents the older stage of the language or later innovation.

TENSES

8.4. As SK, GK also has three tenses, viz. Past, Present, and Future. But in certain features of tense formation, there are differences between GK and SK. The following are the distinctive features of SK and GK tense formation.

(1) In common usage in SK, the distinction between Present and Future is not well defined. That is, the Present tense verb can replace the Future tense verb, by supplying appropriate lexical items in a sentence.

E.g. *na:le barutte:ne* (lit.) 'I come tomorrow', instead of more grammatical *-na:le baruvenu* 'I will come tomorrow'. Here, the word *na:le* denoting 'tomorrow', specifies the time in which the action is supposed to take place, though, the verb construction has only the present tense marker in it. The future verb, however, is used for literary purposes and in colloquial speech, it is felt artificial.

Similar usage of Present tense verb is possible in GK too. But, in that case it signifies definite Future and the proper Future tense verb is used in the sense of indefinite Future. The use of Future verb in speech is not at all artificial in GK.

(2) The positional differences in the finite verb constructions:

In SK the Past, Present and Future tense markers can occur immediately after causal or non-causal stems. In GK only the Past and Future tense markers can occur in that position and the Present tense marker always occurs after the Past stem.

(3) GK and SK Present tense markers do not correspond phonetically.

The principal shape of the tense markers in SK is a consonant. In GK, the Present tense markers is in the shape of a vowel.

(4) The GK Present tense construction resembles that of Old Kannada.

In Old Kannada, the Present tense construction involve two verbal roots and two tense markers. The whole verb could be segmented, into two parts, the first one being a Past stem and the second a Future form of *a:gu* 'to become', e.g. *bandappen-bandapen*. This can be analysed as root *bar-* 'to come', + *Past tense marker* + root *a:gu* + *Futute tense marker* *-p-* and Pronominal terminations. Even in Modern literary dialect, this type of construction occurs quite frequently. The Present suffix *-utt-* of SK, was formerly used in continuous form only and from the 16th Century AD onwards, it gained currency in its use in the Present Finite Verb also. In GK, the Present tense marker can be analysed as the resultant form of the verb root and Future tense marker, in other words, it is a Portmanteau morpheme. However, that type of reconstruction has not been attempted in the main body of the work here and the analysis presented below is purely a descriptive one in nature.

8.4.1. PAST TENSE

St ± *Cs* +

{id}	∞ -t-, ~-!- ~-k- ~-d- ~-d- ~-id-
	~ -∅-

∞ -t- occurs between the stems of Class I and vowels.

- E.g. *mosi-t-∅-e* → *mos-t-∅-e* ‘sharpened I/we’ (1)
hor-t-∅-e → *hot-t-∅-e* ‘carried I/we’ (2)
so:l-t-∅-a → *so:-t-∅-a* ‘defeated yourself’ (3)
kəli-t-∅-a → *kəl-t-∅-a* ‘learnt-you’ (sg.) (1)
say-t-ɔ-∅ → *sat-t-ɔ-∅* ‘died-he/they’ (2)
kil-t-ɔ-∅ → *kit-t-ɔ-∅* ‘uprooted-he/they’ (2)
si:n-t-∅-a ‘sneezed, you’ (sg.)

~ -t- occurs after -d ending stems (which are preceded by a short vowel) and before vowels.

- E.g. *kod-ł-a-n-e* → *kot-ł-a-n-e* ‘give, I’ (4)
bud-ł-∅-e → *but-ł-∅-e* ‘left-I’ (4)
horł-ł-ɔ-∅ *hor-ł-ɔ-∅* ‘started, he/they’ (5)

~ -k- occurs after g ending stems (preceded by a short vowel) and before vowels.

- E.g. *hug-k-ą-n-e* → *huk-k-ą-n-e* ‘enter-I’ (6)
hug-k-∅-a → *huk-k-∅-a* ‘entered-you’ (sg.)

$\sim-d-$ occurs after $-n$ ending stems and before vowels.

- E.g. *kan-d-a-n-e* 'see, I'
un-d-∅-e 'ate (a meal) I'

$\sim-d-$ occurs after (i) the stems ending in $-n$, and
(ii) stems ending in $-Ci$ and before vowels.

- E.g. *tin-d-ɔ-∅* 'ate, he/they'
kon-d-∅-a 'killed-you' (sg.)
tan-d-a-n-e/tan-∅-∅-n-e 'bring,-I'
ałi-d-∅-a → *ał-d-∅-a* 'measured, you' (sg.) (1)
bari-d-∅-a → *bar-d-∅-a* 'wrote-you' (sg.) (1)
kədi-d-∅-a → *kəd-d-∅-a* 'cut, you' (sg.) (1)

$\sim-id-$ occurs after (1) single consonant ending stems preceded by long vowels (2) stems ending in consonant clusters (including geminated consonants) (3) any $-s$ ending stems and before vowels.

- E.g. *a:d-id-∅-e* → *a:d-d-∅-e* 'played, I/we' (1)
kət̪t-id-∅-e 'tied, I/we'
nark-id-ɔ-∅ 'groaned he/they'
is-id-ər-i 'put, you' (hon/sg.)

$\sim-∅-$ occurs elsewhere.

- E.g. *a:d-∅-ti-∅* 'prayed-some one'
ti:n-∅-ti-∅ 'ate some one'

- bari*-Ø-*ti*-Ø → *bar*-Ø-*ti*-Ø ‘wrote-some one’
ban-Ø-Ø-*n*-*e* ‘come-I’
a;g-i-Ø# ‘having become’
ho:g-i-Ø# ‘having gone’
ha:r-i-Ø# ‘having jumped/flown’
nu:k-i-Ø# ‘having pushed’
a:-Ø-ti-Ø ‘became-someone’
a:-Ø-Ø-n-e ‘become, I’
ho:-Ø-tu-Ø ‘went, some one’
ho:-Ø-Ø-n-e ‘go-I’

8.4.2. FUTURE TENSE

St ± *Cs* +

{v} ~-b-, ~-v-, ~-uv-, ~-u-, ~-Ø-

~-b- occurs after nasal ending stems and before vowels.

- E.g. *tin*-*b*-ɔ-Ø- → *tim*-*b*-ɔ-Ø ‘will eat, he/they’
ka:n-*b*-Ø-*a* → *ka:m*-*b*-Ø-*a* ‘will see, you (sg.)’

~-v- occurs after vowel ending stems and before vowels.

- E.g. *a;l*i-v-Ø-*e* ‘will measure, I/we’
*kəd*i-v-Ø-*a* ‘will cut-you (sg.)’
a:-v-Ø-*a* ‘will become-you (sg.)’

~-uv- occurs after stems ending in consonants other than nasals and before vowels.

- E.g. *kod*-uv-Ø-*e* ‘will give, I/we’
is-uv-Ø-*e* ‘will keep-I/we’
ir-uv-Ø-*a* ‘will be, you (sg.)’
ke:l-uv-ɔ-Ø ‘will ask/listen, he/they’
ka:y-uv-Ø-*e* ‘will wait-I/we’

$\sim-u$ occurs after stems ending in consonants other than the nasals and neuter marker $-du$. It is in free variation with \emptyset .

- E.g. *kod-u-∅-du* ‘will give, some one’
ke:l-u-∅-du ‘will listen/hear, some one’
ha:r-u-∅-du/ha:r-∅-∅-du ‘will fly-someone’

$\sim-\emptyset$ - occurs elsewhere.

- E.g. *kədi-∅-∅-du* ‘will cut-some one’
a:-∅-∅-du ‘will become-some one’

8.5. NEGATIVE VERBS

The Negative markers occur before Participle markers and also before 3rd person pronominal terminations. The latter is the only Negative verb construction and it always signifies the Future tense. The Negation of action in 1st and 2nd persons and also in Past and Present tenses is indicated by some syntactic devices which are shown below:

(1) 1st and 2nd persons:

The pronoun is expressed as subject of the sentence and the verb does not have any marker for the persons or numbers. A verbal noun, either derived by verbal root + *ike* of Future finite verb in 3rd person, is followed by a negative word *ille*. The construction with the noun derivative suffix *-ike*, signifies the negation of action in Future tense and that the latter one indicates the same in Present tense. Both these are common for 1st, 2nd and also 3rd persons. However, in the third person there is a morphological construction also which will be analysed below.

(2) Past indication in Negative construction:

This constitutes a Past tense finite verb with 3rd person singular pronominal termination and the Negative word *ille*. Eg. *kottəti ille* 'give some one/it-not'. The construction is common for all persons and numbers and the distinction of the person and the numbers is made by providing appropriate pronouns as the subject of the sentence.

(3) *ille, alla*

These are met with only in Negatives, whereas, the analysis of the negative participle constructions show that the roots, viz., *il-* and *al-* are similar to any other verbal roots. As such, the statement made by Caldwell, that they are Negatives by themselves, will not be correct. The Negation takes place only through the Negative markers that occur in the constructions and these constructions also have the Negative markers. However it should be noted that these roots do not occur before tense markers though, there have been attempts to state that they have alternant forms occurring before the tense markers, signifying the positive meaning.

(4) Negative verbs in SK- a comparison.

- (1) There are morphological constructions for Negative verbs in all persons and numbers, but in actual usage they are seldom used.
- (2) The Negative finite verbs always signify the Future meaning (1) and (2) are not met with in GK.
- (3) There is no Negative construction signifying the Present tense. GK, as shown above has this device too.

- (4) The Past tense indication is done through the Infinitive + *illa* in SK. GK, as shown above, makes use of a Past tense verb itself before the Negative word *ille*.
- (5) The verbal noun derived from the Future finite verb with Neutral singular suffix is used before *illa* to indicate Future tense. The construction is similar to that of GK, but in GK, the construction signifies the Negation of action in Present tense.

8.5.1. NEGATIVE

St ± Cs +

{*ad*} ~ -*ad-*, ~ -*a-*

~ -*ad-* occurs after all verbal stems and before Adverbial and Adjectival Participle markers.

- E.g. *ill-ad-e* 'not being present'
all-ad-e 'not being that...'
be:d-ad-e 'not being wanted'
al-ad-e 'not crying'
tar-s-ad-e 'not causing to bring'
hari-ad e→
bari-y-ad-e 'not writing'
ill-a-d-a 'that which is not present'
all-ad-a 'that which is not the one'
be:d-ad-a 'that which is not wanted'
al-ad-a 'that which is not crying'
tar-s-ad-a 'that which is not caused to bring'
bari-ad-a→
bari-y-ad-a 'that which is not written'
- a-* occurs elsewhere (except after *ill-* *all-* and *be:d*).

- E.g. *kod-a-di-*∅ ‘will not give, some one’
ho:g-a-di-∅ ‘will not go, some one’
tin-a-di-∅ ‘will not eat-someone’
o:d-a-di-∅ ‘will not read-someone’
bari-a-di-∅ →
bari-y-a-di-∅ ‘will not write-someone’

8.6. OBLIGATIVE

St ± Cs +

{*oku*} ~ -*oku*, ~ -*ku*

~ -*oku* occurs after consonant ending stems and after -y-, after *i* ending stems.

- E.g. *a:g-s-oku* ‘must cause to become’
kod-oku ‘must give’
bari-y-oku ‘must write’
 ~ -*ku* occurs elsewhere.

- E.g. *a:-ku* ‘must become’
ho:-ku ‘must go’

In SK the obligative is not a morphological construction, since, it is expressed by a separate word, viz., *be:ku*, which occurs after the infinitive, e.g. *koda be:ku* ‘must give’. The GK obligative construction resembles that of Havyaka Kannada where the verb root and the word *be:ku* ‘wanted’, are compounded and in that process, the initial consonant of the word *be:ku* is lost. In Tulu also, the loss of initial consonant of the second word is a common feature, when compared with GK and Havyaka Kannada. In Havyaka the marker is -*e:ku* [*be:ku*] e.g. *kod-e:ku* ‘must give’ and in Tulu -*odu* [*<bo:du*] e.g. *korodu* ‘must give’. In GK, as seen above, it is -*oku* [*be:ku*]. The change of the vowel

e: to *o* is not explainable in GK—though it may be guessed that it is due to bilabial stop preceding it in the free form.

8.7. HORTATIVE

St ± Cs +

{*ɔn*} ~ -*əli*, ~ -*ɔn-*

~ -*əli* occurs after all verbal stems (except *il-al-be:d-*) and before 3rd person marker Ø.

E.g. *her-əli-Ø* ‘let give birth-some one’

hor-əli-Ø ‘let carry-some one’

bar-s-s-əli-Ø ‘let cause to come-some one’

kəkk-əli-Ø ‘let vomit-some one’

bar-əli-Ø →

bar-li-Ø ‘let come-some one’

ir-əli-Ø →

ir-li-Ø ‘let be-some one’

-*ɔn-* occurs after all verbal stems (except *il-al-* and *be:d-*) and before plural marker of First person. (The First person marker is Ø).

E.g. *ba:-ɔn-ɔ-Ø* →

ba:-v-ɔn-ɔ-Ø ‘let come-we’

ho:-ɔ-n-ɔ-Ø →

ho:-v-ɔn-ɔ-Ø ‘let go-we’

tin-b-ɔn-Ø →

tim-m-ɔn-ɔ-Ø ‘let eat-we’

When we compare Old Kannada, it appears that the Hortative markers occurring in SK, viz. -*əli* for 3rd person, and -*ɔ:nə* for the First person plural, are of recent origin, since, in Old Kannada -*ke* or -*ge* were used for 3rd person, and Future finite verb with 1st pn. pl. suffix was used for

1st person Hortative verbs. GK, however, shares this innovation with SK. The analysis of *-ali* of SK or *əli* of GK, is not easy, if we take only these dialects into consideration. As far as SK is concerned, it is possible to analyse *-al* as the Infinitive marker and *-i*, on comparison with Telugu, can be related to the verb root *i*:- 'to give', 'to permit' or 'to allow', since in Telugu, *po:n-i* (sg) and *po:nivv-aṇḍi* (hon) 'let go', are the hortative forms used while addressing 2nd person non-hon, and hon. In GK, *-al* does not occur as Infinitive marker and therefore, the whole segment viz. *əli*, is to be described as Hortative marker. In the case of First person in SK and GK as well, there is no clue of any sort to analyse the same into smaller segments. The Tulu form of Hortative, *-aḍi*, *baraḍi* 'let come-some one' *po:vadi* 'let go-some one' and that of Tamil, *aṭṭum*, as in *po:gatṭum* 'let go-some one' are not analysable at present. However, in Tamil also, the Hortative construction is of a recent origin.*

8.8. IMPERATIVE

There are two types of Imperatives (1) Non-polite Imperative and (2) Polite Imperative.

The Non-polite Imperatives are those where the roots themselves are used without adding further markers. They are always in second person singular. e.g. *koḍu* 'give' (you sg.) *ho:gu* 'go' (you sg.). The Polite Imperatives are those, where the second person plural or honorific markers occur immediately after the verb stems. It is Polite imperative when a single person is addressed and the same can be

* I received this information from Mr. N. Kumaraswami Raja in a private conversation.

addressed to more than one persons, where it is to be taken as non-polite, or simply Imperative with plural marker.

The roots *tar-* ‘to bring’, *bar* ‘to come’ have different stem forms. e.g. *ba:r* → *ba:* ‘come!’, *tar* → *tamba* ‘bring!’ where *ta+m* (<*kon*) reflexive verb + *ba* (<*ba:*), lit. ‘having brought, come, you (sg.)’ are the segments.

The Prohibitive, i.e. Negative Imperative does not have any marker and the same is expressed by the construction having a verb stem + *be:da* e.g. *ma:d* + *be:da* → *ma:dbada* ‘do not do’ (you sg.) *kod* + *be:da* → *kodbada* ‘don’t give’ (you sg.).

8.9. PRESENT TENSE

St ± *Cs* + *Past* +

{*a*} ∞ Ø ~-i- ~-a-

∞ Ø occurs after the stems (1) between the past tense marker *i* and the number markers; (2) after the four stems *a:gu*, *ho:gu*, *tar* and *bar*, between the Past tense marker Ø and the number marker *-n-*, where it is also in free variation with *-a-*, and (3) between the Past tense marker *-d-* and number marker *-d-*, after the two stems *a:gu* and *ho:gu*.

E.g. *orig-i-Ø-n-e* ‘become bent-I’

ha:r-i-Ø-y-a ‘jump-you (sg.)’

o:d-i-Ø-ve → *o:d-u-Ø-ve* ‘run-we/they’

ha:r-i-Ø-d-e → *ha:r-Ø-Ø-d-e* ‘jump-some one’

hari-s-i-Ø-n-e → *har-s-i-Ø-n-e* ‘cause to tear-I’

a:-Ø-Ø-n-e/a:-d-a-n-e ‘become-I’

ho:-Ø-Ø-n-e/ho:-d-a-n-e ‘go-I’

tan-Ø-Ø-n-e/tan-d-a-n-e ‘bring.I’

ban-Ø-Ø-n-e/ban-d-a-n-e ‘come-I’

a:-d-Ø-d-e ‘becomes, some one/it’

ho:-d-Ø-d-e ‘goes-some one/it’

i occurs after the stems between the Past tense marker and *-y-* the singular number followed by second pn. *-a*.

E.g. *a!-t-i-y-a→at-t-i-y-a* ‘cry-you (sg.)’

a!i-d-i-y-a→a!-d-i-y-a ‘measure-you (sg.)’

a:d-i-y-a ‘become you’

-a occurs elsewhere.

E.g. *a!-t-a-n-e → at-t-a-n-e* ‘cry-I’

a!-t-a-ve → at-t-a-ve ‘cry/we/they’

kod-t-a-d-e → kot-a-d-e ‘gives-someone/it’

tin-d-a-d-e ‘eats some one/it’

8.10. PARTICIPLE

$$St \neq Cs + \left\{ \begin{array}{l} \text{Tense} \\ \text{Neg} \end{array} \right\} +$$

8.10.1. ADVERBIAL PARTICIPLE

This occurs only after the negative markers and also after the Past tense markers. It is marked by *Ø* after the Past tense marker. After the Past tense marker of a consonantal form, a releasing vowel *i* occurs and this is not of morphological significance. This is only a morphophonemic phenomenon, since no plosive can occur unreleased before an open juncture. However in Negative verbs, the Adverbial participle is distinctly marked by a morpheme in a vowel form viz., *-e*. The adverbial participles are always followed by another verb construction in a sentence.

$\{e\} \infty -\emptyset - \infty -e$

$\infty -\emptyset$ occurs after verb stems between Past tense markers and open juncture.

- E.g. $a:g-i-\emptyset-\#$ ‘having become’
 $ke:l-i-\emptyset-\#$ ‘having listened/asked’
 $kət̪-i-\emptyset-\#$ ‘having tied’
 $al-t-\emptyset-i-\# \rightarrow$
 $at-t-\emptyset-i-\#$ ‘having cried’
 $kod-t-\emptyset-t-\# \rightarrow$
 $kot̪-t-\emptyset-i-\#$ ‘having given’

$\infty -e$ occurs after verbal stems between Negative markers and open juncture.

- E.g. $al-ad-e-\#$ ‘having not cried’
 $al-s-ad-e-\#$ ‘having not caused to cry’
 $kod-a-d-e-\#$ ‘having not given’
 $kod-s-ad-e-\#$ ‘having not caused to give’
 $o:d-ad-e-\#$ ‘having not run’
 $ha:r-ad-e-\#$ ‘having not jumped’

8.10.2. ADJECTIVAL PARTICIPLE

The Adjectival participle marker occurs after all verbal stems between (i) Past, (ii) Future and (iii) Negative markers and open juncture. The Adjectival Participle constructions are followed by a nominal construction e.g. a noun in a sentence.

$\{a\} \sim -a$

- E.g. $a:-d-a\#$ ‘that which became’
 $ho:-d-a\#$ ‘that which has gone’
 $ban-d-a\#$ ‘that which has come’
 $a:g-s-id-a$ ‘that which causes to become’

- a:-v-a#* ‘that which will become’
ho:-v-a# ‘that which will go’
a:g-ad-a# ‘that which will not become’
ho:g-ad-a# ‘that which will not go’

8.11. NUMBER MARKERS

$$St \pm Cs + \left\{ \begin{array}{l} Past \\ Fut. \end{array} \right\} \pm Present +$$

8.11.1. SINGULAR

Singular number is overtly marked only between the Present tense and Person Markers.

{n} ∞ -n- ∞ -y- ∞ -d-

∞ -n- occurs between Present tense and First Person marker.

- E.g. *a!-t-a-n-e* → *at-t-a-n-e* ‘cry-I’
a!i-id-a-n-e → *a!-d-a-n-e* ‘measure-I’
ma:d-s-i-∅-n-e ‘cause to do-I’
ir-d-a-n-e → *id-d-a-n-e* ‘remain-I’

∞ -y- occurs between Present tense and 2nd person markers.

- E.g. *orng-i-∅-y-a* ‘become bent, you sg.’
ho:-d-i-y-a ‘go-you sg.’
ma:d-i-y-a ‘do, you sg.’

∞ -d- occurs elsewhere.

- E.g. *orng-i-∅-d-e* ‘bends, some one/it’
ma:d-i-∅-d-e → *ma:d-∅-∅-d-e* ‘does,
 some one/it’

8.11.2. PLURAL

{re} ∞-ɔ-, ∞-ve-, ∞-re-, ∞-ər-

∞-ɔ- occurs after (i) Past (ii) Future and (iii) Horta-tive markers and before (i) First and (ii) second person markers, which are unmarked.

- E.g. *orṅg-id-ɔ-∅* ‘bent, they’
orṅg-uv-ɔ-∅ ‘will bend, they’
ał-s-id-ɔ-∅ ‘caused to cry’
ał-s-uv-ɔ-∅ ‘will cause to cry-they’
ał-t-ɔ-∅ → *at-t-ɔ-∅* ‘cried-they’
kod-on-ɔ-∅ ‘let give-we’

∞-ve occurs after Present tense markers and before 1st and 3rd person markers which are unmarked.

- E.g. *kədi-d-a-ve-∅* → *kəd-d-a-ve-∅* ‘cut-they’
orṅg-i-∅-ve-∅ → *orṅg-u-∅-ve-∅* ‘bend-they/we’

∞-re occurs after present tense marker and before 2nd person marker which is unmarked.

- E.g. *bari-id-a-re-∅* → *bar-d-a-re-∅* ‘write you’
kod-t-a-re-∅ → *koł-t-a-re* ‘give-you (pl./hon.)’
ma:d-i-∅-re-∅ ‘do-you (pl./hon.)’

∞-ər occurs after Past and Future tense marker, and before 2nd person marker.

- E.g. *ban-d-ər-i* ‘came-you (pl./hon.)’
ta:-v-ər-i ‘will bring-you (pl. hon.)’
kod-uv-ər-i ‘will give-you (pl./hon.)’
kod-t-ər-i → *koł-t-ər-i* ‘gave-you (pl./hon.)’
kod-s-uv-ər-i ‘will cause you (pl./hon.)’

$\infty -\emptyset$ occurs elsewhere.

- E.g. *kod-t-∅-e* 'gave, we'
tin-d-∅-e 'ate-we'
un-d-∅-e 'ate (a meal) we'
ban-∅-i → *ban-n-∅-i* 'come you (pl./hon.)'
kod-∅-i 'give you (pl/hon)

8.12. PERSON

$$St \doteq Cs + \left\{ \begin{array}{l} Past \\ Fut. \end{array} \right\} \doteq Present + NM +$$

8.12.1. FIRST PERSON

{e} ~ -e-, ~ -∅

~ -e occurs after sg. and pl. markers which are unmarked.

- E.g. *al-t-∅-e* → *at-t-∅-e* 'cried, I/we'
kod-t-∅-e → *kot-t-∅-e* 'gave, I/we'
kod-uv-∅-e 'will give I/we'

~ -∅ occurs elsewhere.

- E.g. *kod-t-a-ve-∅* → *kot-t-a-ve-∅* 'give, 1/we'
kod-on-o-∅ 'let give-we'
kədi-s-i-∅-ve-∅ → *kəd-s-u-∅-ve-∅* 'will cause to cut, I/we'

8.12.2. SECOND PERSON

{a} ~ -a, ~ -i, ~ -ni, ~ -∅

~ -a occurs after singular number markers, ∅ and y.

- E.g. *i|i-id-∅-a* → *i|i-d-∅-a* 'alighted, you'
i|i-s-id-∅-a → *i|i-s-id-∅-a* 'caused to alight, you'
i|i-id-i-y-a → *i|i-d-i-y-a* 'alight-you'
i|i-s-i-y-a → *i|i-s-i-y-a* 'cause to alight you'

~ -i occurs (i) after the plural marker -ər- and (ii) in the consonant ending stems after the plural marker \emptyset .

- E.g. *ał-t-ər-∅-i* → *at-t-ər-i* 'cried, you'
ał-s-id-ər-i 'caused to cry, you'
kod-uv-ər-i 'will give you'
ban-∅-i → *bann-∅-i* 'came you'
kod-∅-i 'give you'
kod-s-∅-i 'cause to give-you'
bar-s-∅-i 'cause to come, you'

~ -ni occurs in i ending stems after the plural marker \emptyset .

- E.g. *ałi-∅-ni* 'measure, you'
tađi-∅-ni 'stop, you'
bigi-∅-ni 'tighten, you'

~ -∅ occurs elsewhere.

- E.g. *bari-id-a-re-∅* → *bar-d-a-re-∅* 'write you'
kod-ł-a-re-∅ → *kot-ł-a-re-∅* 'give, you'
ma:d-i-∅-re-∅ 'do, you'

8.12.3 THIRD PERSON

{du} ~ -du, ~ -odu, ~ -ti, ~ -əti, ~ -e, ~ -∅
~ -du occurs after the singular number marker \emptyset , following the Future tense marker *u* or \emptyset .

- E.g. *a:-∅-∅-du* 'will become some one, it'
ho:-∅-∅-du 'will go, some one, it'
kod-u-∅-du 'will give some one, it'
hari-∅-∅-du 'will tear, some one, it'
nekk-u-∅-du 'will lick, some one, it'
kod-s-u-∅-du 'will cause to give, some one, it'

~ *-odu* occurs after the singular number marker \emptyset following the Future tense marker *-b-*.

E.g. *un-b-∅-odu* → *um-b-∅-odu* ‘will eat some one/it’

tin-b-∅-odu → *tim-b-∅-odu* ‘will eat some one/it’

~ *-ti* occurs after the singular marker \emptyset occurring after Past tense marker *i* or \emptyset .

E.g. *ubb-i-∅-ti* ‘swollen, some one/it’

ubb-s-i-∅-ti → *ubb-s-i-∅-ti* ‘caused to swell some one, it’

a:-∅-∅-ii ‘became, some one it’

~ *-ati* occurs after the singular marker \emptyset following a Past tense marker which is *t*, *t̄*, *k*, *d* or *d̄*.

E.g. *al-t-∅-ati* → *at-t-∅-ati* ‘cried, some one/it’

kod-t̄-∅-ati → *kot-t̄-∅-ati* ‘gave, some one, it’

ed-d-∅-ati ‘woke up, some one/it’

~ *-e* occurs after singular marker *d-* following the Present tense marker.

E.g. *al-t-a-d-e* → *at-t-a-d-e* ‘cries, some one, it’

al-s-i-∅-d-e ‘causes to cry, some one/it’

~ *-∅* occurs elsewhere.

E.g. *ban-d-ɔ-∅* ‘came they’

tin-b-ɔ-∅ → *tim-b-ɔ-∅* ‘will eat, they’

a:-d-ɔ-∅ ‘became they’

bar-li-∅ ‘let come, some one/it’

bar-əli-∅ → *tin-əli-∅* ‘let eat, some one/it’

Chapter 9

Clitics

The Free Forms which are neither declined nor conjugated and also the Bound Forms, which are void of conjugational or declensional functions, though, in some morphological constructions, they can co-occur with declensional or conjugational suffixes, are called Clitics. These clitics can be grouped into three categories viz., (i) Post Junctural (ii) Pre-Junctural and (iii) Inter-Junctural clitics. The Demonstratives and Interrogatives are Post Junctural clitics, which form the base for the larger constructions. The Pre-Junctural clitics are those, which occur before word junctures (as suffixes) i.e. in non-declined form in some instances. The Inter-Junctural clitics are those which occur as free forms between two word junctures. This can be neither declined nor conjugated.

9.1. POST JUNCTURAL CLITICS

9.1.1. *Demonstrative Clitics*

These indicate proximity and remoteness of things, or action they refer to and are divided into two classes as, (i) Proximate and (ii) Remote.

9.1.1.1. PROXIMATE

{i:} ~ -i: ~ hi:-, ~ iv- ~ i-

(i) ~ i: occurs before ga, the clitic of time.

E.g. i: 'this'
i:-ga 'now'

(ii) ~ *hi:-* occurs before *-nge*, the clitic of manner.

E.g. *hi:-nge* 'in this manner'

(iii) ~ *iv-* occurs before third person marker *-ā-*.

E.g. ~ *iv-ā-* 'this man' (19)

(iv) ~ *i-* occurs elsewhere.

E.g. *i-li* → *i-lli* 'here' (21)

i-ta → *i-tta* 'this side' (21)

i-n̩ta 'of this kind'

i-s̩t̩i 'this much'

i-∅-di 'this thing (or woman)'

i-ndi 'today'

1.1.2. REMOTE

{*a:*} ~ *a:-* ~ *ha:-* ~ *a-*

(i) ~ *a:-* occurs before *-ga* the clitic of time.

E.g. *a:* 'that'

a:-ga 'then'

(ii) *ha:-* occurs before *-nge*, the clitic of manner.

E.g. *ha:-nge* 'in that manner'

(iii) ~ *av-* before third person marker *-ā-*.

E.g. *av-ā-* (19)

(iv) *a-* occurs elsewhere. (21)

E.g. *a-li* → *a-lli* 'there'

a-ta → *a-tta* 'that side' (21)

a-n̩ta 'of that kind'

a-s̩t̩i 'that much'

a-ndi 'that time, then'

a-∅-di 'that thing/woman'

9.1.1.3. INTERROGATIVE

$\{ya:\}$ ~ $ya:-$ ~ $ya:v-$ ~ $he:-$ ~ $e:-$ ~ $e-/$

(i) ~ $ya:$ occurs before, third person marker \emptyset and ~ $-ga$, the clitic of time.

E.g. $ya:$ 'which'

$ya:-\emptyset-ri$ 'who'

$ya:-\emptyset-di$ 'which thing/woman'

(ii) ~ $ya:v-$ occurs before third person marker ~ $a-$.

E.g. $ya:v-\tilde{a}-$ 'which man'

(19)

(iii) ~ $he:-$ occurs before ~ ng e, the clitic of manner.

E.g. $he:-ng$ e 'what manner'

(iv) ~ $e:-$ occurs before ~ ke , the clitic of purpose.

E.g. $e:-ke$ 'why'

(v) $e-$ occurs elsewhere.

E.g. $e-li \rightarrow e-lli$ 'where'

$e-ta \rightarrow e-tta$ 'where, which side'

$e-nta$ 'what kind of'

$e-s*ti*$ 'how much'

$e-ndi$ 'what time, when'

9.2. PRE-JUNCTURAL CLITICS

9.2.1. LOCATIVE CLITICS $\{li\} \sim -li$

This occurs after the Demonstrative and Interrogatives and also co-occur with Dative, Ablative and Genitive case markers.

E.g. $i-li \rightarrow i-lli$ 'here, in this place'

(21)

$a-li \rightarrow a-lli$ 'there, is that place'

(21)

$i-li-ge \rightarrow i-lli-ge$ 'to this place'

9.2.2. SPACE CLITIC {ta} ~ -ta

This clitic occurs in the same environments as the above but it co-occurs only with the Ablative case marker.

- E.g. *i-ta* → *i-tta* 'this side'
- a-ta* → *a-tta* 'that side'
- e-ta* → *e-tta* 'from what side'
- i-ta-nda* → *i-tta-nda* 'from this side'

9.2.3. TYPE CLITIC {-nta} ~ -nta

This clitic occurs after the demonstrative and Interrogative bases. When it refers to persons, third person pronouns are compounded to the resultant form of the clitic (i.e. Demonstrative + *nta*). When *av-a/a-∅-di/av-∅-∅* are compounded one of the vowels disappear ($V_1+V_2 \rightarrow V_2$) and $V_2 \rightarrow \emptyset$, according to the Morphophonemic rule No. 16.

- E.g. *i-nta* 'this kind'
- a-nta* 'that kind'
- e-nta* 'what kind'
- i-nta-a-∅-di* → *i-nt-ədi* 'this kind of woman or thing'
- a-nta-av-a-n* → *a-nt-əv-a* 'that kind of man'
- i-nta-av-∅-∅u* → *i-nt-əv-∅-∅-u* 'this kind of person'

9.2.4. QUANTITATIVE CLITICS {ṣṭi} ~ -ṣṭi

This clitic occurs with the same bases as in the case of the above and can be declined to all cases. However Masc. and Pl. markers cannot occur with this.

- E.g. *i-ṣṭi* 'this much'
- a-ṣṭi* 'that much'
- e-ṣṭi* 'how much'
- e-ṣṭ-ar-a* 'of how much'

9.2.5. CLITIC OF TIME {ga} ~ -kana, ~ -ndi ~ -ga ~ -gal

(i) ~ - kana occurs after verb stems.

E.g. *a:-kana* 'when it happens'

ho:kana 'when some one goes'

kodi:-kana 'when some one gives'

(ii) ~ -ndi is a clitic denoting time which may mean either day or more than a day when it occurs after the Remote Demonstrative and Interrogative clitics. With the Proximate Demonstrative clitic it always denotes a day. The constructions are declinable to Dative, Ablative and Genitive cases only.

-ga and gal also denote time but the constructions always refer to a time of shorter duration. These are phonetically predictable with the above, since they occur always after the demonstrative allomorphs having long vowels, while the above one occurs only after a short vowel.

E.g. *i:-ndi* 'today'

a:-ndi 'then or that day or days'

e:-ndi 'when' (month/year etc.)

i:-ndi:-nda 'from this day'

(ii) ~ -ga occurs before #, or suffixes beginning with consonant.

E.g. *i:-ga* 'now'

a:-ga 'then'

i:-ga:-nda 'from now'

(iii) ~ -gal- occurs before vowel beginning suffixes.

It has an alternant form -gan, when the Dative case marker follows.

E.g. *i:-gal-e:* → *i:-gəl-e:* 'now only' (16)

i:-gan-i-ge → *i:-gən-i-ge* 'for this moment, time'

9.2.6. CLITIC OF MANNER $\{nige\} \sim -nge$

This occurs after the Demonstrative and Interrogative bases having the phonemic shape $hV:-$. The whole construction is indeclinable.

- E.g. $hi:-nge$ ‘in this manner’
- $ha:-nge$ ‘in that manner’
- $he:-nige$ ‘in what manner’

9.2.7. CLITIC OF PURPOSE $\{ke\} \sim -ke \infty -ni$

This occurs only after the Interrogative bases and the constructions are indeclinable ones.

- E.g. $e:-ke$ ‘why’
- $e:-ni$ ‘what’

The latter has multiple function in different environments in a sentence as follows:

- (i) $e:-ni$ occurs as qualifier, if a noun follows it immediately.

- E.g. $e:-ni suddi$ ‘what news’

- (ii) It is a clitic of purpose when it is followed by a verb which does not have an object in a sentence:

- E.g. $e:-ni banda$ ‘why have you come’

- (iii) $e:-ni$ is a quantifier, when it is followed by verb which can have an object in a sentence:

- E.g. $e:-ni kotta$ ‘what have you given’

9.2.8. EMPHATIC CLITIC $\{e:\} \sim -e:$

This clitic occurs both after the nouns and other constructions of clitics and verbal participles.

E.g. *av-a-n-e:* ‘only he’

a:-gal-e: ‘even at that time’ (16)

kod-t-e: ‘having given only’ (5)

9.2.9. CONJUNCTIVE CLITIC {*u:*} ~ *u:*, ∞ *matte*

There are two types of conjunctive clitics, viz., Free clitic and Bound clitic. Free clitic occurs (i) between two nouns or two constructions of clitics which can be declined and also (ii) between two verbal participles. The bound clitic occurs (i) after nouns, (ii) other constructions of clitics and (iii) also after the verbal participles. Always this bound clitic occurs with a pair of words. When it occurs after the Interrogative pronoun only, the pronoun gives the meaning ‘who-ever’, ‘what-ever’ etc.

E.g. noun-noun:

akkə-n-u: *tange-n-u:* ‘elder & younger sister’

ayye-n-u: *appa-n-u:* ‘mother & father’

Participle-participle:

kod-t-u: *tand-u:* ‘having given & having bought’

Critic-clitic:

ha:-n̥g-u: *hi:-n̥g-u* ‘in that and this manner’

The free clitic *matte* means ‘and’ when it occurs between two similar parts of speech and the same means ‘after’ when two different parts of speech occur before and after it.

E.g. *appa matte avva* ‘father and mother’

koṭṭi matte tandi ‘having given and having brought’

koṭṭi matte tegi ‘take after having given’

tindi matte kudi ‘drink after having eaten’

-*u:* occurs after the Interrogative Pronoun.

ya:v-a-n-u: ‘who-ever’

ya:-Ø-r-u: ‘who-ever’

9.2.10. CLITIC OF INTERROGATION {o:} ~ -ɔ, ~ -o:

~ -ɔ, occurs after (i) nouns (ii) other constructions of clitics and (iii) also after verbs when it occurs after the Interrogative construction of location, viz. *e-lli* 'where', it suggest doubt about the location.

E.g. *ha:ŋg-ɔ* '(is) it in that manner?'

a-lli-y-ɔ '(is) it there?'

a:-gaʃ-ɔ → *a:-gəʃ-ɔ* '(is) it then?'

av-a-n-ɔ '(is) it that man?'

ba:-t-ɔ 'did some one come?'

e-lli-y-ɔ 'somewhere'

~ -o: occurs after the gender number markers when the construction means 'some one or some'-a collective pronoun. The determination of the number of the person referred to is done only by the corresponding verb. That is, if the person referred to is a single individual (inferior) the concording verb will have singular number marker and plural marker if the person referred to is either honorific or more than one individual.

E.g. *ya:v-a-n-o:* 'some one (single individual)'

ya:-∅-r-o: 'some one or some persons, of whom the speaker is not certain'

9.2.11. INTENSIVE CLITIC {a:ri} ~ -a:ri

-a:ri occurs after (i) nouns, (ii) constructions of other clitics and (iii) also verbal participles'

E.g., *av-a-m-a:ri* 'at least he'

a-∅-d-a:ri 'at least she/or it'

he:-ng-a:ri 'in whatever manner'

e:-n-a:ri 'whatever'

kod-t-a:ri 'at least having given'

In comparing *-a:ri* with the corresponding SK form, it can be analysed as having a verb root *a:g-* ‘to become’, the Past tense marker *-d-*, and the condition suffix *-are*. The loss of a consonant/syllable of the word and contracting the word is very common in GK: e.g. *ho:dane* ‘I go’ → *ho:ne*; etc. In SK, the corresponding form *a:daru:* ‘even if it happens’, can occur in the initial position of sentence and so has more freedom of occurrence. However, it is not so in GK for the bound form *-a:ri* and therefore, it is classified among the clitics.

9.2.12 DIMINUTIVE-ADDRESSIVE CLITIC {*ne*} ~ -*ne*

~ -*ne* is used in addressing youngsters, and also one’s wife (a custom now very rare). This is equivalent to SK -*e* for females, and -*o:* for males. The corresponding forms in Tamil is -*di* for female and -*da* for male.

This morpheme occurs (1) after the constructions of other clitics, (except those of (i) Conjunctives, (ii) -*nta*, the Manner clitic (iii) Interrogative and (iv) Intensive clitics) (2) after finite verbs and imperative verbs and (3) after nouns also.

a-lli-ne ‘there (you see) i. e. there, my little one/dear’

i-tt-a-ne ‘this side, my little/dear one’

e-~~s~~ti-ne ‘how much, my little/dear one?’

av-a-ne ‘he, my little/dear one’

ya-∅-ne ‘who, my little/dear one?’

a-ndi-ne ‘that time my little/dear one’

ban-n-e-ne ‘I come, my little/dear one’

kodu-v-e-ne ‘I will give my little/dear one’

ba:-ne ‘come, my little/dear one’

akka-ne ‘It is elder sister, my little/dear one’

mara-ne ‘It is tree, my little/dear one’

9.3. INTERJUNCTURAL CLITIC

9.3.1. DUBITATIVE CLITIC {*gada*} -*gada*

This is an Interjunctural clitic, like the conjunctive free clitic -*matte*. The Conjunctive is the one having both Free and Bound Clitic forms. Since, it has already been treated under the corresponding heading it has not been treated here again, to avoid repetition.

-*gada*- occurs at the end of an utterance, when the whole utterance suggests the uncertainty of an action or a thing which is referred by the preceding word. Its corresponding forms in Tamil, Telugu, Malayalam and Tulu are. -*a:m*, -*aṭa*, -*atre*, and -*ge* respectively. (In modern Kannada it occurs as *ante*, though in Old and Middle Kannada, we find numerous examples of the example -*gada*, occurring in conversational situation. Though a twentieth century poet has used in his work written in Old Kannada style, its use in Modern Standard dialect is quite strange. It however, naturally exists in some social dialects of Kannada, viz., Havyaka and Gowda Kannada).

~*gada* has an alternant form -*ḍa* which occurs after the obligative verbs in a hasty speech.

E.g. *baroku* + *gada* → *barokḍa* ‘It seems you must come’

kodṣoka + *gaḍu* → *kodṣok-ḍa* ‘it seems, you must cause to give’

gada occurs elsewhere

E.g. *tamba gada* ‘come bring it’

koḍudu gada ‘it appears some one will give’

av-ā-gada ‘it is he, it seems’

appa gada ‘it is father, it appears’

A finite verb also is made use of in order to express uncertainty, which corresponds to English expression 'it appears'. The finite verb *kandade* Lit., 'it/some-one sees' is used in expressions like *av-ā-kandade* 'it appears, it is he', *ta:du kandade* 'it appears, some one will bring (it)'.

9.3.2. NEGATIVE CLITIC {*botti*} ~ -*botti*

-*botti*- 'not possible' occurs in sentences having subjects declined to instrumental or dative cases.

- E.g: *na-nn-a-nda botti* 'not possible by me'
ni-mm-a-nda botti 'not possible by you'
av-ā-nda botti 'not possible by him'
a-∅-d-ar-nda botti 'not possible by it/she'
na-ñ-ge botti 'not possible to me'
ni-ñ-ge botti 'not possible to you'

9.3.3. CLITIC OF ENTREATING {*bala*} ~ -*bala*-

-*bala*- occurs after the nouns, Imperative verbs and other verbs also. It means 'you see'

- E.g. *na:- bala* 'it is I you see'
anna bala 'it is elder brother you see'
akki bala 'I agree you see'
kođu bala 'you give, you see'
kođudu bala 'some one will give you see'

9-A. STEM ALTERNANTS

9-A.1. VERB STEM ALTERNANTS

1. *ki:l* ~ *ki!-*

~*ki:l*- occurs before vowels.

E.g. *ki:l-i* 'uproot' (you sg.)

~*ki!-* elsewhere.

E.g. *ki!-t-ɔ-∅* → *kit-t-ɔ-∅* 'uprooted-they'

2. *sa:y-* ~ *sa:-* ~ *say-*

~*say* occurs before *-t-*

E.g. *say-t-o-∅* → *sat-t-o-∅* 'died-they'

~*sa:-* occurs before *-v-u*

E.g. *sa:-v-u* 'death'

~*sa:y-* occurs elsewhere

E.g. *sa:y-∅-i* 'die-you (sg.)'

sa:y-uv-∅-a 'will die-you (sg.)'

3. *be:y-* ~ *be:n-* ~ *be:-* ~ *ben-*

~*ben-* occurs before *-d-*

E.g. *ben-d-a-d-e* 'boils-it'

ben-d-a 'that which boiled'

~*be:-* occurs before *-ti* and *-si*

E.g. *be:-∅-ti-∅* 'boiled-it'

be:-si 'boil (it)-you (sg.)'

be:n- occurs before *-ke*.

E.g. *be:n-ke* 'hotness'

be:y occurs elsewhere.

E.g. *be:y-uv-a* 'that which will boil'

be:y-ad-a 'that which has not boiled'

4. *sall-* ~ *san-*

~*san-* occurs before *-d-*

E.g. *san-d-a* 'that which has gone'

~*sall-* occurs elsewhere.

E.g. *sall-uv-a* 'that which will go'

sall-ad-a 'that which will not go'

sall-i-si 'cause to go (you-sg)'

5. *tin-* ~ *ti:n-*

~ *tin-* occurs before noun derivative suffix *-i*

E.g. *t:ni-i* 'eating, eatable'

~ *tin-* occurs elsewhere.

E.g. *tin-Ø-i* 'eat, you (sg.)'

tin-Ø-i 'eat you (hon/pl.)'

tin-d-a 'that which is eaten'

6. *ka:y-* ~ *ka:-*

~ *ka:-* occurs before consonants.

E.g. *ka:-d-a* 'that which has become warm, or that which has some one waited for'

ka:-Ø-Ø-ti 'something has become warm' or

'some one waited'

ka:y- occurs elsewhere.

E.g. *ka:y-uv-a* 'that which will become warm or that will wait-some one'

7. *be:d-a* *bad-a*

bad-a occurs after Infinitive verbs

E.g. *kod-bada* 'don't give-you' (sg.)

ma:d-bada 'don't do-you' (sg.)

be:d-a occurs elsewhere.

E.g. *na-ni-ge be:da* 'don't want-to me'

8. *ille* ~ *-ile* ~ *-le*

~ *-le* occurs after Past Finite verbs ending in *-ti*

E.g. *kod-t-Ø -ə-ti-le* →

kot-t-Ø əti-le 'did not give-someone'

a:-Ø-Ø-ti-le 'did not happen -it'

~ -ile occurs after verbal nouns.

- E.g. *ma:d-ike-ile* →
ma:d-ik-ile ‘will not do’ (lit., doing will not)
ho:-ke-ile →
ho:-k-ile ‘will not go’ (lit., going will not)

~ ille occurs elsewhere

- E.g. *adi ille* ‘it is not present’
pustaka ille ‘book is not (present)’

9. *koll-u* ~ *kon.*

~ kon- occurs before -d-

- E.g. *kon-d-a* ‘that which is killed’
koll-u occurs elsewhere:

- E.g. *koll-uv-a* ‘that which will be killed’
koll-∅-u ‘kill-you’ (sg.)
koll-∅-i ‘kill-you’ (hon/pl.)

10. *tar-* ~ *ta:r-* ~ *ta:-* ~ *tan-*

~ tan- occurs before -d, -n and -i.

- E.g. *tan-d-a* ‘that which has brought’
tan-∅-∅-n-e ‘bring-I’
tan-∅-i ‘bring-you’ (hon/pl.)

~ ta:- occurs before infinite marker -ke and future tense markers also.

- E.g. *ta:ke* ‘to bring’
ta:-v-∅-e ‘will bring-I’
ta:-∅-∅-du ‘will bring-some one’

~ ta- occurs before -m-

- E.g. *ta-m-ba* ‘fetch it’

~ *ta:r* occurs before -*a*

E.g. *ta:r-ad-a* ‘that which has not been brought’

~ *tar-* occurs elsewhere:

E.g. *tar-bada* ‘don’t bring’

tar-əki ‘can bring’

tar-oku ‘must bring’

11. *bar* ~ *barr-* ~ *ban-* ~ *ba:-* ~ *ba-*

~ *ba* occurs after *ta-m-*

E.g. *ta-m-ba* ‘fetch you’ (sg.)

~ *ba* occurs before imperative marker Ø and also the third person marker -*du*

E.g. *ba:-Ø* ‘come-you’ (sg.)

ba:-Ø-Ø-du ‘will come-some one’

~ *ban-* occurs before -*d-*, -*n* and -*i*

E.g. *ban-d-a* ‘that which has come’

ban-Ø-Ø-n-e ‘come-I’

ban-Ø-i ‘come-you’ (pl./hon.)

~ *ba:r-* occurs before -*a*.

E.g. *ba:r-ad-a* ‘that which has not come’

~ *bar-* occurs elsewhere.

E.g. *bar-bada* ‘don’t come’

bar-əki ‘can come’

bar-oku ‘must come’

12. *a:gi*, ~ *a:-* ~ *a-*

~ *a-* occurs before -*kki* the intensive marker.

E.g. *a-kki* ‘yes, alright, will become’

$\sim a-$ occurs before consonants except $-s-$

E.g. $a:-ku$ 'must become'

$a:-d-a$ 'that which has become'

$a:-\emptyset-\emptyset-n-e$ 'become-I'

$a:-\emptyset-\emptyset-ti$ 'it happened'

$\sim a:gi-$ occurs elsewhere.

E.g. $a:g-ad-a$ 'that which should not become'

$a:g-i$ 'having become'

$a:g-si$ 'cause to become'

13. $ho:gu \sim ho:$

$\sim ho:g-$ occurs before vowels.

E.g. $ho:g-i$ 'having gone'

$ho:g-\emptyset li$ 'let (it) go'

$ho:g-ad-a$ 'that which has not gone'

$\sim ho:-$ occurs elsewhere.

E.g. $ho:v-\emptyset-a$ 'will go-you (sg.)'

$ho:-d-\emptyset-e$ 'went-I/we'

$ho:-\emptyset-tu-\emptyset$ 'went some one/it'

$ho:-ke$ 'to go'

14. $ir- \sim id- \sim ill-$

$\sim ill-$ occurs before Negative marker $-ad-$

E.g. $ill-ad-a$ 'that which is not present'

$\sim id-$ occurs before $-d$

E.g. $id-d-\emptyset-a$ 'you were (present)'

$\sim ir-$ occurs elsewhere.

E.g. $ir-\emptyset li \rightarrow ir-li$ 'let (it) be'

$ir-uv-\emptyset-e$ 'I will be (present)'

ir-ike ‘to be present’
ireku ‘must be present’

15. *ka:n-* ~ *kaŋ-*

~*kaŋ-* occurs before *-d-*

E.g. *kaŋ-d-i* ‘having seen’

~*ka:n* occurs elsewhere.

E.g. *ka:n-ad-a* ‘that which is not seen’

ka:n-b-a → *ka:m-b-a*

‘that which will be seen’

16. *bi:l* ~ *bi:* ~ *bid-*

~*bid-* occurs before *-d*

E.g. *bid-d-a* ‘that which fell’

~*bi:* occurs before *-ti*

E.g. *bi:∅-∅-ti* ‘it fell’

~*bi:l* occurs elsewhere.

E.g. *bi:l-uv-∅-a* ‘will fall-you (sg.)’

bi:l-ike ‘to fall’

bi:l-əli ‘let (it) fall’

APPENDIX

SK and GK Word List

The lexical items of both SK and GK are listed below in order to facilitate comparison between them. The first column gives the SK Words and the corresponding GK Words are given in the second column. The meaning of the vocables is given in the third column.

SK words are transliterated with the corresponding phonetic symbols for the respective graphemic symbols. In SK there is no contrast between *e-E*, *O-o*, *a-a*. However, in one pair of examples, *e* and *E* seem to contrast in SK. E.g. *ele* - calling attention from an inferior person; *E'lE* 'leaf'. Since there are no separate orthographic symbols for *e* and *E*, both of them are transcribed with *e* only as *ele*. In pronunciation, they are kept distinct. Considering only the written form of such words, this distinction is ignored here in counting the common words shared both by SK and GK. In case of the other two pairs of vowels, the question does not arise as to their contrast and therefore, the GK words having *o*, and *a* are not equalised with the corresponding SK words having *O* and *a*, in counting the shared words.

An attempt is made to count the frequency of the words beginning with different vowels and syllables. Their percentages are worked out for individual items. A percentage of shared words in particular syllabic types is also worked out to

investigate in which kind of initial syllables the vocables tend to change. All these are arranged in tables given below and these tables may give an idea of the exact relationship between the two dialects mentioned above. In most cases the grammatical rules are not quite helpful to demarcate the difference between the dialects and also it is felt by many that the dialects manifest their difference from one another through their vocabulary.

The percentage of the vocables shared etc., will help us to know to what extent there is commonness or differences between these two dialects in a quantitative manner. However, GK also has considerable differences from SK in its phonology as well as grammar. The readings on the vocabulary are given as a supplementary item for them though SK and GK are not compared thoroughly, in phonology and morphology except for a small attempt made in my paper, Standard Kannada and Gowda Kannda, a synchronic comparison presented in the Seminar on Dravidian Languages and published by CAS in Linguistics, Annamalai University.

TABLE I

Percentage of words beginning with different individual syllables

Syllable	Total	Total shared words	% of Total	% of Total shared	Shared Total in each $\times 100$
a	114	39	5.96	1.98	34.21
a:	31	11	1.57	0.56	35.48

<i>ho:</i>	8	6	0.41	0.30	75.00

OBSERVATION

From the above table the total of the shared words between SK and GK works out to be 21.12. from this it can be inferred that the rate of change of vocables between the two dialects is roughly eighty percent. In other words, GK shares only 20 words with SK for a bulk of 100 words.

Table 2 :— The quantifications of shared words. M=More,
L=Low, E=Equal.

<i>a</i>	<i>a:</i>	<i>i</i>	<i>i:</i>	<i>u</i>	<i>u:</i>	<i>e</i>	<i>e:</i>	<i>o</i>	<i>o:</i>
L	M	E	E	L	M	M	L	L	M
<i>k</i>	M	L	M		L	M	L	M	L
<i>c</i>	M		L	M	M		M		
<i>t</i>								E	
<i>t</i>	L	M	M		L	M	M		M
<i>p</i>	M	L		M	L	M		M	
<i>g</i>	L	M	M		L	M	L	M	
<i>j</i>	L	M		M					
<i>d</i>	E	E						E	E
<i>d</i>	M	L	M		L	M			L
<i>b</i>	L	M	L	M	L	M	L	M

Table 3 Table 2 re-arranged in the order of vowels of the first syllable.

<i>a</i>	<i>a:</i>	<i>i</i>	<i>i:</i>	<i>u</i>	<i>u:</i>	<i>e</i>	<i>e:</i>	<i>o</i>	<i>o:</i>
<i>M</i>	8	9	6	6	3	11	8	4	3
<i>L</i>	9	6	4	2	10	2	3	5	8
<i>E</i>	1	1	2	2			1	1	2

Table 4 :— Total readings of the Table 3, arranged in short versus long vowels.

	Short Vowel.	Long Vowel.
M	28	41
L	34	16
E	6	5

OBSERVATION

- When there are long vowels in word initial syllables, mostly there will not be any phonetic differences between SK and GK words. This is seen in the Table 3, where, except e:, all other long vowels have scored more number of Ms, than Ls.
- The Phonetic differences between SK and GK are more when the initial syllable has a back vowel than when the initial syllable is having a short vowel. The Table 3 shows that front vowels including a and a: have scored equal or half of the number of Ms, in correspondence with the shared words having long vowels, whereas the ratio of Ms, scored in case of Back Vowels is wider than that of Front Vowels.

SK and GK word list

<i>SK</i>	<i>GK</i>	<i>Meaning</i>
-----------	-----------	----------------

a

1. <i>akka</i>	<i>akka</i>	'elder sister'
2. <i>akki</i>	<i>akki</i>	'uncooked rice'
3. <i>agani</i>	<i>ta:la</i>	'latch'
4. <i>agasa(madiva:la) modya:la</i>		'washerman'
5. <i>aga:lu</i>	<i>agə:li</i>	'moat'
6. <i>agala</i>	<i>agala</i>	'breadth'
7. <i>agi</i>	<i>agi</i>	'bite'
8. <i>age</i>	<i>e:li</i>	'dig'
9. <i>agga</i>	<i>agga</i>	'cheap'
10. <i>agrasha:le</i>	<i>agrasha:le</i>	'cooking place in big temple'
11. <i>agraha:ra</i>	<i>agra:ra</i>	'brahmin colony'
12. <i>añkana</i>	<i>aññana (ka:la)</i>	'courtyard'
13. <i>añke</i>	<i>añkE</i>	'authority'
14. <i>añke</i>	<i>añkE</i>	'number, digit'
15. <i>añga:di</i>	<i>añgi:di</i>	'shop'
16. <i>añgay</i>	<i>añgøy</i>	'palm of the hand'
17. <i>añga:la</i>	<i>añga:la (ijjɔ:li)</i>	'courtyard'
18. <i>añga:ta</i>	<i>añga:ta</i>	'(to lie) on one's back'
19. <i>añga:lu</i>	<i>añga:li</i>	'sole of the foot'
20. <i>añgi</i>	<i>kudta (añgi)</i>	'shirt'
21. <i>acce:ru</i>	<i>arda se:ri</i>	'half a seer'
22. <i>accu</i>	<i>acci</i>	'press'

23.	<i>accukaṭtu</i>	<i>accikəṭṭi</i>	'neatness'
24.	<i>ajja</i>	<i>ajjapa</i> (<i>ajja</i>)	'grand father (old man)'
25.	<i>ajji</i>	<i>uggava</i> (<i>ajji</i>)	'grand mother (old woman)'
26.	<i>añju</i>	<i>añji</i>	'to fear'
27.	<i>aḍake</i>	<i>aḍikE</i>	'betal nut'
28.	<i>aḍagu</i>	<i>aḍiṅgi</i>	'to hide oneself'
29.	<i>aḍaru</i>	<i>aḍəri</i>	'to climb up as creepers'
30.	<i>aḍaru</i>	<i>aḍəri</i>	'small branches'
31.	<i>aḍavu</i>	<i>aḍəvu</i>	'mortgage'
32.	<i>aḍi</i>	<i>aḍi</i>	'foot (to fill one's mouth)'
33.	<i>aḍipa:ya</i>	<i>aḍipa:ya</i>	'foundation'
34.	<i>aḍige</i>	<i>aḍigE</i>	'cooking,'
35.	<i>aḍige mane</i>	<i>aḍigko:nE</i>	'kitchen'
36.	<i>aḍḍa</i>	<i>aḍḍa</i>	'across'
37.	<i>aḍḍana</i>	<i>aḍyana</i>	'shield'
38.	<i>aḍḍi</i>	<i>aḍdi</i>	'obstacle'
39.	<i>aṇekaṭṭu</i>	<i>aṇekəṭṭi</i>	'dam'
40.	<i>aṇṇa</i>	<i>aṇṇa</i>	'elder brother'
41.	<i>aṇṭu</i>	<i>aṇḍi</i> (<i>ani</i>)	'to come nearer'
42.	<i>aṇṭu</i>	<i>go:ndu</i>	'gum'
43.	<i>aṇṭu</i>	<i>aṇṭi</i>	'to stick'
44.	<i>atisa:ra</i>	<i>hoṭṭEnda ho:du</i>	'dysentery'
45.	<i>atta</i>	<i>atta</i>	'that side'
